## Pains, cramps, or callouses there?

If so, it indicates that the arch across the ball of your foot has broken down. This form of foot trouble causes a hole to wear through the sole of the shoe as shown in the illustration.

Sharp pains and cramps at the ball of the foot and callouses on the sole at that point indicate a serious foot trouble. Shoes will spread across the vamp, lose their shape and wear out sooner than they should. The shoes are condemned when in reality the feet are the cause.

## The pain relieved and the cause corrected

by gently, but firmly supporting the weakened muscles. Dr. Scholl's Foot Comfort Appliances relieve the pain and cramps and restore the arch to normal position. These devices also prevent the shoes from spreading and wearing holes in the soles at this point.

Come in and let our Foot Comfort Expert demonstrate the manner in which these remarkable appliances can be adjusted so they will meet your individual requirements. There is no charge for this service.
