Pulls a full Ink Sac
IN 10 seconds, you can fill a Waterman's to its maximum ink capacity. Other than removing the cap you don't have to take your pen apart in order to fill it. Only two motions are necessary—both made without removing any part of the pen—a tiny lever raised—pressed back—that's all.
Waterman's Filling Device allows the reinforced rubber ink sac to run the full length of the barrel, assuring an ink capacity of 10,000 words.
The Waterman's Spoon Feed—an exclusive patented feature—insures an instant flow of ink, smooth and even, down to the last drop.
Waterman's, made of rubber, is preferred by Court and Commercial Stenographers on account of its lightness, durability and perfect balance.
