#### New Governor Is Selected.

Viscount Willingdon is to be the new Governor-General of Canada, the link between Great Britain and this country for the next few years. While the duties as Governor have little to do with governing except to sign the bills which are passed! by Parliament and which without his signature cannot become law according to the Canadian constitution, there are variou: | important social and other duties which a governor performs which have an important influence on the relations between peaten, the British coal strike Canada and other parts of the Empire.

The Viscount is a Liberal by birth and training but his experiences as Governor of two Indian presidencies would tend to make him more conservative. With considerable experience! both as a parliamentarian and diplomat and with all the old can't afford it. British traditions, he should make an ideal governor-general and Canada will welcome him.

One thing that will commend Lord Willingdon to many is everything. Now it is suggested the fact that he is not a military man. Lord Byng has filled the position with honor and tact and has been an ideal governor, week, but most of his sympathies were military. Now we have a man who has devoted himself to civil life, and that fact will appear strongly to a large section of the Canadian people.

Many people will be interested in reading the sketch of Lord Willingdon published in this issue. As he will be much the bester. in the public eye and will probably visit Prince Rupert before very long it is well to know who he is and what have been his activities in the past.

#### Cost Huge Sum To Build To Hudson Bay.

It will cost a huge sum of money to build the railway to Hudson Bay and when the work is completed the advantage to Canada will be doubtful. Insofar as it will open up new country it will be worth something, however, But whether it will be worth the sum of twenty-six million dollars is not at all sure. As most estimates are much under the actual cost it is to be assumed that the railway and other works will cost more like forty millions.

If half that amount were spent in opening up the Peace at. River country it would be much more real advantage to the country than building to a sea that is frozen over the greater part of the year. However, the Government seems to be com-|split. And all along we thought ering broke up about ten min- lon; S. J. McCoppren, Edmonmitted to the project so we shall apparently have to accept the it was indivisi- utes before midnight. A. Clap- ion; L. H. Levi, Winnipeg; Mrs. new line as one of the Government works of doubtful value.

#### Senate Has Killed Pension Bill.

The Government old age pension bill, which recently the choosing is Pilsudski. In passed the House of Commons, has been rejected by the Senate Prince Rupert - but why get MASTERS' AND MATES' and therefore will not become law this year. Probably it will be personal? introduced again next year or as soon as there seems a possibility of it going through. It ought not to be very long before; THE immortality of the soul is the political complexion of the second chamber has changed quite reasonable, but what about Alex Donald and Hans Berquist Then, it is to be hoped, its constitution will be changed and it the thousands of people whole will be made into a more useful body. At present it is simply have no souls? a divorce court and a source of expense and irritation.

Rejection of the pensions bill is to be regretted. Many old THE latest seasonable sport people through no fault of their own find themselves in poor is swatting the fly. At a wedfinancial circumstances and the bill was designed to make it ding a silver mounted fly swatte. possible for them to be independent of relatives and friends and is the most up to date and apto end their days in peace.

#### Prohibitionists Are Becoming Active.

Activity is being shown among those who are advocating prohibition of liquor selling in this province. At the time of the passing of the Government control measure, it was argued' that it would do away with bootlegging, and that was the chief Rev. Dr. Charles J. Cameron Apreason why people voted for it. They were misled. Bootlegging did not cease. It has not ceased yet. An illegal traffic is! being carried on all over the provinces, only in a different way from what it was before the present law passed. The way to kill the prohibition movement is to have the liquor laws enforced and to keep sale of beer and liquor within reasonable limits.

#### SHAKESPEAREAN RECITAL WAS GREATLY ENJOYED

peared Last Night Before St. Andrew's Society

Rev. Dr. Charles J. Cameron, pastor of the First Presbyteriar. Church, was most interesting! and entertaining in a Shakesperian lecture and recital delivered before the St. Andrew' Society last evening. Not only did Dr. Cameron speak eloquently on the life of the great English playwright but, in his own inimitable manner, recited! many excerpts from the various Shakesperian plays. There was a large attendance at the gathering which was presided over by George W. Abbott, president of St. Andrew's Society.

