

LAND ACT

Notice of Intention to Apply to Lease Land

In Prince Rupert Land Recording District of Prince Rupert, and situated on the southwest shore of Wales Island, B.C., being north magnetic from Haystack Island, and true east from Island Point, Sitklan Island, TAKE NOTICE that Anglo-British Columbia Packing Company Limited, of Vancouver, B.C., occupation Packers, intends to apply for a lease of the following described lands:—

LAND ACT

Notice of Intention to Apply to Lease Land

In Prince Rupert Land Recording District of Prince Rupert, and situated at Bartlett Point, Wales Island, British Columbia, TAKE NOTICE that Anglo-British Columbia Packing Company Limited, of Vancouver, B.C., occupation Packers, intends to apply for a lease of the following described lands:—

WATER NOTICE

Use and Storage

TAKE NOTICE that William C. Splan, whose address is Lockport Cannery, P.O. B.C., will apply for a license to take and use 2 miners' inches daily and to store 8,000 gallons of water out of an unnamed stream which flows southerly from the north-west corner of the northern Partnership No. 1 claim, and the same dam will be located at the source of the stream. The capacity of the reservoir to be created is about 8,000 gallons, and it will flood about 1/2 acre of land. The water will be diverted from the main at a point at the source, and will be used for domestic and canning purposes upon the land described as Lot 119 and Lot 141 Block A, Queen Charlotte Street, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is July 13, 1925.

WATER NOTICE

Diversion and Use

TAKE NOTICE that Engineer Gold Ltd., whose address is Engineer Gold Ltd., will apply for a license to take and use the total of ten cubic feet of water out of Engineer Creek which flows into West Taku Arm about at 10:30 a.m. The water will be diverted from the stream at a point about the southwest corner of the Mickey claim, and will be used for domestic purposes from the mine described as the Engineer Gold claim. This notice was posted on the twenty-second day of July, 1925. A copy of this notice and an application pursuant thereto and to the Water Act, 1924, will be filed in the office of the Water Recorder at Atlin, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is August 6th, 1925.

Several Good Mines in Bitter Creek Section of Stewart, B.C. Mining District Says Report

(By G. A. Clothier, Resident Engineer)

The Ruby Silver group is comprised of the six mineral claims—Ruby, Ruby No. 1, Stirling, Pershing, Pershing No. 1, and Star—owned by A. W. P. LeSueur. The Ruby Silver Extension group is comprised of four mineral claims—Ruby No. 2, Ruby No. 3, Ruby No. 4, and Ruby No. 5—owned by A. W. P. LeSueur and associates. The claims are situated on Mosquito creek, a short distance up the hill from the main wagon road. A good trail has been made, branching from the main wagon road. A commodious log cabin was built this year at 1,125 feet elevation, about 600 feet above the wagon road. The property is therefore very conveniently located for getting in supplies or equipment of any kind.

The general rock formation is argillite of the Bitter Creek formation. The showing is a quartz calcite vein, about 5 feet wide on the surface, mineralized with pyrite in spots. No ruby silver was seen as the name implies. It strikes S. 70 degrees E. into the hill and dips 68 degrees S.W. At 1,250 feet elevation a tunnel has been driven 150 feet, following the foot-wall of the vein nearly all the way. The vein appears to follow a light-grey porphyritic dyke to within 40 feet of the face of the tunnel, at which point the dyke pinches out. At 24 feet in from the collar of the tunnel a short crosscut of 5 feet was driven to the right; another at 51 feet from the collar, 12 feet long, shows about 2 feet of mixed vein-matter; a third, at 54 feet back from the face, 15 feet long, shows only a seam of a vein on the dyke, the balance being across the dyke. Beyond the dyke the vein seam continues on through the argillite to the face, where there is only a few inches of quartz.

The Ruby Silver Mines, Limited, was incorporated this year, with a capitalization of 350,000 shares at \$1 per share par value. The Rufus group is composed of seven mineral claims—Rufus, Rufus No. 1 to 6, inclusive—situated on the north side of Bear river, about 4 miles up from the end of the wagon road. They were staked and owned by Ben Erickson, one of the pioneer prospectors of this district. This year the Rufus Silver-Lead Mines, Limited, was incorporated and took over the property. The company is capitalized at \$1,000,000 shares at \$1 a share par value.

The property was briefly reported on in 1922, since when nothing of importance has been done until this year. Two good log buildings were built, one just above the Bear River and the other on the upper claims. An assaying outfit was installed at the lower camp. The season's work consisted of surface prospecting, assaying, and the plotting of the geological features, under the supervision of Mr. Whitworth. Definite information has thereby been gained from which can be decided the most advantageous point at which to start permanent workings. Work will be resumed next spring.

The owner has certainly done a great deal of prospecting and development work. Every engineer who has examined the property has been favorably impressed with the showings and possibilities, but its situation means not only a heavy outlay to put it on a producing basis, but a still heavier expenditure to provide adequate transportation, which would necessitate a tramway to the present end of the railway at the Red Cliff or the extension of the railway six miles up Bear River to the property.

