DAILY EDITION

Wednesday, Feb. 18, 1925.

Government Aid Against Swindlers.

Some Ontario farmers who have been duped by foreign oil stock peddlers are now howling to the government for aid to help get their money back. It is to be hoped that the government will let them stew in their own fat. Any people who send money to speculate in get-rich-quick schemes in the United States deserve to be stung. They cannot be protected against their own folly.

It is difficult to impress upon people that when they get more than eight per cent for their money they are taking risks and even that high rate of interest is not by any means gill edged. Government bonds run from four and a half to five per cent and every one per cent above that rate means just so much more risk.

When any person comes along and intimates that you may double your money or even make twenty per cent, you know that you are likely to lose the whole investment. You are taking grave chances.

Much of the foreign stock sold in Canada is not worth a cent a share. People who would buy that kind of stock deserve to be stung.

Always Are Lambs Ready To Be Fleeced.

There are always plenty of lambs ready to be fleeced. New crops are raised at regular intervals and the same that are shown once can usually be shown again at frequent intervals. The only way to keep them safe is to put them in the fold and lock them up. They seem born to be victims.

Even in Prince Rupert there are many people who put their money into one fake scheme after another and they never learn the lesson. They have the gambling spirit and want to get rich overnight. The result is disastrous. All that is needed is a clever stock seller and a romantic proposition far enough away to give it the proper atmosphere.

Straightening Out Many Difficulties.

One by one Prince Rupert's difficulties are being straightened out. The latest is the settlement of the site for the Burns abattoir. The project was delayed, it was claimed, by the delay of the railway company in giving its decision. Now the company announces that it has done its part. The site is granted and the trackage will be built and everything possible will be done to aid the project. It doubtless will be one of the new developments of the present season.

Western Earnings Better Than The East.

The western section of the Canadian National Railways comes close to paying its way, something which cannot be said of the far eastern section. Given a proper outlet from the Peace River district and doubtless the lines would at once begin to pay. With only a little over a million dollars to the bad in the year, it is to be supposed that the present season will see sufficient improvement to wipe out that small deficit.

Prince Rupert Should Soon Do Her Share.

Prince Rupert should soon do her share in the recuperation of the railway. If wheat begins to come rolling down along the Skeena and out to the Orient and the United Kingdom, and lumber, poles and ties are carried back to the prairies and other easterly points there should be an improvement. Fish shipments are likely to be even larger than ever this year and Alaskan business is showing signs of improving. Every prospect is toward better conditions for the railway, and the success of the railway is the success of the terminals.

for Cooking-use KLIM

ALWAYS keep a tin of Klim Brand Powdered Whole Milk handy. You will find it not only invaluable when the milk-man forgets to call; when an unexpected guest arrives, but also for all cooking purposes where rich, full-cream milk will improve your handiwork.

Klim comes in handy tight tins and is economical to use, because you only have to use a spoonful or two as the need arises.

Order a tin from your grocer today.

Rich Prospects in Babine Range Northward from Smithers Includes Cronin's Famous Babine Bonanza

(Third of Series of Articles on Mining in Bulkley Valley, based on Smithers Board of Trade Report)

For a number of years mining men have been prospecting in the Babine Range to the north of Smithers. From time to time good veins of ore have been discovered that look as if they would develop into rich mines and the result is that today there are some splendid prospects there in various stages of development. In 1924 a number of locations were made and during the summer a Dominion geological survey party under Dr. George Hanson worked in the vicinity and the report he made is awaited with much interest by the residents of the districts and mining men everywhere who know something about that part of the country. The best known property in the Babines is that located by James Cronin, the aged miner and prospector.

Babine-Bonanza

James Cronin's well-known Babine-Bonanza mine was idle throughout 1924. In October an inspection of the property was made by L. E. Drummond, mining engineer. A further inspection to have been made for Missouri interests in November was cut short by the illness and subsequent death of the engineer—G. W. McCaskell.

This is a silver-lead-zinc mine lying on the northeastern or Babine Lake slope of the mountains, reached by road from Telkwa, thirty miles away. It is owned by James Cronin of Spokane and others. Extensive and consistent development carried on during the past fifteen years by Mr. Cronin has proved a large body of high grade ore. Transportation difficulties are very considerable. It is probable that a concentrator will be put in to handle the ore at or near the mine, and this should stimulate development of near-by properties as well.

Debuture

The owners of the Debuture had a little work done in the summer of 1924 by a party under Henry Brelzins of Hazelton. This is a silver-lead property on the north-eastern slope of the Babine Range. It was purchased several years ago by Chicago interests. Although a large body of high grade ore has been shown up, the property is a long way from the railway and transportation difficulties are formidable.

