## : New Fishing Company Cure Herring at Queen Charlotte Islands Now

Captain Pete Rorvik Heads Standard Fisheries which is being Incorporated for Summer Operation

A new fishing company is being formed here to be known as the "Standard Fisheries" to cure herring for the New York market. Incorporation papers are now being prepared with . Capt. Pete Rorvik as president.

The new company proposes to fish for herring in the summer months when the fish are fat and in good condition. They will operate mostly on the coast of Queen Charlotte Islands at Rennel Sound, Marble Island and Hippo Island and the fish will be taken with drift nets.

Capt. Rorvik has been investigating the possibilities of the business for some time. He recently visited Alaska and saw how the work was done there. Since that he has taken a quan-According to word brought by tity of herring in the neighborbeing made to operate the can- to Eastern firms handling that

developing the business.

They are very plump and are in we represent." states. The fish are there in trade and commence, was chosen abundance but this firm is the chairman. first to undertake the work of curing them for the market.

Since the whales have been killed off the herring do not run into the harbors like they did ful around the islands. The whales, it is supposed, drove them in.
