THIRTY PER CENT INCREASE IN JAN-UARY AND FEBRUARY AS COM-PARED WITH LAST YEAR

VICTORIA, March 31.-Increased production of coal by the collieries of the at province is indicated by figures covering the output for the first two months of the present year as compared with that in the same period in 1906. For January and February this year the aglong tons as compared with 340.025 long tons in January and February last year. All important producing districts showed an increase this year, Vancouver Island collieries providing one-half the gain. Last year it was Vancouver Island that went behind in production. A longer winter season and better shipping demand are the chief factors in the increased output. The Crow's Nest Pass collieries also showed a substantial increase with a greater output in coke.
