SILVER SLIPPER MINING COMPANY, LIMITED.

NOTICE IS HEREBY GIVEN that the Resident Engineer, No. 1—Northwestern Mineral survey District, British Columbia, upon receiving notice of an advertised and solicited sale of shares in a certain Company, viz., the Silver Slipper Mining Company, Limited, upon statement or terms not in accordance with the actual facts and conditions has notified the undersigned, the Minister of Mines, who upon investigation and in pursuance of section 16 of the "Mineral Survey and Development Act," Chapter 160, R.S. B.C., 1924, finds it necessary to prevent injury to investors to give the following notice:

That the said Resident Engineer, under date of 4th August, 1925, has submitted to the Minister of Mines a detailed report and comment on statements contained in a prospectus issued by the aforementioned Company and composed in terms which solicit the sale of shares in the said Silver Slipper Mining Company, Limited.

A leading paragraph of the said prospectus reads:

(1) "All of the above mineral claims are situated on the Silverado Mountain and between the Porter-Idaho property and Silverado Group. . . . . "

The said Resident Engineer's comment on foregoing follows:

"This property lies South of the Silver with the Silver Bell group between, the Porter-Idaho is on the other side the mountain, therefore the property s not lie between these two properties, his statement is misleading in that it ers that the property is on the same neral as either or both of the other er known properties."

The said prospectus sets out further:

2. "The values from this vein (No. are up to $20.00 per ton in silver, d, and copper, the gangue is a quartz, ore is a good fluxing quality. . . . . "

The said Resident Engineer's comment the foregoing follows:

"This vein is up to ten (10) feet wide barren, white, buil-quartz. I could nothing in it worth sampling and re is absolutely no mineralization in quartz itself, the only sign of mineral ing a slight deposition of chalcopyrite ng an oxidized seam in the quartz. ently where "John the Finn" managed get out enough for a sample which ayed up to $29.00 in silver, gold and per. I consider this vein worthless."

The said prospectus further reads:

3. "No. 2 vein is a high grade vein, ing from fourteen to twenty-four (14 to 24 inches), striking twenty ees west of north and dipping at ty to forty-five degrees south west; es are up to Eighty-Five Dollars $85.00 per ton, and the vein is exposed three hundred feet (300 ft.), the cipal minerals being gold, silver, and

The said Resident Engineer's comment the foregoing follows:

"This vein will average about 6 inches width along an exposed length of pro fifty feet from which a general ple was taken giving assays of $0 e gold, and 63 cents silver, or a total 63 cents per ton. Small specimens ld probably be obtained that would $85.00 per ton, but the amount of re is negligible."

The said prospectus also sets out the lowing:

4. "Considering the accessibility of silver Shoe group, the strength of the wn veins, and their values, the pro ty is one of exceptional merit. With mall amount of development work, such drifting on No. 2 vein, ore could be ped in paying quantities two months after the commencement of operations. one (1) vein will undoubtedly be the producer of this property as it is icipated the values in gold and silver will increase considerably as depth is ined."

The said Resident Engineer's comment the foregoing follows:

"It will be seen from the foregoing ments that the property, instead of ng one of 'exceptional merit' has no it."

The said Resident Engineer concludes making the following general observations:

"It has been announced by 'John the to the advertisers of this stock that w high grade vein has been discovered the property that is of great import- I have not seen the width of s given this vein in the press. The work done on it consisted of scrap the wash gravel off it where it shows small creek and picking out enough a prospector's pick for a sample. I d if only a few inches in width and mple of several pieces of it assayed 0 in gold, and $4.83 in silver, per

There is another small vein higher up showing on vein No. 2 and the new overy are at 4,500 feet elevation, h I did not get to, but a piece of ore ified by the owner as the best from vein, assayed 21 cents per ton in and silver."

Further comment as to the 'exceptional merit' of this property is, I think, essary."

MINISTER OF MINES.

WATER NOTICE.

