DAILY EDITION. Thursday, April 28, 1927

SEA SERPENT. NEEDED HERE.

Now they have, not only one, but two sea serpents at Vancouver. Since the untimely fate of Ogopogo in Okanagan Lake during the winter, it might have been wondered who was going to have the next. Vancouver has grasped the opportunity and will probably make just as good use of it as they did in the interior towns.

Be they real or fictitious, sea serpents are not only valuable publicity but they are undoubtedly something of a tourist attraction. It is getting to be that no watering place is complete without having had one in its history. Prince Rupert needs a sea serpent in its business. If anybody finds one, the Daily News will be pleased to institute the publicity campaign which it will command.

NEW INVENTION IS SURPRISING.

When we look back a few years we find ourselves almost startled at the number of wonderful inventions that have aided the progress of civilization. Not least among these is the vitaphone, the new talking moving picture which is already being shown with a good deal of success in many parts of this continent. Those who have seen and heard the vitaphone say it is almost a perfect reproduction of movement and sound. They synchronize perfectly and the audiences are at first almost hypnotized with the wonderful effect. This form of entertainment is being featured in many cities of the coast and large crowds attend to witness the novelty and to be entertained by it. The cost of installation is said to be large but the effect is great and if the manufacturers continue to turn out good pictures and to employ good artists, it is likely that the vitaphone will continue as one of the best means of modern entertainment.

BACKWARD SEASON ALL ALONG COAST.

While a great many people in Prince Rupert seem to be complaining of the backward season here, it is to be noted that a somewhat similar condition has obtained all along the coast. Only during the past few days have the southern cities been blessed with real spring weather. This city, being farther north, has to await its turn. Summer will come in due time and we shall then all be happy.

IGNORANCE REGARDING CLIMATE OF DISTRICT.

There is much ignorance in the United States regarding the climate of Prince Rupert and neighborhood. The general inference is that because the city is near Alaska, it must be very cold here. They find it difficult to believe that the cold is no more intense here in winter than it is nearly two thousand miles to the southeast.

In order to reform it is necessary not only to stop doing something that is injurious, but to do something meritorious.

Anybody can be cheerful on a sunny day, but it takes a real man or woman to look smiling on the tenth day of the rainstorm.

When a man complains about everything and does it consistently, either his teeth or his stomach need attention—perhaps both.

Knocking a competitor is a sign of weakness. The strong and efficient do not need to knock anyone.

Whenever you find something worthy, encourage it, not only with your language and smiles of approval but by buying a ticket or making a donation.

STIKINE RIVER POSSIBILITIES

F. A. KERR OF GEOLOGICAL SURVEY WRITES IN GOVERNMENT BULLETIN

It has long been known that a fairly broad area along the eastern contact of the Coast Range batholith in British Columbia is geologically favorable for the occurrence of mineral deposits. This has been amply borne out by the discovery of many valuable ore deposits in areas adjacent to Portland Canal, Alice Arm, Atlin Lake, and at other points farther north and south. One of the serious obstacles to the development of the mineral resources east of the Coast Range has been a decided lack of economical transportation. At only a few places where the range is cut by long arms of the sea or great rivers, or traversed by railways, has it been feasible to develop mineral deposits profitably. This absence of transportation facilities combined with the physical character of the country has tended to discourage prospecting in areas which otherwise present considerable possibilities of reward. The Stikine River, though it has formed a highway of entry to the placer gold fields of the Cassiar for fifty-two years, has so far failed to be a means of developing that section of the zone along the contact through which it passes.

During the Cassiar and Klondike gold rushes this area was probably tested extensively for placer gold. The bars of the Stikine River itself and of the Clearwater, a tributary which, rising to the northwest, flows along the base of the Coast Range, yielded some gold. Incidentally, a few lode deposits of gold, copper and silver-lead-zinc were discovered and developed to a small extent. These deposits support the belief that this section of the contact zone may prove as rich as others which have already demonstrated their great worth. Some prospecting of the hard rock has been done but on the whole the area is almost untouched. Between Portland Canal and Atlin, two of British Columbia's rich mining camps, lies a virgin territory nearly three hundred miles long and of undetermined width which offers possibilities of producing camps like those situated at either end. This great area awaits the prospector and affords him a wonderful hunting ground, the sole disadvantage being that travel is difficult owing to the ruggedness of the country and the severity of the climate. Development should work outward from the routes of navigation, of which the Stikine River is by far the best. It crosses the margin of the Coast Range batholith and flows within a short distance of it for many miles, affording fair transportation facilities during five or six months of the year. The zone is also penetrated and cut by large tributary valleys.

