DAILY EDITION

Friday, April 24, 1925.

Killing Of Fish By Passing Seal Herds.

Just now the seal herds are passing up the coast and this is the time when the salmon are returning. They have not reached the rivers yet but quite likely they may be outside where the seals pass and may be devoured wholesale by the herds travelling toward Alaska. At any rate it is very clear that while passing our shores the seals consume many tons of fish annually, had been asked to destroy eagles, fish that would otherwise be eaught and will add to the prosperity of Prince Rupert. That is just one additional reason why the seal hunting should be thrown open after next year.

American Constitution And British Empire.

Dean Inge of St. Paul's Cathedral, London, England, usually known as the "gloomy dean" who is visiting Yale Univer-. sity where he is delivering a course of lectures to the students. says the two greatest achievements of history are the American formation supplied to officials were Willie Cloke, Tom Gray, Constitution and the British Empire. Doubtless he put the American Constitution first out of respect to the people with whom he is visiting.

The dean often says things that are a little startling land sometimes they are true. It would seem that he often says unconventional things just to set his hearers thinking. At any inished so that it was difficult rate he is the most spectacular of all the church dignitaries of to get a supply for the button highest marks, Mr. Ashton prethe establishment. Doubtless he will enjoy his visit at and the students also will enjoy it. His visit will help to cement the friendhip that already exists between that nation and the British people, including Canada.

One Senator Is At Last Awake.

One of the Canadian Senators at last has an original idea and is awake to the fact that he is something more than an "inmate" of the Canadian Old Men's Home. This time it is a man named Lynch Staunton, who proposes to reduce the representation in the House of Commons. Possibly this is a slap back at the proposed interference by the Commons in the constitution of the Senate.

It was hardly to be expected that the Senators would have had enough energy to fight back. They have never in the past animals or birds which it might shown any indications of activity except in trying to stop the wheels of progress from turning.

Lynch Staumton would have the basis of representation the sealing treaty and expressed a summer. The swallows archanged. At present Quebec always has 65 and naturally if the as his own opinion that there rived last week. rest of the country increases in population there will in time be was doubt "whether, the treaty a House of Commons as big and cumbersome as that of Great would be abrogated or not. He Britain. The big families of Quebec have so far been the fac- rather thought it would not. tor that saved the situation.

The difficulty with the scheme is that Quebec will hardly agree to reduction of her representation. While there may be NOT AT ALL PLEASED more members of Parliament at present than seem necessary. when you look at the size of the contituencies it is easy to see that they could not well be increased to any extent. Skeena, for example, takes in Queen Charlotte Islands, Portland Canal and Attin Mining districts south to beyond Ocean Falls and _ along the line of railway to somewhere around Endako. All that has to be looked after by one man. If the representation is . < to be reduced the size of that constituency must be increased. That would hardly be reasonable.

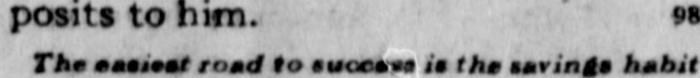

Direct Shipments

From This Port. The era of direct shipments from this port to the Orient miles from shore when the us we should just be natural and and to the United Kingdom and other parts of Europe seems to American authorities took her, yet when we act like hogs they be approaching. A few shipments have already been made but seamen of the steamer Quadra don't like it. still most products have to go by way of some other port.

Yesterday Francis Millerd drew attention to the advantage service of the Canadian-Mexican it would be to him to make direct shipments, something that Shipping Company they were em- worrying today to see how they doubtless will be done another year.

Tells Rotary Club of Present Condition of Industry and Danger of Hasty Policy

The value of the fisheries and the present favorable condition of the salmon market were mentioned yesterday by Major J. A. terday at their luncheon. After fered considerable loss but last year some of them were to retrieve those losses.

a poor sockeye year was anticiwas going to happen. They may | co., Limited, Toronto, Ont. be all mistaken. The difficulty in making prophecies was that pride of how sailors of the the fish while they were at sea employers who gave them full from the time when they left the pay and a shore-living allowance river until they returned. If all while they were detained in San the fish were four-year fish it Francisco. some of them live five years. SCOUTS PRESENTED There was always a demand for sockeye but with other varieties it was different.

With the demand for salmon Anyox Boys Examined by Dr. increased, intensified patrol was desirable. Every salmon which was not personally escorted by a fishery officer would be out of luck this year.

Enemies of Fish

Speaking of the enemies salmon, Mr. Motherwell said they were constantly trying to improve the spawning beds and also remove obstructions from the streams. At the sessions of the fisheries commission they bear gulls, dolly varden trout. ducks and other creatures which it as alleged killed off the salmon. They had killed off quantities of sea tions. Last year 2 .-700 were killed and people preciating the results.
