## VHEAT LEFT EDMONTON YESTERDAY AND SHOULD ARRIVE HERE SUNDAY

## irst Grain Shipment Left Edmonton for the Prince Rupert Elevator

EDMONTON, September 23.—The first shipment of wheat for the Prince elevator was made from here yesterday by the Wheat Pool and should there about Sunday next. It is not a large shipment but will be followed

Shipments have been delayed considerably by the bad weather which has yed the harvesting operations and it is likely the result will be that the in the Prince Rupert elevator will be called upon to help condition a good of grain that will be damp.

The railway line to the coast is reported in excellent shape and no delays occur in delivering the grain to the new port.

The police were at once notified and Constable McKinlay proceeded to investigate. Dr. J. P. Cade was called and VICTORIA, Sept. 23 .- The observatory he declared that death had probably

140 and 50 years of age.

## Drizzling Rain This Morning Made Fight Prospeets Rather Uncertain but Later Improved

PHILADELPHIA, September 23.—Dempsey and Tunney are girded today to fight for the championship and the richest prize in the sporting world. The champion is to receive \$450,000 win, lose or draw, and the challenger gets \$200,000. The greatest throng that ever paid to view an athletic event is expected and the gate is expected to amount to a million and three quarter dollars.

Weather conditions were none too good early today, with a slight drizzle son, the foreman, learned the game in of rain falling but as the morning advanced prospects improved. Should rain the Northumberland coal mines as also intervene this evening, the fight will be held tomorrow.

It is estimated that 100,000 outsiders reached Philadelphia this afternoon. fifty thousand having arrived overnight.\*

Dempsey is the heavy favorite, odds retain the title while many freak bets Mr. McGuire entered the university are made that Tunney will be knocked

## Weather on Prairies Delays Harvesting in Manitoba and Alberta

WINNIPEG, September 23 .- The farmers of Western Canada already st fering heavy loss from snow and rain storms today watched for an early bree in the weather but their hopes were dissipated in many districts in Manitol at Gonzales Hill registered an earth- taken place some twelve hours previous and Alberta. Conditions are more favorable in Saskatchewan.

Last night many districts in Manitoba were visited by the heaviest ra storm of the season while in the northern section snow fell. Southeastern s tions of Alberta were visited by snow this morning but the cold weather entire checked the sprouting of stooked grain.

### Betty Coal Mine at Telkwa Is Increasing Output This Season and is Already Busy

TELKWA, September 23 .- With expectations that this will be the best here at the siding in eight hours.

The mine is located on Goat Creek about six miles from Telkwa and the hauling to the railway is being done with two ton-and-a-half trucks by the Telkwa Trans.er Company. This record haul for one day is in a large measure due to the work that has been done on the road this summer by the Provincial Public Works Department in co-operation with John McNeil, manager of the mine.

Telkwa coal is establishing a reputa-\* tion along the line from Prince George to Prince Rupert. It is a bituminous coal exceptionally free from clinkers and the demand is steadily on the increase. The past three winters about 1500 tons a season covered the output but this year the management expect to sell 2500 ons or better.

TUNNEL ON LEVEL Since the road to the mine has been so greatly improved, residents of the surrounding district are motoring out to get first nand information on this new industry of the Bulkley Valley and those whose ideas of coal mines are associated with deep shafts and pits are indeed surprised when they walk into the tunnel at the Betty from the level ground.

in thickness lies a few feet above high water mark of the creek and dips slightly to the north, making it ideal for Lucy Ann Roberts, 70 years of age, a drainage, although there is very little water coming into the mine as hour's pumping every two days is sufficient to keep the sump dry.

COAL IN SIGHT branch tunnels leading from it. all of she recently went to Florida. which show a continuance of the coal

seam. It is estimated that 15,000 tons that the distance from the vein to the surface of DI MINU DEDUITOR the ground at present averages about 50 feet but the development work is now being extended in following the vein towards a hill, several hundred yards back from the creek and it is expected that the additional pressure will improve the quality of the coal when this is

reached.

There are eight men working at the mine at present including the engineer and cook and the average output is fifteen tons a day. In the selection of the miners Jack McNeil has been able to secure from among the settlers of the surrounding communities, men who have served their apprenticeship in the coal mines of the old country and who are winter months at this work and assist with their experience in opening up and developing another one of the natural resources of the district. Asa Robindid Dad Wicks and his sons.

The camp is made up of a group of bunk house engine room and machine substantial buildings consisting shop .cook house, stable and houses, the bunk house being equipped with a radio receiving set.

LOCAL CAPITAL

been done entirely by local energy and local capital and great credit is due to Jack McNeil for promoting the industry. As the exploration work continues great mean a big thing for the district.

MEIGHEN WILL NOT RESIGN TODAY BUT

OTTAWA. Sept. 23 .- It is of- + tended by Mr. Forke.
