### IS POWER OF PRESS WANING?

Much has been said about the waning power of the press. were also given a cup. One of the It is frequently stated that newspaper are not today the dynamic pleasing features of the evening was force they were when edited by such men as Horace Greeley, James the presentation of a club bag to the Gordon Bennett, Henry J. Raymond, and other illustrious editors of energetic secretary of the Whist League the period of personal journalism. That day has passed and this Fred Wermig. is the period of institutional journalism. Newspapers have ceased Music for the dance was played by to be known as the vehicle of expression of an individual editor, but rather stand or fall on the character of the paper as a whole. Is the power of the press waning? Without arguing the question, but by considering the positive accomplishments of a group of representa- consisted of L. R. Parry, Sam Haudentive newspapers, it can be established definitely that those who schild, J. Bartlett, T. Saon, T. Elliott) talk of the waning power of the press are uninformed of what the and N. Mussalem. newspapers really are doing.

### RADIO TROUBLE U.S. AND CANADA.

Radio control in both United States and Canada is complicated because of broadcasting stations in both countries.

The situation makes it mandatory upon the two governments to arrive at some agreement under which interference between stations of the two nations would be minimized. It is with this end in view that the United States radio commission and Canadian representatives have been conferring. That they were not immediately in agreement was more to be expected than surprised at.

With eighty-two stations Canada wants twelve wave lengths of the committee which is arranging for of the less than 100 available. This does not seem an unreasonable the reception and entertainment of demand.

There is now before the radio commission the formidable task of allocating less than 100 wave lengths among the stations. Obviously some stations must accept lower wave lengths and be content with low power confining their audience to a limited area.

The commission must reserve channels for the American, the wharf where a platforn will be con-Canadian, Cuban and Mexican stations. Radio laughs at interna- structed for the occasion. The presentional boundaries and leaps the frontiers. Sooner or later, if there tation of an address to His Excellency is to be peace in the radio world, a North American agreement and the inspection of the guard must be made.

### IDEAL CITIZENS

ARE NEEDED HERE.

An ideal citizen is the one who sees clearly and ever something good in the city and never loses the opportunity to spread that good news abroad that others might derive the benefits therefrom, whose unselfishness prompts him to want others to share opportunities, health and pleasure which his home city offers.

Loyalty is the first requisite for the ideal citizen. The love for the place and his neighbors which dismisses the thought of self interest or policy and resolves itself into the knowledge of duty when he does all in his power to make the city a better place in which to live.

There are three distinct attitudes which a citizen may assume East, and in the evening, the party will toward the place in which he lives, which furnishes him food, be tendered a civic banquet which will shelter and association for himself and family to boost, to remain bring the day's festivities to a close. quiet or to knock. The booster is that ideal citizen who is never on Sunday morning the Governorforgetful of the obligations which is due the home city. He is ever General and party will attend divine found at the front when any movement is launched which might tend to the advancement of the interest of the city. While others see darkly, to him good is visible at all times. The quiet citizen is satisfied to let the neighbor do the work and content to lull the tive, will be T. E. P. Pringle, general city asleep and let it rest. The knocker is the man who is without a agent, passenger department. country. There is no room for him anywhere, his presence dampens the enthusiasm of every man or group of men who unfortunately OLD TIME SCOTTISH come in contact with him. Having no faith in his own ability to go forward, he naturally lacks faith in his home city to do so.

You have the chance to belong to either of the three classes. If you are a booster, your neighbor knows it well and will boost you. Event If you are aligned with the quiet class, you will not be regarded one way or the other, for the man who selects to steer in the middle of the stream, gets no support from either side. If unfortunately you are a knocker, get ready to be knocked, for eventually it is coming to you. As you give, so will it be meted out to you.

Prince Rupert would be an ideal city if only there were more ideal citizens. Let's have them.

ACCOMPLISH NOTHING AND ONLY DISRUPT FARM LABOR SAYS

VICTORIA OFFICIAL

VICTORIA, April 9 .- Growing popularity of the stampede and rodeo craze in British Columbia's smaller cattle comnunfties is becoming a serious menace. according to Thomas P. McKenie, Provincial Grazing Commissioner.

The labor problem, already an acute is aggravated by the detractions of the rodeos and Mr. McKenzie thinks that something should be done to check the spread of these competitions which are steadily claiming more and more of the cow hands' time and attention.

"These stampedes accomplish nothing but confusion by unsettling labor on the ranch and range during the season when all important operations are going on," says the commissioner in his The serving of refreshments and the report to the government. "Cowboys are inclined to devote their energies to pracicing up for bucking and steer-riding contests instead of the care of the cattle herds they are hired to attend. If the so-called stampede is to be held anywhere, let it be at large centres, where it will be on so extensive a scale that it will be truly an attraction rather than baneful influence."

### Ten Years Ago in Prince Rupert
