Negotiations Between Owners and Workers Continue; Twenty Thousand Miners Quit Working

LONDON July 30.—Chances for averting the threatened British coal strike appeared to be decreased today. SPECULATION ON ELECTION

Ottawa Believes that Federal Cabinet is Now Awaiting Result in New Brunswick

OTTAWA, July 30.—It is now stated here on good authority that there will be no more meetings of the cabinet until after the New Brunswick provincial election which is to take place on August 10. In that case it is improbable that any announcement will be made for at least a couple of weeks regarding the holding of an election this autumn. It is taken for granted that the government is awaiting the New Brunswick result before deciding whether or not to go before the country this year. For the present, it is apparent that the question of holding an election before the snow flies remains unchanged.

NAVY PROGRAM IS APPROVED

Laborites Fail in British House to Get a Reduction in Warships

LONDON, July 30.—The House of Commons last night put its stamp of approval on the government's cruiser building program. This was done after the Liberals and Laborites had sought to have the appropriation for the new warships reduced on the ground that there was no naval war in sight and, therefore, it was needless to burden an already heavily taxed country with an additional expenditure of £58,000,000.

Ramsay MacDonald, former premier, moved for a reduction in the shipbuilding vote but the House rejected the proposal by a vote of 276 to 140.

Scott says that his invention is capable of destroying all life on sea land or air within a radius of twenty miles and can disable all radios in a similar radius. He claims that the invention burned holes in two-inch steel plates at a distance of three to seven miles and that dummy airplanes were destroyed in air tests.
