PRESCRIPTIONS

When your physician writes a prescription he specifies exfacily what drugs he wants and the amount of each ingredient. But the problem of compounding these ingredients so that the BEST RESULTS are obtained—that is left to the pharmacist's judgment.

How important it is, then, to choose your pharmacist with care and take the prescription to one who is properly qualified by law, by education, and by experience to perform this important task. For all the accumulated knowledge brought to bear by your doctor in writing the prescription may go for naught unless the compounding is done in accordance with the most approved methods.

When your prescription is compounded by us you are assured of getting exactly what the doctor specifies. Furthermore, you are assured of having the prescription com-EXPERIENCED PHARMACIST with the VERY BEST GRADE OF MATERIALS OBTAIN-ABLE.
