

X-RAY INDICATED CANCER, RELIEVED BY "FRUIT-A-TIVES"

Splendid Fruit Medicine Performs Another Miracle.

The incalculable value of "Fruit-a-tives" can best be appreciated when it completely relieves some dangerous, deadly malady that is sapping the health and strength of the sufferer. After reading this letter, it is easy to understand why Mrs. Glover was glad to write about "Fruit-a-tives" in the hope that her experience would guide others to try this wonderful fruit medicine.

"For years, I was a sufferer with chronic Dyspepsia, Indigestion and Constipation; the stomach pains were dreadful and finally my health broke down completely. After five X-rays had been taken, I was advised that my condition strongly resembled Cancer of the Stomach and an immediate operation was necessary. Dreading an operation, I consulted other physicians but grew steadily worse. I had almost given up hope when I decided to try "Fruit-a-tives" recommended by many friends.

Immediately my condition began to improve. Pains disappeared; soon Dyspepsia and constipation were things of the past. After a few months I was perfectly well again and have been in the best of health for over a year now." Mrs. ANNIE GLOVER, 16 Henry Street, Ottawa.

Just try "Fruit-a-tives"—let them prove their real worth. 25c. and 50c. a box, at all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

MRS. ANNIE GLOVER

TIMBER GREAT CAPITAL ASSET

Industries in This District Capable of Greatly Extended Development

SHINGLES AND VENEER

Naas and Skeena River Provide Much Lumber for Pulp and Paper or Other Purposes

The estimated stand of timber in Northern British Columbia is 144,000,000,000 feet, sufficient to support a greatly extended development, according to P. Z. Caverhill, chief forester for British Columbia, who addressed the Rotary Club at its luncheon here Thursday. On the Skeena there was sufficient timber for a large pulp development and another on the Naas and again at the Queen Charlotte Islands. It would be some time before the development would take place to make the most of the timber resources but from any development Prince Rupert would benefit because the city was the logical centre for the business. He said he thought the time was ripe for the establishment of a shingle and veneer plant and there was no reason why a shingle mill should not be established in Prince Rupert, which would supply the market in competition with other places.

Cottonwood

Referring to the cottonwood, plans for the development of which have been made on the Skeena River, Mr. Caverhill said there was similar good cottonwood on the Naas River. The raw material far exceeded the amount in the south.

Mr. Caverhill said he always liked coming to Prince Rupert because here everyone was interested in the development of the country and especially in the lumber industry.

Human interest in the forests had been paramount since the earliest dawn of civilization, said the chief forester. In British Columbia people could hardly realize how closely the forests were to the progress of the country. One dollar out of every three came from the forests. The charm of the country, which made the province attractive to tourists also depended upon the forests. British Columbia had half the timber found in Canada and the coast was noted for the size and grandeur of its trees. This was the result of the climate and soil. The trees would continue to grow if given a chance. As compared with the demand, however, the supply of timber was limited.

Nature Provides Crop

Forestry had to do with harvesting, marketing and replacing timber. Nature provided the first crop and it depended on how this crop was handled whether there would be a second. He combated the idea that the forest was not a crop but something set here to use and forget. Anglo Saxons had been the chief offenders in the abuse of the forests. Disregard had been inbred in them but this disregard was not found in other nations. Britain was planning to plant one and three quarter millions of acres at \$20 an acre. In the next ten years they proposed planting 200,000 acres. The timber industry was one of the basic industries but the crop took a long time to mature. The people who planted did not reap the harvest.

Mr. Caverhill was opposed to the idea that substitutes for wood would be discovered. Substitution had always been going on but that only increased the demand. New uses for timber were being discovered such as for telegraph and telephone poles, railway ties, etc. The linoleum on the floor, the gramophone records were made largely from wood. Fabrics were manufactured from it, stockfood was prepared from sawdust and very soon people would serve wood products with their meals.

Age of Wood

This was the age of wood. Children were rocked in a wooden cradle and buried in a wooden box. Civilization was built on wood. The countries that consumed most of it were the most advanced. In North America the per capita consumption was 100 cubic feet, in northern Europe from 15 to 50 feet, in southern Europe from 5 to 10, in Japan 5, in India 3, and in the Mohammedan countries south of the Mediterranean from half to one was the record. In European coun-

tries the consumption was steadily increasing. Fortunately Nature provided the crops. If it had to be planted, the cost would be very high. The only difficulty in keeping up the supply was the control of forest fires. After three or four burnings the soil would not reproduce. In a scattered population it was almost impossible to organize to watch and put out fires. There had been carelessness in the past and that phase was causing the department much worry today. A course of education in putting out camp fires, lighted matches and cigarettes was necessary.

