DAILY EDITION

Friday, February 26, 1916.

Much Grain Is Going To Orient.

This season the amount of grain going to the Orient is much larger than last. Of the total shipments made so far 44 per cent have been taken to Oriental ports as against 16 per cent of a much smaller crop last year. Practically all of this was wheat.

With the development of the Oriental business, there is more chance of Prince Rupert getting a good share. The fact that none has come this way so far does not mean anything. It will be rolling this way one of these days when we least expect it.

Discoverers Are Not Very Edifying.

The controversy between Amundsen and Wilkins as to the probability of success is not very edifying. The suggestion of failure is enough to injure the expedition and it does not seem like very good sportsmanship to say anything on the eve of departure. It is to be assumed that Wilkins intends to go, and will not likely be held back by any prognostications as to the outcome of his flight.

Give every man a fair field and plenty of encouragement and then the winner will get the credit.

Prince Rupert Named After Big Contest.

When a name was chosen for Prince Rupert, the fact was advertised far and wide that a name for a new city was wanted and that a prize would be given the successful suggestion. When this name was chosen it was criticized by many as being too cumbersome. It is more difficult to write than one word, especially when using a typewriter. Someone will be coming forward to tell us, possibly that we have lost a million minutes in the aggregate through having to write two words instead of one. Possibly if we lost another million we should not be any worse off than we are today.

It is interesting to know that the name was chosen twenty years ago, although the city is not yet anything like 20 years old.

Few People Travel Much As At Prince Rupert.

At few places in the world of the same population as Prince Rupert do people travel as much. Some local citizens are always away on pleasure or business bent. This week several returned and are telling their friends of the places they visited and the new ideas they gathered by the wayside.

Travel is widening. It rids a person of narrow prejudices and enables them to see from many angles. Also it helps us to appreciate our own home town.

Log Export To United States.

The question of log export to the United States or Japan is one that is constantly being discussed. The general opinion seems to be that all logs should, so far as possible, be manufactured in British Columbia. The difficulty is that on logs cut from crown granted lands the province has absolutely no control. The owners can do as they like with them, so far as the provincial authorities are concerned. The only authority that can put an embargo on logs taken from crown granted timber is the Dominion government and it would probably need special legislation to provide for it.

The Dominion government at present allows the export of pulp wood, and a commission to investigate a few years ago seemed to find the general opinion in favor of continuing as at present. What applies to the East must apply to the West on a matter of that kind.

LOCAL MAN IN CALIFORNIA

C. H. Orme Tells of His Recent Visit and of Things he Saw There

That prohibition does not worry the average person of the United States and that California is becoming an industrial state were two of the interesting things told the Rotary Club yesterday by C. H. Orme, who returned to the city Wednesday after an extended trip in the south.

California is past the stage where it devotes its attention particularly to tourists, said the speaker. It is now devoting its attention to the establishment of industries. While Mr. Orme was there a three million dollar and a two million dollar industry was announced for Los Angeles.

As to prohibition, Mr. Orme said the average man did not see any liquor and for that reason did not want it. He never thought of it. The speaker believed it was a good thing to have it that way.

Different From B.C.

California is becoming a place where people want to go and live according to Mr. Orme. It is very different from British Columbia but in the irrigation districts the land is very fertile. He saw the oranges being grown and packed, the boxes being made by machinery. He drove through the country and saw their wealth in oil production, in fruit growing and in the Imperial Valley the lettuce production. Cotton and other things are also grown there.

Mr. Orme spent some time at La Jolle not far from San Diego, but he got a bad cold there. In Sacramento it was foggy and he was told the fog had been settled on the place for 22 days. Los Angeles, however, was sunny.

Coming back, Mr. Orme was interested in noting the progress of Vancouver and he considers the prospects there excellent.

THE MAN IN THE MOON

ONE test of intelligence is to be able to entertain oneself.

THE modern wife is a great aid to her husband. Last year she helped raise the number of cigarettes smoked to eight million.

