Nicholson and Dan Minor, associated with the pulp and paper mill undertaking projected for this district, have been up north running water levels between the possible dam site on Tatchi River and Takis Lake. of sport for the summer season. Judging by the number of beginners who are taking interest in tennis this year, it will soon be necessary to make some additional provision for courts. In a great number of cities there are municipal courts which have been found to be self supporting when once put in shape, and perhaps Prince Rupert might be well advised to consider taking some similar action in the near future.

The series of basketball games between teams from the local High School and the Terrace High School brought to a close a very successful season. One of the noticeable features of the season was the remarkable development of junior players, many of them playing in a large number of Senior games. It seems to be good practice, which is encouraged by the various sport associations in the city, to give the youngsters every chance. Last season the juniors showed marked improvement in the football league, and many of them this year may be found playing in some of the senior teams. Fans will recall that many local baseball players in the city here today got a start when playing in the boys' games which took place on the corner of Second Avenue and Seventh Street. This season promises to be a very active one for outdoor sports in Prince Rupert.