WILL CALL GENERAL MEETING OF HOSPITAL

Constitutional Changes to be Considered and This Will be Followed by Drive For Membership

A special general meeting of the members of the Prince Rupert General Hospital is to be called to put before them some constitutional changes. It is proposed to give the medical men of the city representation on the board, and also the ladies' auxiliary. To reduce the membership dues to \$2 and also to have sustaining memberships at from \$5 a month upwards. If these changes are made there is to be a drive for memberships and thus endeavor to increase the interest of the public in the institution.

OFFICIALS OF WHITE PASS RAILWAY HERE YESTERDAY ON MARY

C.P.R. steamer Princess Mary, Capt. Ormiston, northbound from Vancouver to Skagway and way ports, was here from 1.15 to 3 o'clock yesterday afternoon. Included in her northbound passenger list were H. Wheeler,

manager of the Yukon & White Pass Railway, W.D. Gordon, superintendent, and about 20 members of the company staff going in to make ready for the season's service.

Debarbing from the Princess Mary here were Mr. Stevenson, Mrs. Anthony, Mrs. T. W. Berne, Mr. and Mrs. J. P. Eggleston, F. Tingley, Miss Brown, G. Holler, M. E. Stewart, H. Whalen and Mike Grumeloff.

Going north from Prince Rupert were: F. O. Ryan, K. Powell, W. H. Lloyd, D. J. McLeod, Mrs. F. Maynard, E. J. Maynard, Mrs. M. Pierce and Martha Smith or Kelebian; D. A. Manister and E. Daniel for Juneau; P. Sharp for White Horse; Harry Martin for Wrangell; M. Galligen for Skagway.

At the hospital meeting last night the thanks of the board was extended to the ladies auxiliary for the work they were doing in connection with the providing of much needed linen. Those present at the meeting were Messrs. McRae, Haines, Mackay, Smith, Collison and Mortimer.

AT 80 YEARS OF AGE WAS TROUBLED WITH SHORTNESS OF BREATH PALPITATION OF THE HEART AND FAINTING SPELLS

Mrs. M. O'Connor, Whitestone, Ont., writes:—I have been troubled, most of my life, with shortness of breath, palpitation of the heart and fainting spells. I was advised by a friend to try Milburn's Heart and Nerve Pills, which I did, and at once found relief, and I have never had a really bad spell since.

I am 80 years of age and always keep them in the house, and when I feel any symptoms of my old trouble coming on all I have to do is to take a few doses. With the help of your Pills I expect to see many years yet. I always recommend them to any one who is suffering from heart trouble. Milburn's Heart and Nerve Pills are the only pills of their kind, or mailed direct on receipt of price, by The T. Milburn Co., Limited, Toronto, Ont.