IT seems wonderful that the mirror should retain the friendship of so many people, considering the reflections it casts.

WHEN it is desired to express something absolutely useless, it is proper to say "as useless as a special delivery stamp on a Prince Rupert letter."

DRIVE carefully. The other fellow may be crazy too.

THERE'S one thing about present day fashions, they prevent people from saying a girl has no visible means of support.

WHAT I hate about men's fashions is that it is difficult to remove one's shoes without unlacing them.

SOME people raise families others raise Cain.

Ten Years Ago in Prince Rupert

February 26, 1916.

A recruiting meeting was held in the Empress Theatre last night and there were a number of stirring speeches. Mayor McCaffrey presided and he was accompanied on the platform by Lieut. Col. J. W. Warden, Rev. Canon G. A. Rix, Rev. Father E. M. Bunoz, E. P. Spaulding of Spokane, Dr. N. M. McNeill, Capt. J. F. Brandt, Lieut. Bowen and Lieut. Christie.

The G.T.P. Coast Steamships will institute an Alaska service this summer with the steamer Prince John. G. A. McCaffrey, assistant general freight and passenger agent, and Capt. C. H. Nicholson, manager of the coast steamship service, returned last night from a trip to Winnipeg in connection with the matter.

Strength for Invalids

The rich beef-nutrient concentrated in Oxo Cubes is an ideal food for invalids, delicate people and those recovering from wasting fevers.

A cup of hot Oxo at 11 o'clock—at 4 in the afternoon and the last thing at night—generously supplements the regular diet with the splendid food qualities of prime fresh beef in a form that is readily digested by the enfeebled system.

So easy to prepare—merely drop an Oxo Cube into a cup of boiling water or milk.

GRAUSTARK TO BE SHOWN HERE TODAY

Famous McCutcheon Story Will be Seen in Picture With all its Romance

"Graustark" has come to life! The magic witchery of intrigue and romance which flowed so freely from the pen of George Barr McCutcheon has been imbued with the colors of reality and Graustark, the kingdom, and the story, lives upon the screen.

And it is fitting that of all filmdom's great, Norma Talmadge should appear in the starring role as the lovely and lovable Princess Yvonne.

Notable Features

The production is particularly notable in three things:

First that it takes Norma out of the character roles which we have added renown in "Secrets" and "The Lady," and brings her once more to her admirers as the lovely, gracious, romantic character they like her best to be.

Second, that it brings to life one of the most celebrated novels of contemporary fiction—"Graustark," the McCutcheon story, which has been read by millions.

Third, that of all the plays ever made from books, none has more religiously followed the original story.

Mythical Kingdom

"Graustark," as everybody knows, was the forerunner of a series of McCutcheon stories centered in the tiny, romantic and entirely mythical kingdom which presumably lies somewhere in the south of Europe. Walled in by mountains and virtually independent of the outside world, "Graustark" brooks in a pleasant reverie in which modern customs mingle charmingly with ancient traditions.

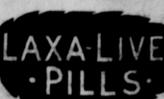

This is the atmosphere which Norma Talmadge has succeeded in transferring to the screen. It is lived at opportune moments by the ringing clash of steel, and spiced at times with just enough danger to make things interesting. But over all is the love story of the Princess and the American, running its tender and turbulent way to ultimate happiness.

Tongue Was Coated Bad Taste In Mouth Every Morning

Mrs. J. R. Adams, Assiniboia, Sask., writes:—"For months I was troubled with a coated tongue, and had a bad taste in my mouth every morning.

One day I saw where your

Milburn's

were advertised for just such a condition as mine, so I went at once and bought three vials of them, but after using one-and-a-half, all my troubles disappeared."

For 32 years Lax Liver Pills have been put up only by The T. Milburn Co., Limited, Toronto, Ont.

