#### Does Not Trust Soviet Delegates.

Apparently Premier Ramsay Macdonald does not trust the Russian Soviet emissaries. He fears that they have no code of honor which prevents them taking advantage of their position, to try to undermine the government with which they are negotiating. At any rate Macdonald does not want red propaganda) in Britain and is not going to have it from Russia if it can be prevented.

#### All Are Actors On Stage Of Life.

It is some time ago that William Shakespeare made one of his characters remark that we were all actors on the stage of life. Yet, much of Shakespeare's philosophy, is as true today as it was at the time when the words were spoken or written by him. We strut through the world, doing our little parts until swallowed up in oblivion and the world forgets in a very short time that most of us ever lived.

At the show last night a number of people acted parts to perts. the great amusement of the audience. Any day by keeping the eyes open people may be seen acting parts in just as humorous a way. After all, the theatrical play or the motion picture is an altempt to depict some phases of life and if this is done faithfully and well we say the performers are good actors.

#### Labor Winning In Many Countries.

Labor is winning elections in many countries, the latest being two of the states of Australia. There seems like a change in political lineup, but in reality it is not. It is more a change of name than anything else. Time was when the Liberals were away from home. the leaders in advanced thought and in every country there was a radical section of Liberalism which moved ahead of the party and dragged it forward. Today that advance section is represented by what is now designated labor but which always was made up of those who had to struggle for a livelihood. True, labor is making gains but so did Liberals always make gains). toward a more complete democraey. Sometimes what seems! like advances are really retrograde steps and it is only by experimenting that we can find out what politics are really workable.
