#### PUBLICITY ON THE PRAIRIES

Effort to be Made to Get Edmonton and Other Alberta People Interested Here

THIS CRUCIAL TIME

Board of Trade Asks Stork and Dawson to Interview Authorities at Edmonton

At the meeting of the board of trade last night it was decided to request Fred Stork M.P. and F. G. Dawson to stop off at Edmonton on their way East and take up with the board of trade there the question of grain shipments through the port of Prince Rupert, with a view to securing their co-operation in any movement looking to the erection of elevators or the making of shipments.

S. K. Campbell said he thought this was the psychological time to press the grain shipping situation. He thought someone should be sent to preach the gospel of Prince Rupert as a shipping port, and get the eyes of the grain shippers directed this way. J. C. McLennan expressed the opinion that this was the most important thing that could be done.

W. E. Williams favored rather the inviting of a practical grain man to come to Prince Rupert and report on the situation.

R. Beaumont suggested getting J. D. O. Mothersill, the man who had been sent to Vancouver, to come and make a report.

Mr. McLennan said Vancouver did not wait for grain men to come. They sent their own men to the prairies.

H. F. Pullen advocated sending someone in order to get needed publicity. By doing that they would let people on the prairies know that Prince Rupert was bidding for the grain trade and that there were advantages to be gained by shipping through this port. This was the crucial time to take up the matter.

Mr. Campbell again urged that all the energies of the people be put into this. He thought that not only should the board get the local representative to stop off there but that also they should send a delegation to Edmonton.

W. E. Williams moved a formal resolution that Fred Stork and F. G. Dawson be asked to interview the authorities at Edmonton and ask them to send an expert here to inspect and also possibly to interview Verner Smith, formerly of this city, and a member of the Alberta government in regard to this matter. The resolution was seconded by S. K. Campbell and carried unanimously.

#### Recent Earthquake in Japan Discourages the People who have their Confidence Shaken

VICTORIA, Feb. 2.—"If the toll of life and property exacted by the second earthquake was small compared with the frightful havoc wrought by the September catastrophe, the effect psychologically and spiritually on the Japanese people has been most serious," said Captain L. D. Douglas, R.D., R.N.R., commander of the Empress of Asia, on her arrival here from the Orient.

"Less than fifty people were killed and about 200 people were injured in the second shock. It made no material difference to the appearance of Yokohama and Tokio, which resemble the devastated areas of France after the Great War, although it did topple over some 3,000 buildings in twenty-two different towns. But all the confidence of the people has been shaken to its roots.

"In a burst of enthusiasm following the first disaster, elaborate plans were laid by the Japanese for the rebuilding of their stricken cities. But now the people are wondering if it is really worth while to build again when, at any moment, another earthquake, worse perhaps than the first, may ruin the product of their labor. They are intensely dejected. There is an atmosphere of discouragement everywhere.

"There was, of course," he said, "widespread terror when the earth opened and shook for the second time. People rushed from their barracks and makeshift habitations in Tokio and Yokohama in their night clothes; but, when the shocks had subsided somewhat, their fears were soon allayed.

"A thick mist in Tokio at the time of the shock added to the confusion reigning there. But as there was no wind the fires that started on the collapse of buildings were quickly brought under control."

CONSCIOUS ALL TIME  
Able to Answer Yes or No But Not to Converse Further

WASHINGTON, Feb. 2.—Steadily losing ground, Woodrow Wilson continues this afternoon having lasted through the night physicians cannot predict how long his remarkable vitality will enable him to hold out. Although he has taken no nourishment for 24 hours his pulse, respiration and temperature are practically normal. Nevertheless life is ebbing away.

At no time has Mr. Wilson been unconscious. He always knows what is going on about him. He is too weak to converse but whispers yes or no to questions.

Physicians say he may linger for three or four days. There is no telling how far his tenacity may sustain him, but something may snap any minute causing him to slip quietly away.
