H. F. PULLEN, Managing Editor.

DAILY EDITION Thursday, Feb 19, 1925.

Labelling Salmon According To Demand.

It has been the custom with some canneries in the north to ship their product without labels and the purchaser placards it with any label that seems best to meet the demands of his business. The result is that the Japanese have invaded the market, sell their product to British firms who label it the same way that Skeena River or other British Columbia salmon formerly was labelled. Had the B.C. people all stuck out for their own labels and refused to sell to any who would change them, there would have been today no possibility of any other product taking its place.

The Prince Rupert brand and the Horseshoe brand and a few others are well known. They still hold their own but they are put into competition with salmon purporting to come from here but which really comes from the other side of the ocean, is packed by the cheapest possible labor and under conditions which are not supervised.

Lack of Cohesion On Part Of Allies.

The allied countries who fought side by side in the war have been having their differences since that time with the result that Germany is able to defy them. Today it is claimed that the Treaty of Versailles is being broken and that Germany is encouraging the martial spirit in her country. The allied nations have not even the backbone to secure proper information in regard to it. Each seems to be fearful of the other. The result is fatal. The war, which was fought to make the world safe, is failing in its effect.

Arms Conference Will Do No Harm.

The United States government has proposed another arms conference or at any rate informal conversations in regard to its possibility are being carried on. The conference can do no harm, even if it has no direct results. Every conference tends to get the nations better acquainted with each other, and knowledge is the first step toward the allaying of suspicion. Canada should welcome peace conferences and be ready to take part in them, as doubtless she will. The first important step is to get the powerful nations in line. At present Canada has no power except to provide a few soldiers in time of war. She has no navy and practically no defences.

Woman Is Needed To Care For Young Boys.

It seems as if the care of young boys has been left to men in a brotherhood orphanage in Quebec where charges of manslaughter and cruel treatment are alleged. Whether the charges be true or not remains to be proved, but they do not change the general principle that young boys need the care of a woman. It is only the natural aptitude of women to mother things that can make the lads really happy. Motherhood is part of the nature of a real woman and cannot be acquired. No man can possibly take the place of the woman in bringing up children. He may help, but only help. Gradually the boys wean themselves away from the mother and imitate the father but mother love is something that should be denied no child, orphan or otherwise. There are plenty of women in the world to do the work and they are the only ones who can do it properly.

Maritime Controversy Over Grain Shipment.

The people of the eastern maritime provinces are asking that the ports of St. John and Halifax be used for grain shipments in place of American ports. The Manitoba Free Press analyzes the situation and shows that much of the grain now shipped from St. John is American grain and not Canadian and the same applies to Montreal during the season.

As a matter of fact it is almost impossible to try to force trade out of its natural channel. Everything being equal Canadian ports should be given the advantage but to propose to tax either the grain grower or the people of Canada to force grain out through Halifax and St. John is hardly reasonable. We strongly sympathize with the people of the far Eastern ports in their struggle for business. We have our own struggle, but we must be thoroughly seized of the situation before we decide to take the stand that business must be forced to go in a certain direction. Our own fish business is a case in point. Efforts are continually being made to force the American fish to take the long haul through American ports but it is an unnatural thing to do and has little effect.

"Back was Very Painful I am now Well Again"

Mrs. Wm. Walker, Webbwood, Ont., writes:

"I was sick for several months with my stomach, I had pains in the back, and how I used to dread wash day, for my back would pain so that I couldn't lie down when night came. I also had gas on my stomach, and my appetite was so poor that sometimes I did not care whether I ate or not. The doctor gave me medicine, of which I took a number of bottles without benefit. At last I started to use Dr. Chase's Kidney-Liver Pills, and although I have only used three boxes, I am quite well again."

Duthie Interested Himself in One of Babine Mountain Mines and Did Tunnelling: Prospects

(Fourth of Series of Articles on Mining in Bulkley Valley, based on Smithers Board of Trade Report)

The Babine Range is a highly mineralized range of mountains running generally east and west from twenty to thirty miles north of the Canadian National Railway and about parallel with it. It extends for many miles and is more or less mineralized throughout its entire length. Describing further some of the mining prospects in that range within reach of Smithers the report recently prepared by L. S. McGill, secretary of the Smithers Board of Trade, says:

Hyland Basin

Over the divide from Driftwood Creek on the Babine Lake slope, is the Hyland Basin Group, owned by Martin Cain and Thomas King. This has a contact ore-body developed by open cuts and a thirty foot tunnel. There are very high values in gold, silver and lead. The main showing has eight feet of good milling ore, of which two feet is high grade, assaying \$300 per ton. J. F. Duthie took his property under option and had a crew of men start to drive a tunnel at a lower elevation to cross-cut the showings. But, hampered by adverse weather conditions, the distance from Smithers, and other difficulties, the progress made was slow. The work stopped for 1924 with the tunnel still 35 to 40 feet short of the place where the ore body should be reached. A trial shipment of a few tons of ore was made, giving returns of about \$300 per ton.

In 1924 King and Cain sold two other claims near the Hyland Basin Group to Edmonton interests for a cash consideration, unstated.

Little Joe

Another property of King and Cain in the Babine Range is the Little Joe, comprising five claims. A contact ore body, width up to twenty inches, has been developed by a drift tunnel 100 feet long. The chief value is in silver—a shipment to the smelter of selected ore gave returns of 600 ounces of silver per ton. This property was bonded in 1924 to J. Dunphy of Spokane. Although illness of Mr. Dunphy halted the driving of a projected cross-cut tunnel, he retains the option and intends to continue this development in 1925.