The Barite group includes three claims—Barite, Barite No. 1, and Hub—situated on the north side of Bear river above the Red Top and east of the Comet group, and at an elevation of 4,000 feet. The Barite Gold Mines, Limited, was incorporated this year, with a capitalization of 250,000 shares at \$1 par value each, and took over the property from H. Quickstad, of Seattle, Wash. I understand that about 30 feet of tunnel was driven this year on one of three veins exposed on the surface. The work was under the supervision of Mr. Quickstad, president of the company, and Chas. Dowling, a director.

The Terminus Mine is composed of the following mineral claims: Glenora, Edith M., Oneida, Evans, Ayrshire and Cobalt Fraction. These claims are Crown granted and situated on the east side of American creek, about 5 miles from the end of the wagon-road and railway at the Red Cliff, at a general elevation of about 3,400 feet. The Terminus Mines, Limited was incorporated early this year and acquired the above group from Harry Heywood, the original staker. The capitalization of the company is \$1,000,000, divided into 1,000,000 shares.

The general rock formation in the vicinity of the Bear River formation (McConnell). The workings at the time the present company took over the property consisted mainly of a shaft 35 feet deep. This work exposes a 2-foot dyke dipping easterly at about 65 degrees, on the hanging wall of which is a small vein 8 to 12 inches and on the foot-wall one of about 6 inches of high grade silver ore.

Since starting work under the supervision of Harry Heywood the shaft has been sunk to 51 feet, from the bottom of which a drift was driven north on the vein for 42 feet and south for 34 feet, exposing, I understand, the same ore throughout. A crosscut tunnel was then started, which it was estimated with a drivage of 286 feet, would encounter the vein and obtain a depth of 100 feet on it. At the end of the year the tunnel had been advanced to about 270 feet.

Later information is that the vein had been encountered, though (at the time of writing) not entirely crossed, showing in the footwall streaks of sulphides in the vein matter, consisting of galena, zinc-blende, and grey copper, carrying high silver values, the vein matter itself carrying good milling values. This certainly sounds encouraging. Should the development work

Chi-Namel COLOR VARNISHES

PRODUCE a beautiful, self-leveling, transparent color & gloss finish in one operation. Is the IDEAL FINISH for furniture or woodwork whether new or old, hard or soft wood. Does not turn white. Dries overnight. Leaves no lapse or brush marks.

For Sale by Stork's Hardware Ltd. Prince Rupert, B.C.

and there seems small doubt of it now, recommendations will be made to the Mines Department for assistance in building a pack-trail over a suitable route to the main wagon road. The present trail is impassible. Commendation is due Mr. Heywood for his tenacity under tough conditions.

BIG PICTURE COMING HERE

Westholme Theatre to Show "The Ten Commandments" at End of Next Week

The management of the Westholme Theatre has obtained one of the greatest moving pictures ever produced, namely "The Ten Commandments," for its patrons and the big feature will be shown for three days at the end of next week, August 20, 21 and 22. "The Ten Commandments" is not a preachment. It is a simple story with more than one thing to think about. Not only does it say that when you persist in ignoring the plain rules for right living you bring your own hell on yourself as a natural result, but it also says, through the mistakenly narrow character of the little Scotch-American Mother, that you can drive your children away from the God you want them to love, by "using the Cross as a whip."

"The Ten Commandments" tells you first that "they are not rules to obey as a personal favor to God." "They are the fundamental principles without which mankind cannot live together. They are not laws. They are the LAW."

And then the picture proceeds on its way of showing you, in one half, the times of Moses and Rameses, the Pharaoh, when this human law was first recognized. It runs with the blood and tears that the ignoring of them brought. In the next half it shows you what law has to do with the lives of a family—a mother and her two sons. She

Does Your Grocer Use Scales?

HE DOES!—Because you expect him to weigh your orders of bulk goods. If he didn't you would assuredly change your grocer.

The same thing is true with circulation. During the last few years Advertisers have not been satisfied to suppose they were getting a certain circulation for their money; they don't want to be merely told, they want to know.

They want the circulation measured by a standardized and unquestionable measurement.

The Audit Bureau of Circulations is the recognized authority for proving circulation. It is maintained as a co-operative organization by the advertisers, advertising agencies and publishers who realize the necessity for businesslike methods in advertising.

A.B.C. reports place in the hands of advertisers, essential facts that have been secured and verified by a searching examination of the publisher's records

You don't need to buy Space by Guess!

You can get the full circulation facts on the Prince Rupert Daily News by referring to the last A.B.C. report which will be gladly furnished by request.

SMALL RECIPES NOT EASY

So far only two women have sent recipes for small cakes to be sent on to a young bride who is teaching herself to cook. Such recipes are harder to get than for large cakes.

If you have any good recipes we know this new cook will be most grateful to have them.

Pacific Milk Co. Limited. Head Office, Vancouver. Factories at Ladner and Abbotsford. Includes an illustration of a Pacific Milk can.