KE NOTICE that Monty H. Moore, for the Engineer Gold Mines Ltd., e address is Engineer Mines, Atlin, will apply for a license to take and 50 cubic feet per second of water of Wann River which flows westerly drains into Tagish Lake about two one-half miles south of the Engineer The water will be diverted from stream at a point about two miles the terminus of the said river into sh Lake and will be used for hydro ric power purposes upon the Engineer whose holdings are described as Crown Granted Mineral Claims, ved as Lots Nos. 19, 20, 166, 207, 209, 967, 968, 970, 972 and 1264, Group Cassiar District. This notice was ed on the ground on the 21st day of 1925. A copy of this notice and ication pursuant thereto and to the r Act, 1914, will be filed in the office the Water Recorder at Atlin, B.C. Obions may be filed with the said Water rder or with the Comptroller of Water ts, Parliament Buildings, Victoria, within thirty days after the appear of this notice in a local newspaper. date of the first publication of this e is the 24th day of August, 1925.

NEW LIBRARIAN IS APPOINTED

Miss Alice D. Cruikshank of Vancouver Public Library Gets Position

The Prince Rupert public library board last night appointed Miss Alice D. Cruikshank, B.A., assistant at the Vancouver public library, at present in charge of the cataloguing department, to have charge of the Prince Rupert library. She will take charge of the work commencing on October 1, when Miss Violet Mortimer, the present librarian, vacates to take up more important work.

Miss Cruikshank is a graduate of Smith College and took her library training in the New York State Library School. She has had a good deal of experience, having been in the Edmonton public library for four years, in the library of the State University of Columbus for seven years, in the public library at Hamilton for 14 months, and for the past few months at Vancouver. She is highly recommended by the librarian at Vancouver, who expresses regret at losing her.

Other applicants for the position here were:

Hayden F. Morris, Edmonton.
Miss Jean Mackay, city.
Miss Mary Hamilton, Vancouver.
Miss Marguerite Jolley, Barnet.
Francis A. R. Dobbin, Vancouver.
Miss Edith Cunliffe, New Westminster.
Mrs. Josephine Peters, Vancouver.
Miss Grace Nicholson, Vancouver.
Mrs. Edith Brewerton, city.
Miss Dorothy MacNeill, Lorne Creek.
Percy C. Miller, city.
Miss Sarah C. Rouleau, Kalso.

BARITE GOLD MINES LIMITED. N. P. L.

NOTICE IS HEREBY GIVEN that the Resident Engineer No. 1, Northwestern Mineral Survey District, British Columbia, upon receiving notice of an advertised and solicited sale of shares in a certain Company, viz., the Barite Gold Mines, Limited, N.P.L., upon statements or terms not in accordance with the actual facts and conditions has notified the undersigned, the Minister of Mines, who upon investigation, and in pursuance of Section 16 of the "Mineral survey and Development Act," Chapter 160, R.S.B.C., 1924, finds it necessary to prevent injury to investors to give the following notice:

That the said Resident Engineer, under date 14th August, 1925, has submitted to the Minister of Mines a detailed report and comment on statements contained in a prospectus issued by the aforementioned Company and composed in terms which solicit the sale of shares in the said Barite Gold Mines, Limited, N.P.L.

That a leading paragraph of said prospectus reads:

(1) "There are three distinct ore veins on the property, the centre vein ranging from six to twelve feet in width and traceable on the surface for a distance of about fourteen hundred feet; the additional two parallel veins are quite similar in size as the main or centre vein and are traceable on the surface for a distance of approximately one thousand feet."

The said Resident Engineer's comment on the foregoing follows:

"There is, on the top of the mountain at 5,000 feet elevation, a width up to 30 feet in which occur small lenses of barite running in all directions. They are not 'ore veins' for I was unable to find any mineral in any of them, except one which I will mention later, about a distance of 400 to 500 feet in which they crop on the surface. A wide open cut, 6 feet wide by 6 feet high at the face, driven in at the base of the ridge in which these gash veins occur shows a flat vein of barite lying on the surface, about a foot thick and another vertical vein about a foot wide down the face, in neither of which could I find any trace of mineral."

The said prospectus sets out further:

(2) "The ore consists of fine grained galena, carrying values in gold, silver and lead. . . . . An assay made by the Government Assay Office at Victoria, B.C., of surface rock, shows: Gold, trace; silver, 49 ozs. per ton."

