When The Babies Are Cutting Teeth

THE MOTHER SHOULD USE

Dr FOWLER'S
EXT-OF
WILD
STRAWBERRY

During baby's teething time, the bowels become loose and diarrhœa, dysentery, colic, cramps, etc., manifest themselves; the gums become swollen, and cankers form in the mouth.

This is the time when the mother should use "Dr. Fowler's," and, perhaps, save the baby's life.

BATTLED WITH RIVER TORRENT

Mount Logan Climbers at Cordova Tell of Narrow Escape on Chitina River

CORDOVA, July 21.—On their way home after having reached the summit of Mount Logan, 19,850 feet, in the Yukon Territory, four members of the expedition of eight led by Capt. A. H. McCarty of Windermere, B.C., arrived here Sunday night leaving for the south today. With Capt. McCarthy are Col. W. W. Foster of Vancouver, Alan Carpe of New York and H. F. Lambert of Ottawa.

They told of a narrow escape in the waters of the Chitina River when the raft, on which they had embarked, turned over in the eddy at the mouth of a tributary river. The men battled in the swift current for hours in an attempt to beach the raft on a sandbar but the dunnage tied underneath interfered. In the struggle, most of their food, cooking utensils and their camera was swept away and the films were watersoaked. Finally, they managed to right the raft, pushed across the deepest channel, waded a second channel and then managed to get ashore seventy miles down the river from where the raft turned turtle. From then on, their food consisted of sardines and potatoes — all the provisions that were left.
