The New Quiet 12 REMINGTON

does good work *always*—because it is built to do so. Even the less experienced operator finds good work easy, for the machine seems bound to turn out first class typing, however operated.

And don't forget the "natural touch" which makes its operation as easy, as simple, as natural as breathing or walking. To every typist we say "Try the touch." "The best ever," is the universal verdict.

The list, which may contain as many as 100,000 names, will be arranged in alphabetical order and placed in the hands of county clerks who will be instructed to decline to issue marriage licenses to any persons whose names are included.

COST OF ESTABLISHING MOVIE STUDIO IN B.C.

Mayor of Victoria Investigates Matter Which Will be Further Dealt With

VICTORIA, Jan. 26.—Construction of a moving picture studio in Victoria would involve an outlay of at least $350,000, Mayor Pendray declared yesterday after his return from a well-earned holiday spent in California.

He and Mrs. Pendray had been received by Douglas Fairbanks and had been taken on a tour of the extensive Fairbanks studio. A similar tour of inspection had been made of Mary Pickford's studio, adjoining that of her famous husband.

One of the high executive officials of the Pickford studio was and old Victoria, Mayor Pendray said. Discussing the project of starting the movie industry here, this official had informed the mayor that the construction of a studio, costing at least $350,000, would be necessary. In the light of his knowledge of conditions here, he told the mayor he knew that the "shooting" of outdoor scenes in Winter would not be possible every day, and that provision would, therefore, have to be made for elaborate studio operations.

This official proposed to study the situation here in detail, Mayor Pendray said, when opportunity offered, being enthusiastic about the natural scenery and the possibilities for sea pictures in the vicinity of Victoria.

VACUUM PROCESS FOR SEASONING LUMBER

Swedish Engineer Invents Scheme for Doing Work in One Day

STOCKHOLM, Jan. 26.—By a high vacuum process, invented by a Swedish engineer, fresh cut lumber is now "seasoned" in a day or less, sufficiently for the carpenter's bench.

Thus green birch boards become ready for the finest furniture in 20 hours; spruce and pine in thirty, and oak in forty. Such artificially "cured" lumber, moreover, is free from cracks, warps and "blue" spots.

On sliding rollers the planks are put inside the long, air-tight chambers, where they are first heated by steam coils and then pumped dry by the vacuum process which is 99.9 per cent perfect. This procedure is repeated according to the nature of the wood.

It appears that accused was a neighbor occupying a house which he rented from one of the girl's mothers. The girls were in the habit of playing about his premises where he had resided for six years.

E. F. Jones is prosecuting with Milton Gonzales appearing for Misner. The stenographer was Constable Smith of the provincial police force.
