### FEMALE OF SPECIES ARE MOST AGREEABLE

University of Washington Decides in Favor of Women Over Men

SEATTLE, May 19.—Feminine dispositions have won a scientific decision over the masculine variety at the University of Washington.

Compilation of answers to a questionnaire circulated among sociology students by Read Bain, lecturer, disclosed that the female of the species is more agreeable than the male. Bain said, "This is not because the girl has a better disposition than the boy originally but she has had so much training in making herself agreeable that she develops positive adaptation toward ordinary annoyances."

### FONDANT PINK AND CELADON GREEN ARE POPULAR NEW COLORS

LONDON, May 19.—Fondant pink and celadon green are the two new colors which are being shown most in the exclusive gown shops of London's west end.

Combination of colors in both evening gowns and gown for day wear are displayed. Bodices are frequently made of one color and the skirts of another. Umbrella-shaped skirts are hung from plain bodices which mould the figure. Yokes are used on both day and evening gowns and almost every conceivable style of sleeve is shown. Frequently the sleeves are not the same color as the dress.
