"Business generally remains satisfactory and the outlook presents no cause for misgiving. Such reliable indices as bank note circulation, clearings and railway earnings all point fair. Foreign trade figures are large. TRANSPORTING AUTO TOURISTS TO RUPERT.

A correspondent suggests that tourists who drive in their autos as far as the Conservative government of Arthur Hazelton should be induced to transfer to rail and visit Prince Rupert. Here is Meighen. what he says:

"Now that it is at last possible to drive from Vavcouver to Hazelton. Prince Rupert should keep her eyes upon the motor traffic which undoubtedly will flow into central British Columbia in increasing volume. It will be some years before motorists will be able to drive through to Prince Rupert, from the Bulkley has a right to differentiate between Valley, but efforts should be made to have them leave their cars at Hazelton two parties. and visit Prince Rupert by train.

"Inducements for making the train trip down to Prince Rupert would lie in the magnificent Skeena scenery, the fishing to be had in lakes and rivers, the boating trips that can be taken to various beauty spots near Prince Rupert, the picturesque canneries and the Skeena fishing fleet, the cold storage plant, etc. But it will be necessary to tell the motorists about these things when they reach Hazelton, Smithers, Prince George, or other points in the hinterland. Naturally, the question follows the utter astonishment of hearing the new Orthophonic Victrola for the first time.

COMPARED with the enchantment of actual performance,—explanation seems futile.

Yet, humans are curious. The query persists: "What makes Orthophonic Victrola music so captivating?"

First, there is the revolutionary new acoustic principle. Second, there are the things it only, -of all reproducing instruments, -accomplishes. The Orthophonic Victrola reproduces the bass sounds as they should be heard. Harshness,-it does not know. Piano notes are maintained for

Organ music has full organ resonance. Dance music rhythm is compellingly faithful to its original. Vocal harmony parts are clear and distinguishable from one another. Diction is natural as life. All tones have their true proportionate values. The result is beauty that matches the original, tone for tone.

There is yet a third reason for the wonder of this peer of instruments. It is a Victor Product!
