WESTERN GRAIN RATES ARE DISCUSSED

GENERAL MULCAHEY MOBBED BY NEW YORK REPUBLICANS ON HIS ARRIVAL

Value to West of New Export Grain Rates is Discussed in Toronto

Financial Post points out advantage to Alberta farmers and to ports on Pacific Ocean including Prince Rupert

The lower grain rates, which promise so much for Prince Rupert and Vancouver and will tend to improve conditions throughout the whole of British Columbia, are being opposed chiefly by the Canadian Pacific Railway and by the cities of Montreal, Winnipeg and Fort William. Other centres like Calgary which are G.P.R. towns are not very enthusiastic over the new order of things.

The objection of the G.P.R. is that its western outlet is not as easy as the western outlet of the Canadian National. The Kicking Horse Pass through which the railway crosses the mountains, is high and rugged compared with the Yellowhead.

While the Canadian National to Prince Rupert or to Vancouver is practically a water grade all the way and grain can be hauled over it with the same power used on the prairie or coast divisions.

The recent order of the railway board favors Prince Rupert and Vancouver as against Winnipeg, Fort William and Montreal. It favors the Canadian National as against the G.P.R. and it will tend to bring greater prosperity to the farmers on the prairies and to the commerce of the Pacific coast ports.

Toronto is not very much affected by the change and so the people of that city are apt to see the situation from an unbiased point of view. The Financial Post of that city says:

Financialist's View

Although there is uncertainty for the time being as to whether the minority order affecting Western grain rates issued by authority of the Railway Board will continue or be rescinded, the ruling opens up important and interesting possibilities. It can readily be understood that the effect of a lowering of the rate on wheat and wheat products from prairie points through the Rocky mountains to the Pacific coast, on a basis of the rate on similar shipments to the Atlantic seaboard, and the ignoring of the higher cost on the mountain haul, will have the effect of materially extending the prairie area from which grain and manufactures thereof can be successfully sent to world markets via British Columbia ports and the Panama Canal. This area even before this change in the rates had been extended as far east as Moose Jaw, Saskatchewan, for the shipment of important commodities for European markets.

The new order has been received with acclaim in British Victoria and throughout Alberta and a portion of Saskatchewan. On the other hand, it is regarded at Winnipeg and the head of the lakes as detrimental to the interests of the established grain and shipping facilities and institutions. The railways will undoubtedly suffer reduction in revenue not only because of the actual cut in rates involved but because of the increased amount of tonnage which will consequently be moved over the shorter haul.

Premier Oliver Criticizes Meighen for Being Against New Western Freight Rates

VICTORIA, Sept. 18.—Premier Oliver criticizes Hon. Arthur Meighen who is reported to have said in Halifax Monday that the freight rates secured in the West on grain were "utterly indefensible." Oliver says: "If the Conservative leader and his following believed that recent legislation was discriminatory in its effect, why did they not seek to amend the legislation during the course of its passage through parliament? I think Mr. Meighen is simply trying to square himself with the Montreal Board of Trade and the C.P.R. in the application for the rescinding of the rates reduction."
