It has taken time to put the city on its feet, so now let us keep who were disappointed in not be- reached Canada. going.

Increase in Electric Power This Year.

The generation of electric power in Canada is on the increase and that is an indication of industrial prosperity. The Royal Bank report, just received, says in this respect:

"The amount of electric power generated in Canada for Canadian use during the first five months of 1926 surpassed that produced in the corresponding months in 1925 by 17 per cent and that of 1923 by 38 per cent. Increased growth in Canadian dollar to the Tory Association? use of electric power is indicative of increased industrial activity, since a much larger proportion of the electric power generated in Canada is used for industrial purposes than in more! thickly settled countries where there is a larger proportional amount used for lighting."

Miners Are Men Who Are Helping the Country.

The miners are the men who are helping develop the country and making it prosperous. Yesterday we told of a mine about to be developed by Duke Harris and associates on Hastings !! Arm, near Anyox. He may not be thinking about that. Probably he is trying to make a little money for himself, but he would Did you hear about the tour- A town that was noted for rain dig it out of the ground. Leacock Thinks All Should Be Driven Out of Land So Tories May Rule.

says the Edmonton Bulletin. Prof. Stephen Leacock, speaking at a Tory nominating convention last week, in the presence of Premier Meighen, pictured the happy days that are in store for Canada when the last Liberal and Progressive has been silenced and the beautiful, cemetery-like silence of Toryism falls over the land. He said:

"The snakes have been driven out of Canada; the skunks have been nearly all exterminated. Now there are only the Liberals and Progressives to be got rid of."

Bolshevik Sentiments

If a teamster or a mucker or a O coal miner had uttered these sentiments he would have been mispeople. But the standing of the professor as a scholar and a literateur saves him from such sus-

In sn	ite of the fact	that these	

ast three years have conformed more nearly to expectancy ac cording to pack records, there is still some discrepancy between actual returns and predicted returns based on the spawning ground conditions. For instance, in 1919 the spawnlog beds presented a very unfavgnown occurred in 1924. The pack of 1925 was small, particularly in comparison with those of 1922 and 1924, but it was expected, not only because of the small pack of the proodyear, 1920, but, in addition, Inspector Hickman was of the of mior that the run of 1920 was not as large as any other year on record, with the possible exception of 1919. Only 75 per cent of the pack was derived from the 1920 run and an unusually high percentage (23) formed the four-year-old onevery difficult to understand. particularly as these individuals Holding the breath is good were descendants of the 1921 record (1,364 cases). It is possible that we have erred in Iquentiy placing individuals. which eally belonged in the!

Condition of Run

Fear has been expressed that the Naas run is declining. Th results of this year's pack, to gether with the knowledge that next year's run will be derived from the smallest run on record. are not encouraging. On the other hand, this year Inspector! Hickman observed at the head? of Meziadin Lake a far greater number of spawning fish than year, and he also reported enorfalls. But experience has taught that predictions are not necessarily realized in this river. Consequently a few more years! must pass before the real condition of the Naas run is definitely known.
