LIOW do YOU feel about the development of your own I great West? Whatever your political affiliations, you are bound to admit that 1921 marked a turning point in western progress. Today the world has its eyes on British Columbia—this is the route to the markets of the globe, whether on the Atlantic or Pacific.

You have heard of the diversion of the agricultural products of the prairies over the western route, of the great increase in the annual crop, of elevators raising their huge bins in the great port of Vancouver, of ships from every nation in the world draining their yellow gold.

There has been an industrial development that few can credit. No one can say that this development is not actually due to the Liberal government policy of equalization of freight rates.

From no lesser person than C. W. Beatty, president of the C.P.R., we hear that business activity is greater in Vancouver than any other city in the Dominion.

Do you want the west still to prosper? Are you in favor of

progress or reaction? Premier King has declared himself. He says, throughout Canada, that trade is moving to the Pacific: He believes in the policy of equalization—he is for the west -not because he is prejudiced, but because he realizes that the very future of the Dominion hedges on National Unity and equality for every section of

King has a policy for populating the open spaces; it is the standardization and equalization of freight rates—a tariff that has due regard to the present stage of the country's development, that is light on the implements of production, raw materials for our basic industries, the necessaries of life and commodities from the nations in the British Commonwealth.

Prosperity!

For the first time

since 1913, the Liberal

Government announces

a surplus in the coun-

try's budget—a surplus

of \$4,816,000. This in

spite of a reduced taxa-

tion, in spite of the fact

that the country under

Meighen's leadership

spent \$464,000,000 in

1921, while in 1925

\$350,000,000 was spent

by Mackenzie King.

For every four dollars

spent by the Conserva-

tives, the Liberals spent

three!
