EXPERT WILL EXAMINE MINE

Dunwell to be Reported on After Thorough Investigation by Engineer

Professor J. M. Turnbull, mining engineer of Vancouver, is leaving for Stewart immediately for the purpose of making an examination of the Dunwell properties and to report upon them for a prospective buyer says the Victoria Colonist.

Prof. Turnbull was in the city yesterday and visited the offices of the Dunwell Mines for the purpose of getting detailed information with respect to the holdings of the company and also exact knowledge of the boundaries and other particulars of the various claims that are included in the group.

The visit of Prof. Turnbull to the North will entail work which is expected to occupy a month's time. His instructions call for the preparation of a complete report based upon full and careful examination and sampling on which his principals can arrive at a definite conclusion as to the values, including those revealed by the late developments.

The recent showings at the mine are pronounced by those who have had the opportunity of seeing samples that have been sent down to be among the most promising that have come out of the camp. The character of the ore is very similar to that found in the underground workings. This new showing is, moreover, about 1,500 feet from the old workings, so that the continuation of the ore body is thereby assured.

Yesterday it was decided that three of the directors of the Dunwell Company should proceed north, and in compliance with this R. M. Stewart and James Stewart left in the afternoon for Stewart. R. Smith will follow them on Wednesday.

"Yes – Rinso washes cottons so beautifully"

"See how spotlessly clean it made this dress! No rubbing or boiling either—just soaking in Rinso. Washday holds no more terrors for me!"

Soaking clothes in Rinso takes the place of the hard rubbing that used to wear you out. The Rinso suds are so rich in cleansing power that they loosen even ground-in dirt. Play clothes, collar bands and cuff edges now come clean with a sprinkle of dry Rinso and only a *light* rubbing between your fingers—after their Rinso bath.

Be sure to use enough Rinso to get lasting suds after the clothes have been put in. Then, thorough soaking in Rinso floats the dirt out.