The said Resident Engineer's comment on the foregoing follows:

"The only mineral showing that I could find on the property is a vein about 14 inches wide, on which a hole had been driven about two feet deep and possibly three feet long, disclosing about two inches of galena on each wall from which a sample was taken assaying gold, trace; silver 13 ozs. per ton; lead 29 per cent; a total of $55.50 per ton with silver at 70 cents per ounce and lead at eight cents per pound. This showing occurs in the centre of the barite belt, but four inches of ore in a 14 inch vein at this elevation and location is absolutely valueless."

The said prospectus also contains the subjoined paragraph:

(3) "Owing to the favorable topography of these claims, tunnels can, in every case be driven in on the veins, thus the working will be in ore from the start, which will prove most economical and be conducive to early shipments of ore to the smelter."

The said Resident Engineer's comment on the foregoing follows:

"There is at present no ore to ship, nor so far as I can see, any chance of getting ore to ship to the smelter."

MINISTER OF MINES.

LAND ACT.

Notice of Intention to Apply to Lease Land

In Prince Rupert Land Recording District of Prince Rupert, and situate on the northwest coast of British Columbia, Portland Canal, and being at Spit Point, Portland Canal, and bearing north magnetic from Tree Point, Pearse Island.

TAKE NOTICE that Anglo-British Columbia Packing Company Limited, of Vancouver, B.C., occupation Packers, intends to apply for a lease of the following described lands:—

Commencing at a post planted at high water mark at Spit Point, Portland Canal; thence southeasterly along high water mark for forty-eight hundred feet to a post marked No. 3.S.E.; thence southerly 10 chains, more or less, to low water mark; thence northwesterly along low water mark forty-eight hundred feet, more or less; thence northerly 10 chains, more or less, to point of commencement, and containing 75 acres, more or less.

WHEAT POOL AND FARMERS

Writer Thinks it has Been of Advantage Although Price Only About $1.65 a Bushel

(By G. F. Bannerman for Canadian Press)

WINNIPEG, Sept. 2.—Estimates as to the amount of the final payment to be made by the Wheat Pool on account of the 1924 crop are varied but tend to centre around an additional ten cents per bushel on No. 1. All estimates are of course purely speculative since the officials of the pool show a great aptitude for keeping the business of the pool to themselves. If, however, an additional ten cents should happen to be a correct estimate, it will bring the price obtained by the pool up to $1.65, and will represent the estimated economic value of 1924 wheat as apart from fluctuating exchange and market values.

While undoubtedly here and there it is possible to find members of the Wheat Pool who, remembering that 1924 wheat was quoted at over two dollars on the Winnipeg Grain Exchange, will not be satisfied with the price secured by the pool. It is also true that the majority of pool members are well satisfied with the result to date. It is interesting to note that the attitude generally among the members whom it has been possible to meet is that the duty of the pool is not to gamble for the highest price quoted on the Exchange, but to market the wheat in such a manner as to ensure stable conditions and to return a reasonable profit over the cost of production insofar as world conditions will allow.

Interim Payments

It is the concensus of opinion throughout the three prairie provinces that whatever other benefits the Wheat Pool may have got its members its greatest benefit has been the system of interim payments. By this system the farmer has had his returns from his wheat crop spread out over the crop year and in the case of the payment recently made finds in the majority of cases that he has cash on hand with which to purchase his twine and other requisites for this year's harvest.

The fact that the farmer thus has the cash for his necessary purchases means that he is not put to the expense of borrowing from the banks in order to harvest his crop, and the full advantage of this last payment will be felt when he finds out that, instead of having to pay out seven or eight per cent for borrowed money he has that additional purchasing power from his 1925 crop with which to reduce his outstanding debt.

LIBRARIAN ASKING BOOKS BE RETURNED

Regular Meeting of Board Last Night Heard Reports on Work of Month

At the meeting of the library board last night with all the members present, the librarian reported that during the month there had been 2283 books loaned, an average of 87.8 a day. During that time there had been 36 new registrations and 19 had cancelled, leaving at the present 1929 cards out.

A few new books had gone on the shelves, five by gift and 22 by purchase, while five books had been cancelled. The total number of books now numbers 4,445.