Beside the address, there was a program to which Mrs. William Millar, J. E. Davey, Mrs. Waugh (Montreal), Miss Catherine Jones and A. Clapperton contributed with vocal solos; W. D. Smith and A. Clapperton and J. E. Davey and A. Clapperton

## Majority Endorsement of the NEW TIRE WARRANTY

WITH the advent of spring and heavier tire buying, the majority of motorists are appreciating the benefits of the revised tire warranty announced January 1, 1926. This warranty gives full guarantee against defects of workmanship or materials for 90 days from date of first road wear (180 days in the case of solid tires). You can now buy the tires you need with the assurance that you are paying only a fair price—a price not increased by losses imposed upon the manufacturer by the habitual adjustment seeker.

Hundreds of thousands of dollars will now be saved on the purchase price by the big majority of motorists who do not seriously abuse their tires. So that you may not innocently abuse your tires, the Rubber Association of Canada publishes information to assist you.

## Too Low Air Pressure

TN recent years the comfort of Balloon tires has created a tendency on the part of those still using highpressure tires to very materially reduce their air pressure. In turn, many users of Balloon tires have been tempted to seek further increase of riding comfort by carrying too little air, even in Balloon tires. Both Balloon and high-pressure tires are sharply susceptible to injury if the proper pressure for the load carried is not maintained.

The illustration to the right

gives a sectional view of the

position of a high-pressure tire

providing the tire contains too

little air. The wall of a high-

pressure tire is thicker and the

action is that of turning the

tire inside out-of placing tre-

mendous strain on the inner

plies and compressing the outer

jury, which is also first ap-

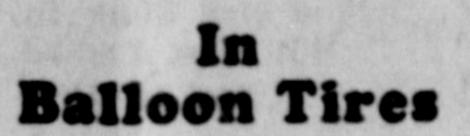

parent on the inside of the tire;

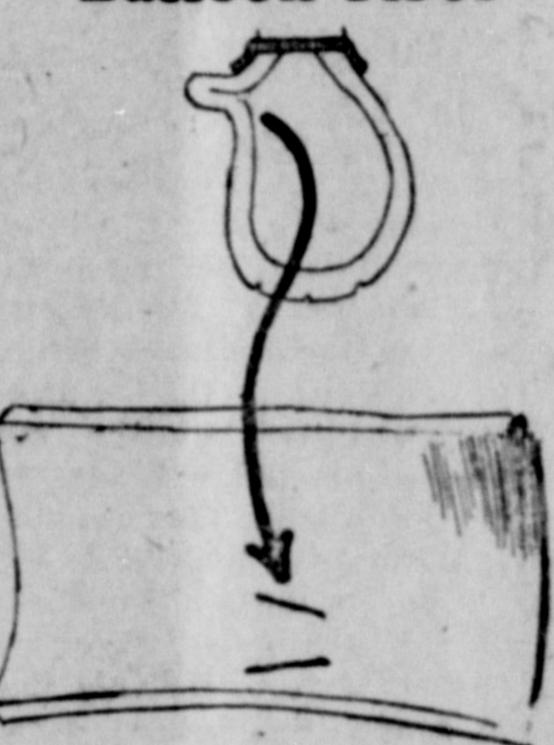

but later, frequently, results in

a blow-out through the tire.

part of the tire.

under the stress of a bump Pressure Tires

To the left is illustrated the shape of a Balloon tire with too low air pressure when coming in contact with a curb, stone or other obstacle at a fair rate of speed. You will notice that on one side of the tire the air is completely displaced, permitting two points of the tire to be solidly hammered between the rim and the projection encountered.

The next illustration to the left shows the damage done. This becomes apparent on the inside of the tire, because the rubber on the outside of the tire is less susceptible to scar.

The injuries illustrated above can be satisfactorily repaired by

competent tire repairmen.

#### How to Avoid These Tire Injuries

In addition to driving with reasonable care, the way to avoid these mishaps is to buy tires of a size adequate for the load to be carried and then to keep them inflated in accordance with the maker's recommendation. This information regarding tire size and inflation can be obtained from good tire dealers.

To guide you in maintaining the desirable inflation it is necessary that you have a pressure gauge. If you are using Balloon tires use a Balloon tire gauge, do not rely on a high-pressure gauge for low-pressure tires. The high-pressure gauge is not designed to register the small fluctuations of air pressure which are sufficient to cause injury to low-pressure tires.
