Arrangements Are Made with Steamship Lines to Call at Prince Rupert

CALGARY, May 18 .- The Wheat Pool has made arrangements for some of the largest steamship lines to send their vessels to Prince Rupert to load cargoes on the opening of next grain season. It is planned by the Wheat Pool to ship most of its Oriental bound grain to the new Pacific port, but it also will ship to United Kingdom and European continental ports by that route as steamships will in most cases give the same rates from Prince Rupert as from other Pacfiic ports. The rail rate is the same and the steamship rate.

The Oriental business is inplanned to use Prince Rupert MEUSEL SCORED particularly for that business as time is saved and it is possible when the grain gets going that way that better steamship rates may be obtained from Prince Rupert than from Vancouver.

The capacity of the elevator is such that four big steamers may load there each day, according to the official report of the present third.

through Prince Rupert, which makes officials favor that route is the fact that the port charges! be no railway switching charges; or other worries.