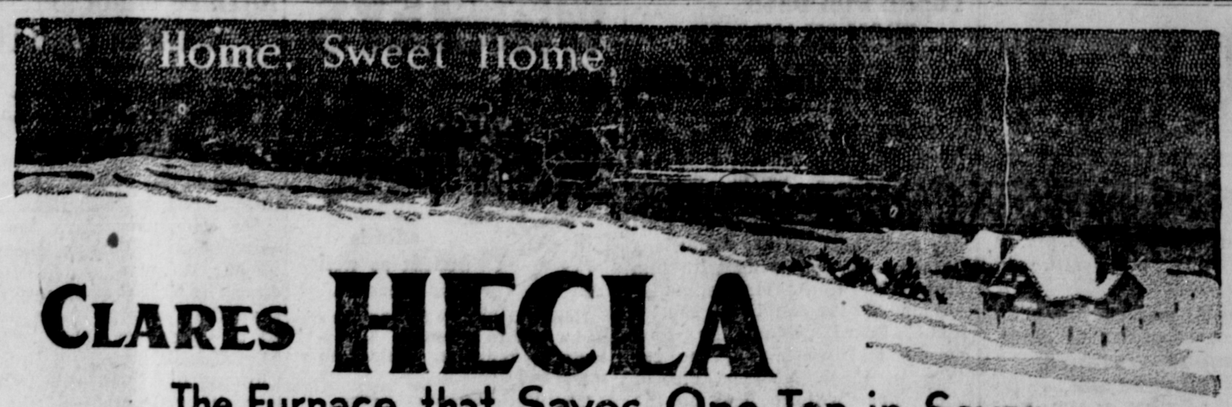

The librarian asked that those who had not yet returned books since the summer vacation do so at once. Miss Mortimer is leaving at the end of the month and is anxious to have everything in good order before her successor takes charge.

The book committee reported that they were placing a small order for 17 new books, largely children's books.

DR. R. E. EYOLFSSON MARRIED YESTERDAY

A wedding of considerable local interest took place yesterday at Lundar, Manitoba, when Dr. R. E. Eyolfsson of this city and Miss Lina Magnuson were united in marriage.

The newly wedded couple plan on spending a few days visiting with relatives in North Dakota before returning to the city.

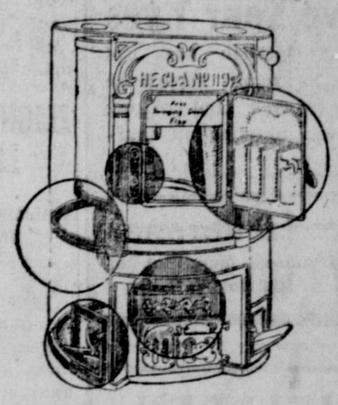

CLARES HECLA

The Furnace that Saves One Ton in Seven

The ease with which the home can be kept warm during the winter, when the Hecla is used, has endeared it to thousands of women who have to look after the furnace while the man of the house is out at work. It requires one-seventh less coal and therefore less shovelling. It is easily cleaned and correctly trimmed without waste of live coals by the independent action of its individual, triangular grate bars. Perfect heating can be maintained with the least amount of coal, with a minimum of labor, and no fuss or muss.

Its steel ribbed fire pot gathers all the heat from the coal and delivers fresh and pure air to the rooms, its fused joints preventing leakage of gas and dust. The heat is properly humidified by its circular water pan.

The Hecla will make your house a home—of comfort, peace, health and contentment during the long, arduous winter. No other furnace at any price will give you as long and satisfactory service—or save you as much trouble and money as the Hecla. Our dealer in your neighborhood will tell you the whole interesting story. If you cannot locate him, mail the attached coupon.

RUM RUNNING SWEDEN LESSENS

Immense Quantities of Liquor Was Confiscated Last Year, But Much Less This

GOTHENBURG, Sweden, Sept. 1—Sweden's rum-running problems are rapidly decreasing, says Count Posse, head of the coast guard service. In previous years there usually were a dozen vessels in rum row on the west coast, while now there are never more than two or three that need watching. The decrease has been proportional on the east coast.

