Mrs. N. Makes White Sauce

One of the nicest White Sauce recipes we have tried comes from a lady on First Ave. West. Not least of its virtues is simplicity.

Simply scald 1 cup of Pacific Milk, thickened with corn flour which has been mixed with cold water. Season to suit. No butter is required.

This is so easy to make that one cannot imagine what a delightfully flavored sauce it turns out to be.

JAPANESE BASEBALL TEAM FROM O. FALLS EXPECTED ON JULY 1

Negotiations have been practically completed by the Sons of Canada for the bringing of the Japanese baseball team from Ocean Falls to play a local all-star aggregation at the Acropolis Hill grounds on Dominion Day in connection with their sport program. It is anticipated that two games will be played on Dominion Day and one game the evening following. The Japanese team from the paper town has an enviable reputation in baseball circles on the coast and doubtless local fans will be treated to a fine brand of play.

MONKEY GLANDS ARE ONLY MYTHOLOGY IS OPINION OF DOCTOR

Clarence McWilliams of New York is an Advocate of Plastic Surgery

CHICAGO, June 26—Rejuvenation by transplantation of any kind of glands was branded as mythology before the surgery section of the American Medical Association, by Dr. Clarence A. McWilliams, New York surgeon, in an address yesterday. The speaker considered the subject in relation to skin grafts or grafts of internal organs from one creature to another.

"In numerous instances I can point out where the uniform result is the disappearance of the grafted tissues," Dr. McWilliams asserted. "The scientific reason is that between animals of the same species, even, there are unknown biological differences that prevent the survival of the transplanted arteries. Reported successes would indicate that these grafted organs 'seem to take', but they suddenly disappear, in a few weeks at the most."

Skin Grafting
"The same facts govern the grafting of skin from one individual to another. In order to grow, skin must be taken from the same person. Apparent success of other individuals' grafts is explained by the fact that the patient's own skin grows under the transplant and pushes it aside."

"Plastic surgery holds the greatest promise to those having either congenital or unfortunately acquired facial deformities," he added. "A hideous deformity may be transformed into a scarcely noticeable disfigurement."