ROTARIANS TO HAVE NURSES AS GUESTS AT DINNER DANCE

At the Rotary luncheon yesterday George Woodland announced that arrangements were almost complete for the dinner dance to be given next week at which the wives of members and the hospital nurses would be guests of the club. There are to be no speeches but instead there will be a three-piece orchestra, community singing, special stunts, fancy dress dancing, a humorous debate on the subject "To Bob or not to Bob," vocal selections, an instrumental trio and a few stories.

It was also announced by the president that the Players Club were putting on another play next week at which the Gyros were to benefit. The proceeds to go to the playground fund. He urged that the playground fund be supported.

BROADCASTING STATIONS MOSTLY IN THE STATES

Two Thirds of all Those in Existence are in Republic to South

WASHINGTON, Feb. 26.—Radio broadcasting stations throughout the world total 803, nearly two-thirds of which are in the United States.

A census made by the Department of Commerce, which has jurisdiction over commercial radio in this country, showed that there now are 533 licensed broadcasters in the United States, as against only 270 stations for the remainder of the world.

Through a gradual weeding out process of stations which were operating only intermittently and for no particular reason, the number in this country is decreasing.

Canada Second

Canada, with 52 broadcasting stations, stands second to the United States. The recent radio boom in Spain has placed that country in third place with 22 stations, while the United Kingdom and France have 20 and 19 stations respectively.

Figures of the other leading countries in order, are Mexico 18 stations; Germany, Brazil and Sweden, 15 each; Cuba and Australia 13 each, and Argentina 7.

WATER NOTICE

USE AND STORAGE. TAKE NOTICE that Wallace Fisheries Limited whose address is 1091 Vancouver dock, 736 Granville Street, Vancouver, B.C., will apply for a licence to take and use 230 cubic feet per second and to store 2395 acre feet of water out of Station Creek, also known as Wallace Creek, which is a tributary of the Skeena River, and flows southwesterly and drains into Skeena River about 20.00 miles south of the northwest corner of Lot 20, Range 5, Coast District.

THE STORAGE DAMS will be located at the following places, their capacities as respectively set forth, and they will flood the areas respectively shown: 1. Located: Natural outlet to Ice Lake at head of Wallace Creek. Capacity, 120.0 acre feet. Will flood, 56.63 acres.

2. Located: Natural Outlet to Wallace Lake at head of Wallace Creek. Capacity, 41.0 acre feet. Will flood, 12.00 acres.

3. Located: Natural Outlet to Sturgeon Lake at head of Wallace Creek. Capacity, 300.0 acre feet. Will flood, 47.61 acres.

4. Located: Natural Outlet for Emergency Lake, at head of Wallace Creek. Capacity, 198.0 feet. Will flood, 22.67 acres.

5. Located: Natural Outlet for Artificial Lake, about 1/2 mile upstream from mouth of Wallace Creek. Capacity, 230.0 acre feet. Will flood, 15.62 acres.

6. Located: 3 Dams near head of Claxton Creek at head of Wallace Lake. Capacity, 1200.0 acre feet. Will flood, 156.28 acres.

Water shall be diverted from the stream at a point about 200.0 feet northeast from the southwest corner of Lot 20, Range 5, Coast District, and will be used for power and industrial purposes upon the land described as Lot 20, Range 5, Coast District and upon other leasehold land, and numbered in the Lands Department as No. 265 to be known, subsequent to survey as Lot 2825, Range 5, Coast District.

THE STORAGE LICENSE applied for is as to 950 acre feet thereof to supplement and right to take and use 8.24 cubic feet per second under Conditional License No. 3724 and 11.2 cubic feet per second under Conditional License No. 3725, and as to 1425 acre feet thereof to supplement the right to take and use the water applied for herein.

THIS NOTICE was posted on the ground on the 1st day of February, 1916. A copy of this notice and an application pursuant thereto will be filed in the office of the Water Recorder at Prince Rupert, B.C., and objections to the application may be filed with the said Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is February 17th, 1916.

WALLACE FISHERIES LIMITED, Applicant. By Angus McAlister, Agent.
