STEWART MAN IS OPTIMISTIC

J. Wakefield Much Pleased With Prospects of his Town Where There is Activity

That the Stewart district is prosperous and the prospects are good for still greater improvement, is the word brought from that place by W. J. Wakefield, former Prince Rupert man, who is visiting in the city for a few days.

Mr. Wakefield says that between Hyder and Stewart and the mines of the neighborhood there are from a thousand to twelve hundred men employed and the development that is going on spells improvement. The U.S. government is spending a lot of money on the Salmon River Valley road and the British Columbia government is also doing well. The mines are developing, the Dunwell especially looking like a winner. The tramway machinery is on the ground and nearly 100 men are employed there.

condition of the railway and also to get an idea of the country through which it passed.

Much of the country was covered in motor cars and the commissioner was delighted at the condition of the crops and the prospects for future development which he saw there.

Speaking of the visit to the Daily News, Mr. Dawson said he never saw the country look better and he was particularly pleased at the increased acreage noticeable in wheat this year. The grain is headed out well and cutting, he believed, would commence within two weeks. Everywhere it looked well and the farmers he found were keen on the idea of shipping grain through Prince Rupert.

IN READINESS FOR FISHING

Preparations Made at Queen Charlotte Islands But Salmon Were Rather Late

SKIDEGATE, Aug. 5.—The management of the B.C. Packers new cannery near here has adopted the policy of employing as many local girls as possible. Also local fishermen and help generally are taken on. This is very acceptable to the residents of the Islands who are pleased at the action of M. English, the manager.

FRENCH ATTITUDE TOWARD AMERICANS NOT VERY PLEASING

VICTORIA, Aug. 5.—Compared with the French standard of wages, the cost of living today in France is very high and the French masses are inclined to blame the tourists from this side of the Atlantic for this condition, reports Mrs. Robert Baird, who returned to Victoria after a six months' absence in Paris. This feeling on the part of the French toward Americans is enhanced by what they consider to be an unfair attitude in the United States' expectations in the matter of the payment of the war loan, and the consequence is that frequently the visitor from this continent is not invariably treated with the courtesy which he might be prepared to expect.
