The Camera of the year

No. 1A Pocket Kodak

Series II

(Focusing Model)

Equipped with Diomatic Shutter and Kodak Anastigmat lens f.7.7.

\$26.90

By a simple lever mechanism, the front snaps instantly into picture position-ready for business. This Kodak is equipped with the Kodak Anastigmat lens f.7.7 and Diomatic shutter, four speeds, 1/10 to 1/100 second.

There's a sliding, timing scale to fit the exposure to the light. A finger-tip turn of the lens mount sets the focus.

This superior lens and shutter combination means better timed, sharper negatives-the evidence is plain in the prints.