OLD CHUM SMOKING TOBACCO

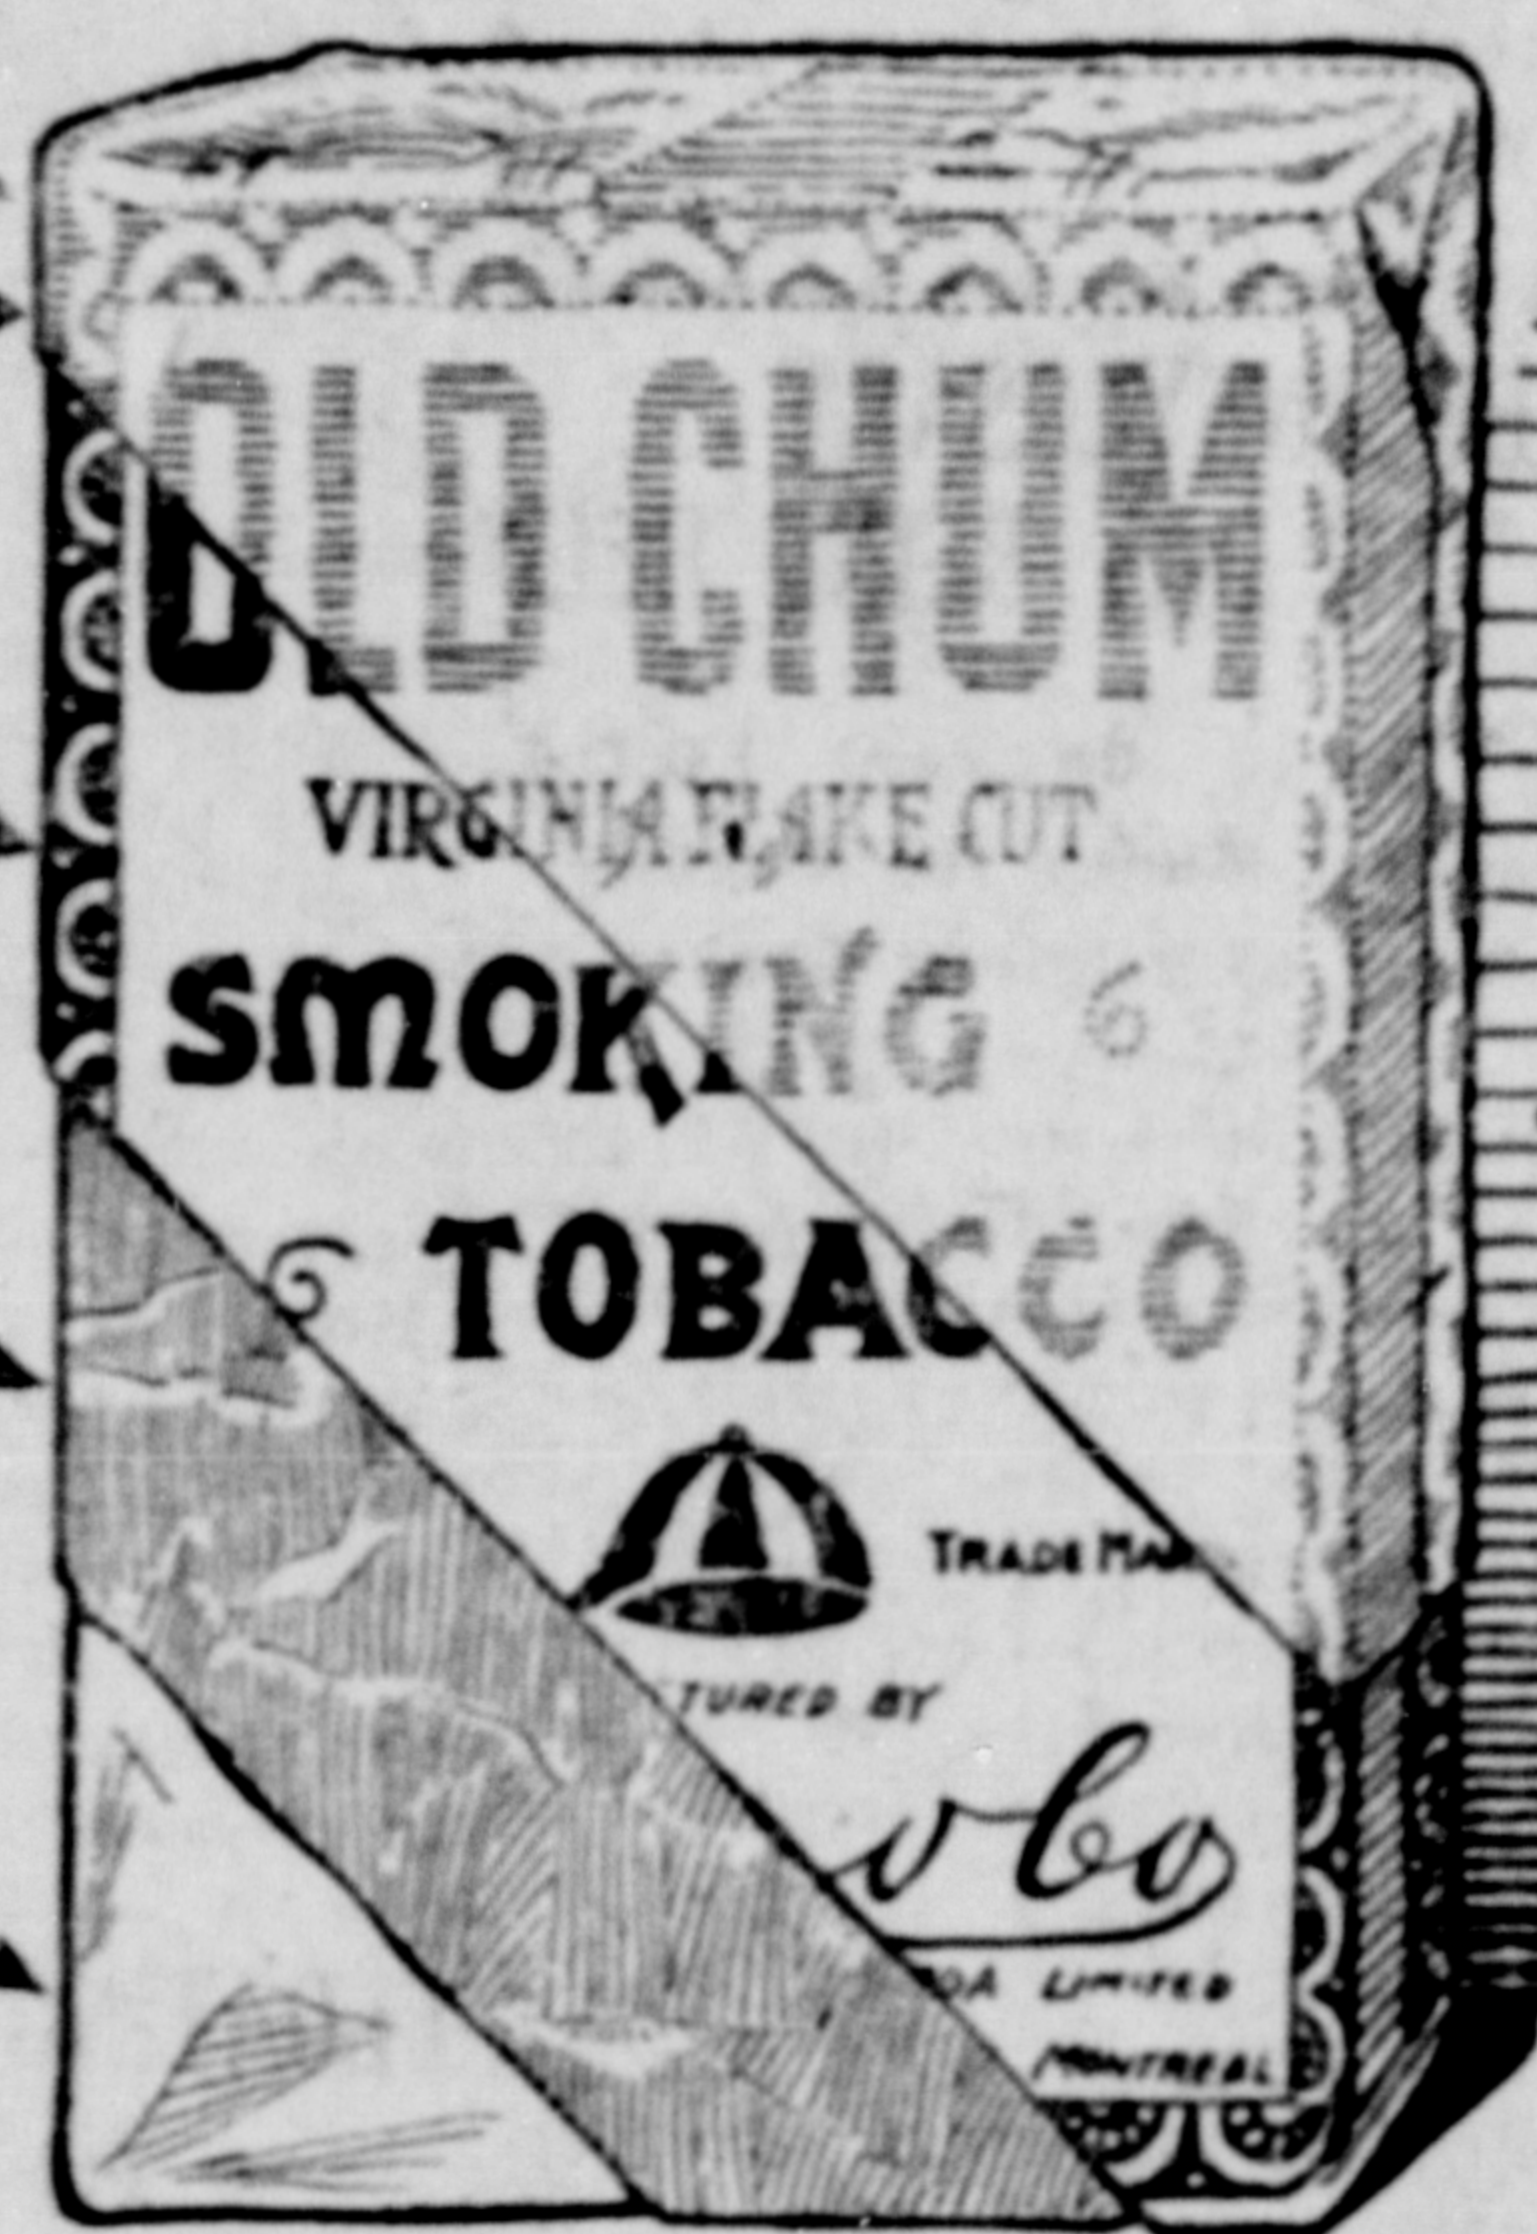

IS FOUR TIMES SEALED

The outer wrapper of water and moisture proof paraffin paper

The regular Old Chum wrapper showing name and trade mark

The heavy tin foil

The heavy manilla paper

to bring you the full richness and mellow sweetness of this—

Archbishop's Message On The Easter Triumph.

In the spring-time as the sun pours its radiant energy upon the surface of the earth we can almost hear the grass, the shrubs, and the trees singing their Easter song of resurrection as they burst forth from the tomb of winter into triumphant life. This is no poetic fiction for the same law of vibration functions both in life and in music. If our ears were only a little more sensitive they could catch the harmonious rhythm of the unfolding flower. All vital energy flows from God who as Infinite Energy is the ultimate reality of the universe.

It is well for us to remember that the Infinite Energy of God is revealed in rising degrees, and that the degree differs according to the intrinsic value of the energy. We feel instinctively that mind energy is higher than radiant energy and that the highest form of mind energy is moral energy which manifests itself in righteousness, goodness, and love. The highest being is the being who reveals most fully the highest degree of energy according to its moral value. The verdict of the world assigns this exalted position to the historic Christ in whom was manifested the energy of God's redeeming love.

