Doings of the Mosquito Fleet which is the chief source of Prince Rupert's prosperity

The admiral of the Mosquito fleet reports that severe storms have been the order of the day and night on the deep sea fishing grounds during the week and several of the home boats found it tough going. However, in spite of the severe weather encountered the halibut landings have exceeded those of the previous week.

The landings have been marked by the scarcity of Canadian fish offering. This has been due to the bad weather and also to the fact that many of the home boats, which have been overhauled during the past winter months and all ready to go out on the high spots, have not seen fit to venture forth with the elements so much against them and the chances of remunerative fishing nil. The heaviest individual landing of the week was made by the American schooner Skandia when she unloaded 120,380 pounds of halibut on Tuesday morning. This remarkable catch was in addition to several thousand pounds of fish unloaded at Ketchikan from her decks. The Canadian schooner Pair of Jacks, Capt. John Ivanson, arriving in port early on Saturday morning last reported encountering very high winds and heavy seas while on her return trip across Heceta Straits, and at times things looked black for the safety of the crew. So strong was the gale that it took the craft 22 hours to make 38 miles.

The waterfront shipyards and machine shops continue busy and a new keel is being laid down in Boneyard Creek by skipper John Field. Several light fur arrivals are reported during the week. Business in the public hire launch branch of the nautical doings took a spurt this week. The fine weather, which broke generally over the northern waters on Wednesday and Thursday and is expected to continue for a while, will permit of the high boat squad getting things lined up in good shape for the forthcoming season's business.

Keel to be Laid Down

Skipper John Field is busily engaged making preparations for laying the keel of a \$7,000 boat which will be engaged in the transportation business between Bute Lake and Kitimat. The keel will be commenced early in the coming week and the new boat will take shape on the Boneyard Creek ways. The dimensions of the new craft will be 55 feet long by a 12½ foot beam and when completed will be fitted with a 50 horse power heavy duty Sampson engine capable of giving a normal speed of 8½ knots. The holds will have a carrying capacity of from 10 to 12 tons freight and the interior will be fitted with passenger accommodation. John has secured a contract for the carrying of passengers and freight between the logging camps situated in the vicinity of Bute Lake and Kitimat. She will also engage in towing booms of logs between

Logging King Visits

Louis Lockyer, the logging king of Lewis Island, made a flying trip to port early in the week aboard the power boat Lewis Island. Louis has been particularly busy lately with his logging operations and with supplies running short it became necessary for the skipper to hurry to port in order that the inner men of his gang could be comfortably accommodated. The Lewis Island was only in port for a few hours.

The Canadian halibut schooner Selma is at the dry dock undergoing repairs in readiness for the spring halibut chasing.

The schooner Nautilus is having her engine repaired while lying at anchor in Cow Bay.

Tug Azurite Fixing Up

The tug Azurite of Anyox, Capt. Gerrard, is at the Dry Dock, and considerable repair

work is being executed upon her. The electrical effects are being given the twice over and the engine is being looked to. It is expected that all work will be completed early in the coming week when the Azurite will return to her home port to engage in the spring towing business.

The Canadian schooner Dolphin, Capt. Pete Byrne, has just completed annual overhaul and will be leaving port within the next few days for the high spots.

The Ringleader, Capt. Sollows, left port recently for the deep sea fishing grounds on her initial trip of the spring season. The Ringleader has recently been thoroughly overhauled on the N.M. McLean ways.

Launches Out

The launch Narbethong, skipper Hoomes K. Freeman, was out to the scene of the Amur wreck, White Cliff rock, on Monday with Hubert Ward, who was representing the marine underwriters. The launch Dixie, Rupert, Capt. R. L. Newcomb, was down to Refuge Bay with J. B. Lambert, assistant district engineer for federal department of public works, who was on a trip of inspection in the interests of his department.

The power boat Wigwam, Capt. Claude Ketchum, left port on Thursday morning for Georgetown. The Wigwam will return from the northern mill with a scow of lumber for local consumption.

Jimmy's New Boat

Skipper Jimmy Thomas left port recently for Vancouver. It is understood that Jimmy is in the south to procure a boat with which he will engage in fish packing during the coming season for the Canadian Fish & Cold Storage Co. The new boat will be in the 60 foot class and will be highly powered.

Several light fur catches have arrived from the Gardner Canal district in the past week and a ready local market has offered for the pelts. Mink and marten skins predominated in the catches.

Joe Baker Roughs It

The Canadian halibut schooner Joe Baker, Capt. Fred Blundon, arrived in port on Tuesday night after spending several weeks touching it down the coast. Owing to the adverse weather it was impossible for Fred to get anything like a decent catch, in fact it proved to be the worst trip he has ever made. At times the breakers tossed the sturdy craft around so much that it became necessary to seek sheltered coves for days at a time much to the grief of Fred, who delights to be up and doing when away from home.

Fish Business

During the week 436,200 lbs. of halibut has been marketed on the Fish Exchange. Americans were high at 17.5c and 9c and low at 14c. and 8c. Canadians were high at 16c. and 9c and low at 13c. and 8c. Arrivals were: Pair of Jacks, E. Lipsell, Summer, Groth, Atlas, Hazel, Tacoma, Faith, Wilson, Volunteer, Arctic, Reliance, Skandia, Renfrew, Joe Baker, Tom and Al, J. P. Todd, Gladstone, Antler, Woodrow, Katahdin, Seymour.

Vic Is Sick

The admiral of the fleet regrets to report that Vic Markland, of the good ship Cub, has been admitted to hospital to undergo an operation. Vic has not been feeling well of late and his admission to hospital is the sequel. The boys will wish Vic a speedy recovery and a quick return to the fold. In the meantime the Cub will remain in the Cow Bay ways and will be under the watchful eye of the fleet secret service.

Two scow loads of coal are expected in tonight from Vancouver Island, in tow of the tug R.F.M., for the Albert-McCaffery interests. The loads will approximate 1000 tons.

The Canadian schooner Cayenne, Capt. Jim Morrison, which has recently been overhauled at the Dry Dock, left port for the deep sea fishing grounds on Monday last. Jim has been paying particular attention to the engine during the fixing and has it in such shape now that when the alarm clock rings the box

Why?

WHY waste time in useless "shopping around" when the advertisements lay before you the choicest wares of every progressive merchant in town?

WHY use needless effort in an endless store-to-store quest when the advertisements enable you to make your choice of the finest merchandise without even leaving your home?

WHY pay more than you ought when you can stretch your dollar to the elastic limit by taking advantage of the bargains and good buys that are daily advertised in this paper?

WHY risk dissatisfaction by buying unknown, unbranded goods when you can assure yourself complete satisfaction by buying an advertised product, backed by the integrity of a man who spends real money to establish his name and to build up public good-will?

Read the Advertisements. Buy Advertised Wares. It is a safe and sound policy
