TWO PROVINCES FOR 21 YEARS

Saskatchewan and Alberta Were Formed Into Provinces on September 1, 1905

The two Canadian provinces of Alberta and Saskatchewan attain their majority in regard to age on September 1st next. They will then be twenty-one years old as provinces of the Dominion. Prior to that date the area they now embrace had the status of territories administered largely by the Canadian federal government. The occasion of the two provinces reaching their majority provides an interesting retrospect. In 1905 the combined population of Alberta and Saskatchewan was 400,000 in round figures. It is now 1,500,000. The value of an annual agricultural production has increased in twenty-one years from about $40,000,000 to $785,000,000.

Big Increases

Alberta's wheat area is now nearly thirty times that of twenty-one years ago. The production of grains is nearly fifty times as great as in 1906. The average yield of wheat in twenty-one years has been over eighteen bushels to the acre. Less than 11,000,000 of the 60,00,000 acres suitable for farming are sown to field crops. In this period Alberta has developed a dairy industry with products totalling in value more than $20,000,000 annually.

Twenty-one years ago Saskatchewan produced 26,000,000 bushels of wheat. Last year the yield was over 240,000,000 bushels, more than half of the total wheat production of the Dominion. It is now the principal wheat growing area in North America, if not in the world. While wheat is still the main crop, mixed farming has made rapid progress in all parts of Saskatchewan.

Butter Production

Twenty-one years ago butter was imported by the carload into the province. Last year the creamery butter production amounted to fifteen million, eight hundred and fifty thousand pounds. There still remains 58,000,000 acres in Saskatchewan suitable for profitable farming. These two youngest of the nine sisters that form the Federal Union of the Dominion of Canada have reason to be proud of the robust state of their progress in twenty-one years.

Miss Mary D. Sim of the local school teaching staff returned to the city yesterday after spending the past few weeks at Victoria attending summer school.

CANADIAN BOOM LIKE FLORIDA

Same System Adopted by Same People as in Southern States With Success

LONDON, Aug. 27.—With the suddenness of war and the punctuality of a parade, a land boom of great significance for the whole of Western Ontario has developed at Pelee Point. For months past, persistent messages have been circulated in London and Western Ontario about the coming of a boom along the Lake Erie front. The activities of capitalists and realtors in Detroit, Buffalo and Cleveland, the collapse of the Florida boom, and the well known attractions of Western Ontario for summer resort purposes have provided reasonable grounds for these reports. Now, with the certainty of fate, the boom has come, and land values which on the waste frontage of Pelee Point were two weeks ago only $100 or $200 per acre have leaped to the spectacular height of over $5,000 per acre.

Engineered by Experts

The boom was engineered by Florida experts in accordance with latest Florida methods and the principles of mob psychology, says the London Free Press. Reports from Pelee Point indicate that over $1,500,000 was taken in by the promoters in two days, July 31 and August 1. The steamer, City of Toledo made two trips with a multitude of purchasers from Detroit who, on arriving at the peninsula, staged an old-time homestead rush. Priority holders who had paid $50 for their rights of pre-emption were given the first chance to buy the lots of their choice.

Line Up and Pay

The remainder lined up before open-air desks of the promoters and paid their money. The event proved rich in dramatic interest and is noteworthy as the first successful attempt to practice Florida methods in Ontario. The sellers are under obligation to the new colony who have purchased the peninsula to expend $300,000 in parks, piers, pavilions and improvements. Most of the purchasers are residents of Detroit. The price of the lots is said to have ranged from $2,000 to $9,000 each.

The boom was confined to a tract of 265 acres at the tip of Pelee peninsula. Most of it is waste land formerly owned by Capt. Post. The remainder is orchard land, the title to which was decided last February by a judgment of the Privy Council. On both sides the narrow neck of the peninsula is bounded by wide sandy beaches. At the extremity of the point a long tail of sand curls out into the blue waters of Lake Erie. Along the western side the government has reserved a strip 400 feet wide for use as a natural park. The remainder of the land is studded with shade trees and evergreen trees. The side approach is by means of a narrow trail six miles in length which winds past the famous onion beds and fruit farms through dense underbrush.

Rush of Traffic

The sudden rush of traffic has proved more than the shaky wooden bridges on the trail could bear, and engineers have been busily making safe the approaches to the peninsula.

GOT GOAT OF H. H. STEVENS

The Vancouver Sun says: To an unknown individual attending last night's Conservative meeting in the Grandview Theatre must go the distinction of having untethered Hon. Harry Stevens' Toggenburg.