Victoria

Patrick J. Higgins and partners have a six claim group near the Cronin mine called the Victoria. A contact ore body carrying high values in silver, lead and zinc has been opened up by a 45 foot shaft and a main tunnel. This latter runs for over 100 feet as a cross-cut and then for another 100 feet as a drift on the vein. Further work was added last season. This property bears every mark of being a likely mine, and should a concentrator be established at the Babine-Bonanza the transportation of ore will not be a difficult problem.

Silver King

Continuing from the Victoria over the summit of the Babine range and down to Driftwood Creek, Higgins and partners have also the Silver King group. This is reached by the road and trail from Smithers, up Driftwood Creek, a distance of twenty miles. Of different showings on the claims the most important would appear to be a quartz vein discovered in a canyon of Driftwood Creek. On either side of the creek a drift tunnel has been driven on this, that on the east side being more than 100 feet in length. In this ore has been found assaying across eighteen inches in width: Gold .22 oz., silver 168 oz., lead 10 per cent, copper 5.5 per cent. At forty feet lower elevation a cross-cut tunnel is being driven. Development was continued in 1924. In the past, disputes between owners did much to delay the opening up of this very promising prospect.

Harvey Group

Only twelve miles from Smithers and one mile from the Driftwood Creek wagon road is the Harvey group of five claims, owned by C. G. Harvey, W. J. Larkworthy and D. A. McRae. Two main showings have been developed by shafts 65 and 60 feet in depth. In both high grade ore has been discovered—values being in silver, copper and lead. Assays are said to show an average of \$50 to \$60 per ton across three to four feet of ore. Some years ago a twenty-five ton shipment, hand-sorted, was made and brought returns

of \$200 per ton, all values. In 1921 an Edmonton syndicate had the property under option and commenced a cross-cut tunnel to strike the vein at 250 feet in depth. Internal difficulties led to the breaking up of the syndicate and, coming to the end of their finances, the option was dropped with the work uncompleted. Since then the owners have been continuing the work in a small way. At the end of 1924, with Mr. Harvey in charge, the tunnel had reached 240 feet and was nearing the point where the vein is likely to be encountered. The work is continuing.

RAILWAY BALL WAS EXCELLENT

Over Four Hundred People Present at Big Event Last Night

One of the largest crowds that ever gathered in the auditorium for a dance was there last night at the annual ball of the Canadian National Railway employees. It was a success from the very beginning and when the home waltz was played between three and four o'clock there were more dancers on their feet than attend many of the ordinary events. Miss St. Cyr's six-piece orchestra played the newest things in dance tunes and W. H. Tobey as M.C. kept everything moving with proper decorum. The official patrons were F. G. Dawson, I. A. Macpherson, and J. H. Pillsbury, but there were also present Hon. T. D. Pattullo, minister of lands, Cy. Arnett of Vancouver, who is in charge of part of the operations in connection with elevator construction here; Mrs. Frank Little of Terrace and a number of others not usually seen at dances in Prince Rupert. The railway idea was well carried out in that at the farther end of the hall was to be seen Canadian National Engine 1925 with its headlight showing the way forward to a successful year while the orchestra platform was the observation car with its rear lights and other necessary accompaniments. The moonlight effect was produced also by a railway headlight, shaded just sufficient not to be dazzling, a great improvement on the flashing lights often used for this purpose.

Much of the credit for the success of the evening was due to the untiring work of the ladies' and men's committees under whose superintendence supper was served and the whole work of the evening carried out. Following were the members of the committees:

Hall decoration and orchestra: Messrs. Folsom; (chairman), Annesley, Campbell, Derry, Heferman, Teng and Horrobin.

Advertising, programs and invitations: Messrs. Beasley (chair-

DON'T LET YOUR BOWELS GET CONSTIPATED

A free motion of the bowels every day should be the rule of every one who aspires to perfect health, for once the bowels become constipated and clogged up, all the other organs of the body become deranged.

Keep Your Bowels Regular by Using

MILBURN'S LAXA-LIVER PILLS

They will clear away all the effete and poisonous matter which has collected in the system, give you a free, easy and natural motion of the bowels every day, start the sluggish liver working, and give tone and vitality to the whole intestinal tract.

Milburn's Laxa-Liver Pills are for sale at all druggists and dealers; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Dissolves completely

Makes a rich "soap-sudsy" solution, soaks dirt out—no more hard rubbing.

Rinses out thoroughly—leaves clothes white—no bits of soap left sticking to garments to turn yellow under the iron.

Rinso is the only soap you need on wash-day—it is perfect for soaking—for boiling—for washing-machines.