Count Posse points out that in 1923 the authorities confiscated 150,000 liters of illegally imported liquors, while last year the amount fell off to 90,000 liters. The indications for this year, he said, are that these figures will be cut in half.

This particular work of the coast guard service is expected to become easier when the Helsingfors convention, signed recently by the Swedish government, goes into effect. The convention, which increases the territorial limit to 12 miles, has been signed by 12 states.

DRUGS PICKED UP WEST VANCOUVER

Supposed to Have Been Thrown Over from Outbound Vessel by Smugglers

VANCOUVER, Sept. 1.—Wrapped in layers of cork and packed tightly in a packing case with Oriental characters marked on the outside, a big consignment of drugs has been found on the shores of West Vancouver.

The find marks the third big package which has been picked up outside the Narrows in the past few months, and as a result customs officials and R. C. M. P. narcotic details are making an intensive search of the various landings along Howe Sound, the assumption being that a drug cache is located along the sound.

It is believed that the drugs are thrown overboard from outbound Oriental liners, as customs men on board the vessels when they arrive report that their watch makes it impossible for the drugs to be thrown overboard on the inward voyage. No customs men are aboard when the liners leave, however.

Finding of the three consignments, valued at together about $30,000, all in the one vicinity, indicates that the dope runners are supplied with boats, according to the officials, and it is believed that the real activities of the men are cloaked under a towing service.

AMUNDSEN'S BOOK IS REJECTED BY HIS GERMAN PUBLISHERS

MUNICH, Sept. 1.—Roald Amundsen's last book has been declined by the explorer's former publishers in Munich. The manuscript was rejected because "Amundsen severed all connections with the German nation when, during the war, he returned his German decorations and resigned his honorary membership of German societies." The publishers in their statement conclude: "Not until Amundsen has made proper amends for his offensive behavior to Germany, the result of misrepresentations by the anti-German press, will this firm consent to publish any more of his works."

Amundsen is scheduled to deliver a series of lectures in Berlin prior to sailing in September for America.

VANDERHOOF

W. T. Hunter, superintendent of the Dominion experimental station at Summerland; A. E. Richards, supervisor of illustration stations in the province, and C. Tice, chief agronomist for the provincial department of agriculture, were visitors here last week. They inspected the Vanderhoof illustration which is conducted by David Turcotte.

A. B. Laird has arrived in Vanderhoof to become manager of the local branch of the Bank of Commerce, succeeding J. M. Blackstock, who has gone to Vancouver, where he will be attached to the superintendent's department.

After having spent six weeks visiting here with her daughter, Mrs. E. B. Smith, Mrs. J. W. Secord has left for her home in St. Catharines, Ontario.

E. C. McGilton, prominent attorney of Omaha and former governor of the state of Nebraska, was here recently to inspect his extensive land holdings in the district.

Mr. and Mrs. R. C. McCorkell and daughter have returned to Vanderhoof after a motor trip through the southern part of the province and the northwestern states.

Fred Borhaven has gone to Chilliwack with a number of cattle for show and sale.

Mr. and Mrs. E. A. Mitchell and Mr. and Mrs. George Ogston have returned from a three weeks' motor trip to Seattle and Vancouver.

Mrs. Robert Reid and her daughter, Miss Moore have left for Vancouver. Mrs. Reid will spend a month on the coast and Miss Moore will attend Normal School.

Dr. and Mrs. W. Ross Stone and Mrs. Mansell have returned to Vanderhoof after having spent a holiday camping on Stuart Lake.

STEWART

The Salmon River Banking Co. will in future be known as the Bank of Hyder. Officers of the institution for the year have been elected as follows: President, J. A. Hall; vice-president, E. E. Hall; cashier, E. D. Haddon.

Godfrey Anderson, well known prospector of this district for the past fifteen years, died last week in hospital here. He was 58 years of age and was a native of Sweden.

Miss Daphne Workman, who left for Vancouver last week, will take up nurses' training in St. Paul's Hospital in that city.

FREE STATE POPULATION

DUBLIN, Sept. 1.—An official estimate gives the population of the Free State as 3,163,000. There is a slight decline in the birth and death rates. The Free State has not yet taken a census.
