At a meeting of the Grain Board held last night in the City Hall, M.P. McCaffery, chairman, presiding, it was ascertained that negotiations, which had been pending for the past three weeks, between the federal government and the Canadian Co-operative Wheat Producers Ltd., Calgary, for the leasing of the local elevator to the latter concern, and which to date had been of a confidential nature, had finally fallen through when a wire to that effect was read from Fred Stork, M.P., at Ottawa, who had been conducting the negotiations on behalf of the Grain Board.

Salmon Traps Prohibited in Some Waters and Restricted in Others  
50 PER CENT MUST PASS.

WASHINGTON, Dec. 8.—New regulations governing salmon fishing off the coast of Alaska during 1926 were approved today by Secretary Hoover. These prohibit the use of traps and purse seines in certain waters including Lynn Canal, Icy Straits and Leross Sound districts. Gill net fishing is permitted with certain restrictions, acting under provisions which require fishing to be limited to a degree allowing at least fifty per cent of the salmon returning from the ocean to reach the spawning grounds of the rivers.

Secretary Hoover requests that at least a mile be left between traps in Alaskan waters south of 58 degrees north latitude.

#### ELEVATOR TO BE KEPT BUSY

Superintendent Heatherington Says Government Will be Active in Getting Grain Cargoes LOCAL MEN EMPLOYED

That the federal government will take as active an interest in the securing of business for the new terminal grain elevator here as it has taken in having the facility erected was the statement made this afternoon to a representative of the Daily News by R. Heatherington of Fort William, general manager of government elevators.

Mr. Heatherington was desirous of correcting an impression which he had been told existed here that the responsibility of the government ended with the building of the elevator. He pointed out that the government spends several thousands of dollars annually in advertising its elevators and is at all times in touch with the trade.

"The first thing we had to do," said Mr. Heatherington, "was to get the elevator at Prince Rupert. Now things are in a position where we can approach the trade and you may be interested to know that I am leaving here (continued on page 6)

#### Liberals Win in Bagot but with Majority Less than Former Member

ACTONVALE, Dec. 8.—A supporter of the Mackenzie King Government has been elected in Bagot. G. D. Morin, Liberal, was the choice of the electors yesterday in the by-election in the federal riding by a majority of 473 over Hon. Andre Fautoux, Conservative.

The majority of the Liberal candidate was not as large as at the general election when the late J. E. Marvile was elected by a majority of 774. Marvile was personally very popular and he was ill in bed at the time he was elected.

It is suggested here that now Premier Mackenzie King is assured of a working majority in the House of Commons, he may not wait for the assembling of Parliament before securing a seat in the House. Had the government been beaten in Bagot it would have indicated that carrying on would be impossible for any length of time but now the expectation is that the government may remain in power indefinitely unless it gets a setback in the re-election of the new ministers.

Both vessels are now awaiting the arrival of the steamer West Holbrook, bound to Portland from Japan. The Holbrook will attempt to tow the West Orawa with the Admiral Dewey secured to the stern of the latter to serve as a rudder.
