Whole Valley Inundating Many
Dwellings on the Huron River**

**Animals, carried along by current, floating on
various objects; 5,000 acres
under water**

DETROIT, April 14.—Scores of families in the Huron River Valley were driven from their homes early today when the Ford Motor Company's dam at Flat Rock burst, releasing millions of gallons of water, which spread practically over the whole valley in some places a mile wide. More than five thousand acres of land is reported to be under water, in some places twelve feet deep and the flood is rising steadily. Inhabitants of the valley were warned of the flood by the Michigan state police and as far as is known no lives were lost although many dwellings were inundated.

Sterling 4.76.
United States 1-16 premium.
Hong Kong 55.
German Reichmark 23.85.
French Franc 5.14.

**Liquor Enforcement to
Come Before Congress**

**Present U. S. Legislative Bodies more fully
under dry control than the ones that
just passed out**

WASHINGTON, April 14.—(By Canadian Press).—The liquor question will be up again in the new Congress, just as it has been in every Congress in the past for years. Indeed, it is quite clear that new legislation regarding enforcement of one sort and another will be demanded of Congress as long as the eighteenth amendment and the Volstead Act are in existence. Nor is there any sign that the amendment will be repealed or the Volstead Act and other dry laws will be done away with. What may happen in years to come is conjectural but it is an interesting fact that the Congress which has just come into power is more fully under control of the dry forces than the Congress which expired March 4.

Following an adjournment for luncheon President Lewis stated: "We are in the hands of the Premier and he has been authorized to make any statement he sees fit." The Premier said he did not think it advisable to make any statement.

**HIGH FREIGHTS
DEBAR EXPORT**

Pacific Ports Suffer, According to Statistician of Grain Commission
FORT WILLIAM, April 14.—The statistician to the Board of grain commissioners blames high freight rates by the Pacific route for the small deliveries of grain at Vancouver. This, combined with high prices for wheat, has had the effect of limiting the amount of grain shipped through Vancouver during the present season. Japan will probably need considerable quantities of wheat during the present season because the rice crop is reported below normal. This will be shipped through western ports.

**M. Briand Abandons Attempt
to Form a Cabinet for France
Because of Socialist Demands**

PARIS, April 14.—Stating that he considered conditions demanded by the Socialists in return for their support incompatible with his duties as Premier, M. Briand last evening informed the Socialist Republican group to which he belongs that he had decided to abandon the attempt to form a cabinet to succeed the Herriot ministry.
