PREPARING TO OPEN SMELTER

Ladysmith Plant to Blow in for Handling Ores Containing Zinc Under New Process

VICTORIA, July 8. — In the course of about two months, it is anticipated that the ore separation works at Ladysmith will be in operation for taking care of products of Coast mines which contain zinc or lead, or both of them, in conjunction with other mineral contents.

For some time, Herbert Carmichael and H. B. Thomson, of this city, associated with some other investors, have been investigating the process which is now to be put into use, and the bringing of the plant of the Ladysmith smelter into condition to take care of the ore will be proceeded with without delay.

David McBride, who has had experience with this line of work arrived here a few weeks ago with Mr. Carmichael, and will remain to take charge of the plant at Ladysmith.

New machinery is being ordered, and this will be put into use with the equipment now on the ground in carrying out the plans of the new owners. It is the intention to use gas, which will be manufactured by the owners on the ground.

Mount Sicker Ore

The decision to start up the plant at Ladysmith carries with it also the announcement that the same owners will utilize ore from Mount Sicker as the basis of supply at the start. Work is now going on at Mount Sicker looking to the opening up of new ore bodies there, and a tunnel is being driven through the Lenora with the ultimate design of tapping ore bodies in the Tyee.

At present the tunnel is in about 700 feet. At that point water was encountered, which will require the installation of a pump. This delays the work a little, but it is expected soon to resume the driving of this main tunnel.

Tyee Ore on Hand

The Tyee, which in former years shipped a great amount of ore to the smelter, is one of the producers which the present process is adapted to meet. In conjunction with the copper contents of the Tyee there is considerable zinc. Under the process of smelting by the ordinary methods it was impossible to treat the ore when it ran more than four per cent zinc.

The result was that when the smelter shut down there was at the Tyee 70,000 tons of ore in sight that could not be treated at the smelter in consequence of the fact that it carried about nine per cent zinc. This will at once be shipped to the Ladysmith works when the new plant is installed.

Before the plant is ready at Ladysmith it will be necessary to have bunkers for the handling of ore which may be received there. This matter will be attended to without delay.

Will Meet Want

On the Pacific Coast in this Province and in Alaska, there is a vast amount of ore that contains zinc and lead. In the past this class of ore has been heavily penalized owing to the fact that the ordinary smelter was not able to separate the ore into its constituent parts without loss of one or other of the constituents.

The new process of separation does away with this situation, and the lead and zinc can be separated from the other metals and made available. In connection with the process there are a number of by-products which may be recovered and which will be of use in an industrial way, adding to the returns from the plant.

The opening up of the plant will, therefore, be a boon to the many owners of mining properties on the Coast, who have in the past been heavily penalized in the treatment of their ores or have had to allow the mines in many instances to remain idle.

WATER NOTICE

Use and Storage

TAKE NOTICE that J. M. Ruffner, whose address is Atlin, B. C., will apply for a license to take and use 70 C. F. S. and to store 42 C. F. S. of water out of 4th of July Creek, which flows south westerly and drains into Atlin Lake, about 6 miles north of Atlin.

The storage dam will be located at or near the foot of a chain of small lakes. The capacity of the reservoir to be created is about 1250 million cubic feet, and it will flood about 2900 acres of land, including the lakes. The water will be diverted from the stream at a point about and below the proposed dam about 5 miles westerly of west line of 4th of July Mineral Claim, and will be used for power for mining purposes upon the mines, described as Atlin Silver-Lead Mines and Ruffner Groups of Mineral Claims.

This notice was posted on the ground on the 16th day of June, 1926.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Atlin. Objections to the application may be filed with the said Water Recorder or with the comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after first appearance of this notice in a local newspaper. The date of the first publication of this notice is July 2, 1926.

YOUTH OF 94 OPENS STORE

Is Aided by Wife who is Only Two Days Younger than Her Husband

POMONA, Cal., July 8—George Thomason, aged ninty-four, who styles himself "a young man just starting out in business," has invested $60,000 in a jewelry establishment here preparatory to establishing his reputation as a Pomona business man.

Mrs. Thomason, two days his junior, is closely associated with her husband's new venture. The couple have eighteen children, nine sons and nine daughters, all living. All but two are twins, the youngest being fifty-two and the oldest seventy-five.

Thomason came here from Washington state, where he had been in business for 57 years. He recalled the days when Spokane had but 200 population.

Thomason was born at Louisville, Ky., in 1832 and was raised near Springfield, Mo. He has been married 77 years. He participated in the Civil War. He came west with his family over the Idaho trail to Spokane in a covered wagon in 1867.

NATIVE SONS TAKE ACTION

Action of Governor in Refusing King Dissolution Was Assumption of Authority.

EDMONTON, July 8.—Edmonton council of the Native Sons of Canada is only awaiting action by the Grand Council of that order before renewing the agitation for a Canadian-born Governor General which has been fanned into white heat as a result of the situation at Ottawa.

"Our position has been materially strengthened by the unprecedented assumption of authority by the Governor General and his refusal to grant Premier King the dissolution asked for.

The Edmonton assembly of the Native Sons had already placed itself on record in the matter of appointing a Canadian-born Governor General before the present Ottawa crisis was reached, having acted at the request of several other councils in passing strong resolutions. The action of Baron Byng has brought the matter very forcibly to the front again, and another Dominion wide movement is starting to have some attention paid to the protests being raised.