Professor E. Odlum, chairman of the meeting, had assured his fellow residents in Grandview that if they would write out any questions they might wish to put to Mr. Stevens or General Clark he would undertake to have the queries answered.

For an hour and a half by the clock, Mr. Stevens devoted his undivided attention to the Old Age Pensions plan proposed by his political opponents.

He raked it over, ridiculed it, rent it clause from clause, railed at it, rolled it up and wrote "N. G." on it. When he had finished with it elderly Conservatives were trembling lest it come into effect. It began to take on the outward attributes of a sinister plof of the Liberal leader, Mackenzie King, to hound the aged and enfeebled into pauperism. His fellow politicians admitted that Mr. Stevens had done a good job on it.

When he had finished he wiped his perspiring brow and was about to resume his seat when Professor Odlum placed in his hand a slip of blue paper received from a member of the audience.

Mr. Stevens read it and wheeled about, face pale, eyes blazing and hands trembling.

"Who sent this question to me?" he shouted. Passion was in every word.

The audience was stunned into silence.

"I want to know what man in this audience sent me this!"—brandishing the paper in the air. "Will he stand up and say so?"

A man at the back of the hall admitted authorship. His note read: "What is your attitude on old age pensions?"

"In the name of Heaven, man —" But it was too much. Mr. Stevens tore the paper to pieces and walked on it.

SPORT CHAT

With the Cold Storage withdrawing from the league, the prospect is that there will only be the two Senior football teams for the Gilhuly Sup series which, it is announced, will open on Monday. Due perhaps to the fact that there was a scarcity of talent, there does not seem to have been as much interest taken in the game this year as usual. The suggestion is offered that for the next season the Senior and Intermediate Leagues be merged and the talent distributed about so that one good big league might be operated instead of two more or less indifferent ones, thus commanding a greater share of public interest.

FOUND

FOUND.—Set of teeth. Owner may have same by calling at Daily News Office and paying for advertisement.

FOUND.—Silk knitted scarf. Apply Daily News Office.

Why Home-brewed Beer Can Be Bad For Your Health

BREWING beer at home, a habit that has become widespread in the United States since prohibition deprived the people of the right to purchase pure and healthful beer legally and openly, presents difficulties and dangers of which those who engage in it are rarely aware.

HOME-BREWED beer can be actually dangerous to those who drink it, for the home brewer works by rule of thumb, perforce, and usually has no acquaintance with or control over the complex physical and chemical reactions that take place in the brewing of beer. Pure beer can only be made in a modern brewery by scientifically trained brewmasters who have at their disposal the most modern equipment and who are bound by the most exacting standards.

THE same materials which, in a modern brewery, are made into pure, healthful beer, can become, in the hands of a home brewer, a raw, incompletely fermented, indigestible and harmful mixture unfit for consumption. But where an established brewery uses only the highest grade of material—malt and hops—tested for purity, the home brewer is forced to purchase in stores imported syrup concoctions of inferior malt and low-grade hop extracts frequently blended with synthetic essences. The product of such mixtures is always harmful to the stomach and digestive system and dangerous to drink for any length of time.

THE home brewer is hampered not only by lack of knowledge of the science of brewing, but home equipment does not include the elaborate plant necessary for prolonged sterilization and filtering to assure a pure, healthful beer free from bacterial infection. In beer that is the product of a perfectly equipped brewery all fermentation is complete; in home-brewed beer fermentation continues, and continues after it is consumed. It is really an explosive mixture, whether in your stomach or in the bottle, as shown by the way in which bottles explode and tops are blown off.

HOME-BREWED beers are usually higher in alcoholic content than they should be. In the beers supplied by the Amalgamated Breweries to the people of British Columbia through licensed premises or through Government stores the alcoholic strength is only 4½ per cent., the most favorable strength for the stimulation of the stomach toward aiding digestion. Home-brewed beers also usually contain greater or less percentages of deadly fusel oil, from which properly brewed, stored and aged beers are free.

ANY physician can tell of the dangers of home-brewed beer, from which, happily, the people of British Columbia are free, for they have the privilege of obtaining pure, good beer made by the Amalgamated Breweries of British Columbia in plants that are equipped with every facility for the brewing of pure beer, perfectly flavored, well matured and healthful.

Visitors are cordially welcomed at the plants of the members of the Amalgamated Breweries of British Columbia: Vancouver Breweries, Limited; Rainier Brewing Co. of Canada, Limited; Westminster Brewery, Limited; Silver Spring Brewery, Limited; and the Victoria Phoenix Brewing Co. Limited.
