CITY COUNCIL IS SERENADED

Boys' Band Takes Novel Method of Supporting Request for Grant of $500.

The Boys' Band in full strength under Bandmaster Wilson bravely stood out in the rain in front of the City Hall last night to serenade the city fathers and their efforts were fully appreciated by the aldermen who spoke highly of the excellence of the organization and informally stated that, if at all possible, they would meet the financial requirements of the band which had been presented to them by Col. J. W. Nicholls as a prelude to the serenade.

Col. Nicholls' request was that the city vote $500 to the band this year so that it might be fully equipped with instruments. The band was ready to make return for the grant and would undertake to give ten public concerts during the year. Further, the city was invited to appoint one of the members of the council to the committee of the Rotary Club which was in charge of the band. Col. Nicholls referred to the fact that the band had already proven itself. It now had 35 active members and five on probation and many more boys were desirous of joining. The need for equipment was great, many of the instruments now in use being borrowed.

Ald. Jos. Greer moved that Col. Nicholls' request be placed before the finance committee in writing to be dealt with in connection with the estimates. The motion was seconded by Ald. Perry, who was desirous of seeing the grant made with the instruments being duly protected. It carried.

G. M. Newton, Winnipeg lumberman, who arrived in the city on yesterday morning's train, sailed last night on the Camosun for Vancouver.

WATER CHARGES COLD STORAGE

Lower Rate to be Given and By-law Will be Amended to Provide for It

SUGGESTION REFUSED

Another report from the utilities committee with respect to the readjustment of water charges to the Canadian Fish & Cold Storage Co. proved unsatisfactory to the city council last night and the matter was again referred back to the committee. The recommendation of the committee was that a branch water line be carried to the company's wharf and the water going through this line, being used for the washing down of fish boats, be remetered and the company credited for it on its regular account. After considerable discussion, in which various members of the council expressed themselves as being opposed to a "free water" principle the recommendation was withdrawn by the committee which was requested to make a general readjustment along the line of amending the bylaw providing for a lower rate to all consumers of water in such a volume as the Canadian Fish & Cold Storage Co. Ald. Brown, chairman of the utilities, spoke at first in favor of the committee's recommendation as the only apparent means of giving the desired encouragement to the fishing industry. After the discussion, however, he agreed with the wisdom of amending the bylaw to provide for the lower rate and, in order that steps might be taken in that direction, offered to withdraw the recommendation.

Views of Company

Col. J. W. Nicholls, comptroller of the Canadian Fish & Cold Storage Co., who was present at the meeting, appreciated the generous suggestion of the committee but felt that it would be detrimental to the interests of the city. It would probably lead to water having to be remetered at many places along the waterfront. The Canadian Fish & Cold Storage Co. was prepared to continue giving "free water" to the fishermen but he felt that a minimum rate of 5c, competitive with other places, should be given. To thus extend the minimum rate from 7c would not interfere with the general working of the bylaw, he felt. Col. Nicholls also spoke of the possibility of the cold storage putting in its own water supply if it was felt that it would be more economical to do so than buy from the city.

After further discussion it was decided, on motion of Ald. Jos. Greer, seconded by Ald. Perry, to again refer the matter back to the committee.

Mrs. S. E. Little, 103 Inkerman St., London, Ont., writes:—"I got a very severe cold which settled in my bronchial tubes.

I coughed night and day, and although I tried several different remedies I could get no relief until a friend advised me to take Dr. Wood's Norway Pine Syrup. This I did, and I must say that it gave me almost immediate relief as I got rid of my cough very quickly. I hope this testimonial will be the means of helping others."

The Well-Managed Home

THE manager of a household is the purchasing agent for a large proportion of the family needs. In order to do a good job she must know what, when and where to buy. She must study goods and the concerns which make goods and have them to sell. She must put her home on a business basis and run it on business principles in order to make the most of the family income.

Information is the only basis for intelligent purchasing. And the right way to get the greatest amount of necessary information is to read the advertisements.

Advertisements tell you what is new and good in merchandise. They reveal improvements and inventions to make your home life easier, more comfortable and more convenient. They give you information about a thousand and one things that are useful and interesting.

Every manager of a household---every member of the household who shares the responsibility for the family's welfare---should make a habit of reading the ads.

PARK CARETAKER IS TO HAVE MORE SALARY

Council Decides to Give Fred Riffou $100 a Month Instead of $75 as Heretofore

On recommendation of the board of works the city council decided last night to increase the salary of Fred Riffou, caretaker of McClymont Park, from $75 to $100 per month. Mr. Riffou is employed about six months annually and his duties consist of guarding the children at play, protecting the playground equipment and making such improvements to the park as possible.

Accounts for the week ending March 5 totalling $6,179 were passed for payment by the city council last night.