The conservation of moral value is a fundamental law of the universe. If radiant energy is never lost though transformed we may be sure that moral energy, while it may be apparently vanquished and buried, will always rise again with added glory at the touch of the God of Infinite Love.

As in the historic Christ we had given to us in human form, for a limited time and in a limited place, the highest revelation of the righteousness, the goodness, and the love of God, it is inconceivable that this supreme moral value should not have been fully conserved in some higher and more glorious form, unlimited by time and place. "The Lord is risen indeed."

In the Risen Christ we have the divine pledge of the ultimate triumph of Moral Energy. Immortal love, whether in us or in others, though seemingly crushed, will surely rise again.

F. H. DU VERNET, Archbishop of Caledonia.

Laminated Wood Factory To Start.

Much interest was taken Thursday in the full account of the proposed activities of the Skeena Laminated Wood Company which is to erect a factory on Devil's Island, 57 miles from here on the Skeena River. It will be so near this city that much benefit will accrue to Prince Rupert from its activities. While not the same as having a factory in the city it will be the next best thing. The feature of the news was that the work of construction would commence within a month and that the survey of the island and the plans for laying out the plant are already in hand. The managing director, Frank F. Bardell, has gone to Salvo accompanied by the surveyor and he announces that just as soon as the weather conditions permit, construction will commence.

"Eczema All Over Arms Suffered for 12 Years"

Mrs. Murray Hough, Warton, Ont., writes:

"I had eczema for twelve years. Every once in a while it would break out and spread all over my arms. I tried all kinds of treatments to relieve it, but without success. One Spring it broke out and nothing gave me relief, even the salve I got from the doctor did no good. At last I tried Dr. Chase's Ointment and it healed the eczema in a short time. That is over a year ago, and I have had no return of the trouble."

Dr. Chase's Ointment

60 cts. a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto

SMOKED FISH AT ITS BEST

There are just Two Rules to Follow to Enjoy the BEST Smoked Fish, AT ITS BEST.

These Rules are—

1—Buy "Rupert Brand." Rupert Brand is always delivered to the stores in clean new boxes clearly stamped "Rupert Brand."

2—Wrap in cooking paper, cook in moderate oven for 20 to 30 minutes, remove paper and serve at once.

Four Kinds—Breakfast Kippers, Bloaters, Smoked Black Cod and Kipped Salmon.

At all Fish and Meat Markets, and Grocers.
