PROGRESS OF RUPERT SHOWN BY TELEPHONE AND POWER INCREASES

Scenes of Terror When Residents Fled before Fire in Montreal City

MONTREAL, Aug. 25.—Sixty-one families were driven from their homes when an apartment house, twenty dwellings and an ice house and stable were destroyed by fire which swept a portion of the east end of the city last night. Aided by a strong wind the blaze quickly consumed the structures and in a short while completely destroyed the apartment house. It was one of the most disastrous fires in the city in many years.

Scenes of terror and confusion were witnessed as scores of residents fled from the flames while many others had to be carried from their homes.

The damage is officially estimated at half a million dollars.

Plaintiff in Breach of Promise Against John The Finn Gets Even Break

VANCOUVER, Aug. 25.—Maude Munn is expected to break even in the expenses of the breach of promise suit against John Haathi (John the Finn), the Portland Canal miner, as a result of a judgment handed down by Mr. Justice Morrison, who awarded the costs of the trial and succeeding amendments to the original action to John the Finn and the costs of the action following the amendments to Miss Munn. It is estimated that Miss Munn's judgment for expenses will about equal Haathi's expenditures resulting from the "heart balm" case.

SURF INLET MINE PAYING

Profits Larger Than Ever Because no Development Being Done There

MAY LOCATE NEAR HERE

The mine at Surf Inlet is still being operated satisfactorily and profitably and the indications are that it will continue in this manner for several months yet announced Clyde A. Heller, president of the Belmont-Surf Inlet Gold Mining Co. Ltd., who was in the city today. Mr. Heller states that the profits from the mine are even greater now than they have been because little is being spent on development work.

Mr. Heller reiterated the statement that he made last year to the effect that the end seemed to be in sight at Surf Inlet. He declined, however, to predict when operations would cease there and expressed the belief that work would continue for some time. "One can never say when a mine is going to play out," he said, "and in the meantime it is being operated very satisfactorily and profitably." Mr. Heller admitted, however, that the company had been looking for some time for a suitable place in this district to which to move its present plant and organization at Surf Inlet. Nothing of a definite nature, however, had yet been decided upon, he said.

Mr. Heller returned to the city last night on the company launch Belmont after having spent several days visiting the Portland Canal region. Accompanying him on this trip was Charles G. Myers of Philadelphia, head of the Clinton Brush Co., one of the oldest concerns of its kind in the States, and Surf Inlet stockholder; F. H. Penn, manager at Surf Inlet, and Mrs. Penn.

Mr. Heller and Mr. Myers left for Philadelphia on this morning's train.

Increase in Population and Industry Indicated by Phone, Light, Power

A steady increase in the population and industry of the city is reflected in the number of telephones now in use here and the number of electric light accounts being handled by the municipal utilities department. This summer has seen no reduction in the number of phones and light accounts as has been the case during the vacation season in past years. Instead there has been a substantial increase in both.

Telephones in use in the city today number 1,450 as against 1,320 at this time in 1924.

The utilities department reports that the power plant at Shawatlans is now carrying a steady load every day of from 1,100 to 1,300 kilowatts, whereas the average load last year was 500 kilowatts. The reason for this substantial increase in power consumption is due to the sawmill, elevator construction, Swift's cold storage plant, Somerville cannery and other smaller plants as well as a greatly increased number of accounts in private homes.

Conservative Leader Replies to Premier Mackenzie King on Question of Holding Election

OTTAWA, Aug. 25.—"The usual and accepted term for Parliaments in Canada has been four regular sessions. These four sessions are complete and what the country wants to know is, has this government the courage to go to the people or not?" So states Hon. Arthur Meighen, Conservative leader, in a statement to the Canadian Press, replying to Premier King's recent declaration that the government was not to be stampeded into any dissolution of parliament.

The time for an appeal to the people came not while the session was on but after the session's work was done. The time is now, declares Mr. Meighen, in his statement.

Commenting on the Premier's declaration that members of the government had been exceedingly busy, the Conservative leader inquires what they have been doing. He states in this regard that immigration is diminishing while the exodus of citizens from the country continues. "Is another Petersen contract coming?" asked Meighen.

OTTAWA, Aug. 25.—A political pronouncement of prime importance in and a statement as to the Government's intention in regard to the dissolution of Parliament will probably be given by Premier King when he addresses his constituents in North York on Saturday, September 5.

The probabilities are still in favor of an election this fall.

CANNERIES ARE NOW CLOSING

Balmoral, Sunnyside and Inverness Will Continue to Pack Fall Varieties

With the closing of sockeye fishing last Friday night, most of the canneries on the Skeena River ceased packing operations for this year. It is expected that the Balmoral, Sunnyside and Inverness will continue to pack fall varieties and as a result, Cohoes are still running in good quantities while pinks are about through.

Salmon fishermen this season, it is admitted, have not done very well and the outlook for the winter is not encouraging. White fishermen especially will have to find further employment in order to tide them over the winter.

Queen Charlotte Island canneries and some in Rivers Inlet and the central division will continue packing fall varieties.
