Hundreds of Furnaces are Installed

Scientists have made two vital discoveries regarding domestic heating. The first is that practically all inefficient heating systems are the result of improper installations. The secondthat Warm Air, scientifically installed, is healthier and more economical than any other system.

As a result of these discoveries, heating engineers have prepared a Standard Code

for installing Warm Air systems which guarantees efficiency and winter comfort such as has never before been attained. Today no home owner need install his heating system "blindfolded". McClary's Sunshine Furnace is now installed according to

> Standard Code—assuring a job infinitely more efficient, healthful and moneysaving than any yet discovered.

McClary's are the only Canadian members of the National Warm Air Heating and Ventilating Association—an association which has adopted a scientific code for installing warm air furnaces. By insisting on a McClary's "Code Installed" Sunshine Furnace you are guaranteed a heating system which costs less to buy and less to maintain than more elaborate systems—yet provides 70 degrees of heat in every room.

McClary's Ventiblast is an exclusive feature of McClary's Sunshine Furnace which burns soft coal equally as well as hard coal, coke or wood. It mixes pre-heated air with soft coal gases and converts them into flamethus eliminating soot, waste and dust.

Fill in and mail attached coupon, and we will send you name and address of the nearest McClary's dealer who will guarantee a "Code Installed" heating system which will give lifetime satisfaction.

MAIL THIS COUPON THE McCLARY MFG. CO.,

LONDON, CANADA. Please send name of nearest McClary's dealer who installs Sunshine Furnaces according to Standard Code.
