

To keep your blankets soft, fluffy and unshrunken-wash them in Lux. Blankets of fine wool, wool nap, wool and cotton—you can trust them all to the gentle Lux suds.

Wash blankets this way:

A rich live suds is essential throughout the washing of blankets. To obtain this, use two tablespoonfuls of Lux to every gallon of water in the washing. Dissolve the Lux thoroughly in very hot water, whisking it into a thick suds. Add cold water until lukewarm. Put the blanket into the rich suds, souse it up and down, and squeeze the suds through the entire blanket. If suds die down, add more Lux, taking care that it dissolves before you put the blanket in again. Press the suds through the soiled spots if any; but never rub the blanket.

Rinse in three or more lukewarm waters, of the same temperature as the suds. Fold evenly, run through a loose wringer and hang dripping. Never wring tightly. . Pull gently into shape at intervals when drying. Do not expose wet blankets to extremes of heat or cold.

Ordinary common bar soap or chips shrink wool, and cearsen and yellow it. Lux is mild and pure, and entirely free from any ingredients that could harm or shrink wool fibres. Lux keeps your blankets like
