Canada Looms Large At Empire Exhibition.

Canada looms large at the British Empire Exhibition. This country is large, so large that it will take many years to fill it. It is also important and the more people we have the more im- you get five dollars ahead of the portant we shall become.

Every big exhibition of recent years has seen the Canadian ried or a visitor comes and there pavilion one of the centres of attraction. There is always some- you are. thing novel in it and this year is no exception to the general rule.

Visit Canada Instead Of European Countries.

What is needed just now is to so turn the eyes of the time there will be a close season football game here yesterday wealthy Britishers to Canada that they may be induced to come for fairs and times will be dull. here for their holidays instead of going to Switzerland or Italy or France. It is a little farther away but not much and it has the added attraction of a sea voyage on palatial liners.

People visit the Swiss mountains but we have mountains is in full swing there. that are finer than anything in Europe. People visit Norway to view fjords, yet right here in Northern B.C. the fjords are among the finest in the world. For diversity of scenery Canada excels and once the British people get the habit they will come here by the thousands. Many come now but not enough.

Immigration Is Crying Need.

There are a few people who, because they see unemploy- in any other period. Recent ment in one or two cities, would stop everyone coming to Can- statistics show that the imports ada. That is foolish. The tendency of the day is for people to of raw tobacco have increased flock to the cities and then when they get there and find they considerably as compared with cannot obtain work they howl about conditions. What is needed those prior to the war, and this is more people in the country to make farms and to produce despite the decrease of the Gerfood. There is plenty of market for the output. In Canada there man population. is room for five times the present population without feeling the least crowded. Why stop people coming, then? Most of the people who are asking that others be stopped are among those who came here themselves a few years ago in order to better their own condition.

Fair Promises To Be The Best Yet.

While at the time of writing it is difficult to say just how the fair this year will compare with previous years, it seems certain that it will be the best in the history of the city. The demand for space was greater than ever before and the building both inside and out is far better decorated than it has been in the past. There has been a renewal of interest in a good many departments and individual citizens have taken more interest in the event.

The Daily News commends the fair to the citizens of Prince Rupert as something not to be overlooked. It is well worthy of a visit and to see it best the afternoon is the time when fewer people are around than in the evening. It is suggested that the week be kept by citizens as Fair Week and that no other engagements be allowed to interfere with a daily visit to Acropolis