Iroquois Group

Pat McPhee, owner of the Iroquois Group, continued his development last summer. The workings are above timber line and about twenty miles from the railway at Smithers. A vein ranging from four to fifty inches in width has been opened up and good values found in copper and silver, the copper running to 25 per cent. McPhee has done a lot of work, having driven two main tunnels on the vein, beside open cuts and other surface workings.

Shamrock Group

James Carson has a good showing of high grade silver-copper ore on his Shamrock Group. Although extensive development of the property has not yet been carried out, the owner works at it each year, and he continued work this past season.

Social Group

A. P. McCabe has a copper property near the Iroquois known as the Social Group. This has not yet been opened up very much.

Rainbo Group

About sixteen miles from Smithers, and reached by the Driftwood Creek road and trail, is the Rainbo Group. This is owned by a syndicate of Smithers people headed by James Wright, who has done a lot of work on it during the past two years. On a vein about five feet wide some shoots of good silver-copper ore have been found, and there are several other veins on which work has been done as well. A trial shipment of ore in 1924 gave returns of \$5.00 in gold, 160 ounces in silver, and 28 per cent in copper.

Driftwood Group

The Driftwood Group, owned by a Smithers syndicate headed by E. R. Orchard, immediately adjoins the Rainbo. Two drift tunnels on the main showing have opened up a good quality of silver-copper ore. Lack of further funds for development resulted in no work being done last year.

Judges Group

Adjoining the Driftwood Group on the other side from the Rainbo is the Judges Group, owned by a third Smithers syndicate under Joseph S. Kelly. In 1924 work was carried on in a small way but the showings are not yet

opened up to any great extent. This and the last two groups should be consolidated into one property.

Other prospectors with claims in this part of the Babine Range having promising showings and who worked on their properties in 1924 include: Alex. S. Miller and associates on the Sunday Group, a silver-copper prospect with good values, Randolph Haigh, Dan Macdonald, A. T. Harner.

The Man in the Moon SAYS—

IF business is sick it is not for want of rest.

IN the old days they did things different from what they are done today. Adam and Eve were first offenders but they got a life sentence at hard labor.

A VANCOUVER man arrived, asked a Prince Rupert man if it always rained like this in this blankety blank town. Funeral tomorrow.

A MAN may talk about the fairy fingers of lady love, but wait until he has seen her handling hot dog at a picnic.

THE girls all like to play hide and shiek. It's so thrilling.

IF an era of prosperity comes to Prince Rupert, the Fordless will be able to ride and two more cylinders will be added to the lizzies now operated here.

ANOTHER fortress of the pessimists has been captured. The dredge is here.

THE first halibut boat brought in a fifteen pounder. The others will have to go some to beat that.

THERE seems to be general agreement that it is objectionable to have to go to bed at night and even more objectionable to get up in the morning. Possibly when the Reds take control these disabilities will be removed.

Ten Years Ago in Prince Rupert

February 19, 1915.

The Canadian Club, at its annual meeting last night, elected officers as follows: President, Bishop F. H. DuVernet; first vice-president, William Manson, M.P.P.; second vice-president, George R. Naden; secretary, C. T. Howard; treasurer, Rev. W. E. Collison; executive committee—Rev. Canon G. A. Rix, W. E. Williams, J. H. McMullin, O. H. Nelson, L. W. Patmore, H. F. McRae, J. C. Halsey and W. S. Fisher.

One of the merriest parties of young people ever assembled in Prince Rupert gathered at a splendid roller skating party in the Auditorium last night under the auspices of the Baptist Young People's Society. There were over seventy people in the party.

Mrs. Frank Ellis, who was a witness of the recent bombardment of Scarborough, England.

GOVERNMENT LIQUOR ACT. NOTICE OF APPLICATION FOR BEER LICENSE.

NOTICE is hereby given that on the 7th day of March next the undersigned intends to apply to the Liquor Control Board for a license in respect to premises being part of the building known as New Empress Hotel, situated at 728 Third Avenue, in the City of Prince Rupert, Province of British Columbia, upon the lands described as Lots thirteen (13) and fourteen (14), in Block two (2), Section one (1), City of Prince Rupert, according to a registered map or plan deposited in the Land Registry Office at the City of Prince Rupert and numbered 925, for the sale of beer by the glass or by the open bottle for consumption on the premises.

DATED at Prince Rupert, B.C., this 6th day of February, 1925.

MRS. ANNA M. ROSS, Manageress and Lessee of New Empress Hotel, Applicant.

Dissolves completely

Makes a rich "soap-sudsy" solution, soaks dirt out—no more hard rubbing.

Rinses out thoroughly—leaves clothes white—no bits of soap left sticking to garments to turn yellow under the iron.

Rinso is the only soap you need on wash-day—it is perfect for soaking—for boiling—for washing-machines.

BRITISH COLUMBIA

The Mineral Province of Western Canada TO END OF DECEMBER, 1925.

Has produced Minerals as follows: Placer Gold, \$76,962,203; Lode Gold, \$113,534,655; Silver, \$63,532,655; Lead, \$58,132,661; Copper, \$179,046,508; Zinc, \$27,904,756; Miscellaneous Minerals, \$1,408,257; Coal and Coke, \$250,968,113; Building Stone, Brick, Cement, etc., \$39,415,234; making its Mineral Production to the end of 1923 show an

Aggregate Value of \$810,722,782
Production for Year Ending Dec. 1923, \$41,304,320

The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any colony in the British Empire. Mineral locations are granted to discoverers for nominal fees. Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown Grants. Full information together with Mining Reports and Maps, may be obtained gratis by addressing—

THE HON. THE MINISTER OF MINES
Victoria, British Columbia.