CARILLON IS WORLD'S BEST

WILL BE INSTALLED IN OTTAWA MEMORIAL TOWER IN SPRING AND RUNG FIRST JULY 1

LONDON, April 28.—(Canadian Press). The carillon of 53 bells built at the bell foundry in Croydon for the Canadian Houses of Parliament at Ottawa, is the largest of its kind in the world. It is practically a sister carillon to the fine bells installed by the same firm, Gillett and Johnston, in the Park Avenue Baptist Church, New York, but whereas the New York Bourdon bell weighs 9½ tons, the Ottawa Bourdon weighs ten tons. The 53 bells extend through four and a half chromatic octaves from the Bourdon Low "E" to the fourteen pound top treble, High "A".

Every bell is in tune with itself—that is, it has been tuned accurately on the Five Tone Harmonic Principle. The whole carillon has also been carefully tuned to the scale of equal temperament, so that the performer can

modulate from one key to the other without offending the ear. Before Bach invented the 'Scale of Equal Temperament' over 200 years ago, it was impossible to attain this result in ordinary music, and until the last few years this refinement was unknown to the bell world.

The Carillon has also been tuned absolutely to International pitch, which is in general use for ordinary musical instruments and modern concert practice in both hemispheres.

The total weight of the bells is 53 tons, and the weight of the steel framework and fitting is about 22 tons.

ENGLISH AND FRENCH

The inscription on the Bourdon bell is in English on one side and in French on the other, and round the top of bell a continuous design of maple leaves has been moulded. At the special request of the Canadian government, the wording of this inscription has not yet been divulged.

The world's record was achieved in the time taken to construct the carillon—from the date when all the details were settled, all 53 bells with the necessary machinery have been finished in 18 months.

The 10-ton Bourdon bell will be the second largest individual bell in Canada and the third largest on the American continent.

An elaborate 'Practice Clavier' is being supplied with tuned bars and resonators and having a keyboard exactly similar to that of the Carillon Clavier (or console) so that the Carillonneur can learn fresh pieces without annoying the neighbors. A more important use of the 'Practice Clavier' is to enable pupils to learn the rudiments of playing and acquire a certain amount of proficiency—particularly in pedal work—before playing on the Tower instrument is permitted.

The clock mechanism is divided into three separate units, the "Going Train" driving the hands of the four 15 9/16" diameter clock faces, while the "Striking Train" and "Quarter Train" are placed fifty feet below, under the bells. The old fashioned clock weights are dispensed with and in their place powerful electric motors lift and release the enormous clock hammers. Shortly after Easter the Carillon will be shipped to Canada, so as to be inaugurated on Dominion Day, July 1. The Victory Tower is probably the finest position in existence for the purpose of carillon music.

None of the men who would make perfect husbands are married.

"PROVINCIAL ELECTIONS ACT"

PRINCE RUPERT ELECTORAL DISTRICT

MACKENZIE ELECTORAL DISTRICT NOTICE is hereby given that I shall on Monday, the 16th day of May, 1927, at the hour of 10 o'clock in the forenoon, at the Courthouse, Prince Rupert, hold a sitting of the Court of Revision for the purpose of revising the lists of voters for the said Electoral Districts, and of hearing and determining any and all objections to the retention of any name on the said lists, or to the registration as a voter of any applicant for registration; and for the other purposes set forth in the "Provincial Elections Act."

Dated at Prince Rupert, B.C., this 6th day of April, 1927.

NORMAN A. WATT, Registrar of Voters.

NOTICE

IN THE MATTER of an application for the issue of a Provisional Certificate of Title for Lots twenty-one (21) and twenty-two (22), Block seventeen (17), Section one (1), City of Prince Rupert, May 923.

Satisfactory proof of the loss of the Certificate of Title covering the above land having been produced to me, it is my intention to issue, after the expiration of one month from the first publication hereof, a Provisional Certificate of Title to the above land in the name of Muriel De Grasse Evans, the original Certificate of Title is dated the 19th October, 1914, and is numbered 67301.

Land Registry Office, Prince Rupert, B.C., 6th April, 1927.

H. F. MacLEOD, Registrar of Titles.

NOTICE

Under and by virtue of the provisions of Section 28 of the "Mineral Act," notice is hereby given Messrs. Malcolm Smyth, Edmund Langis, Harold Hansen and Albert Moore, that there is owing to the undersigned for Assessment Work performed on the Cordillera Group of Mineral Claims, Princess Royal Island, Skeena Mining Division, the sum of \$393.88, and that unless said persons pay their proportionate share of the cost of such Assessment, together with all costs of advertising, etc., to the undersigned as Butedale, B.C., on or before May 12, 1927, application will be made to the Gold Commissioner, Prince Rupert, B.C., to have their respective interests in the herein mentioned Mining Group of Mineral Claims vested in the undersigned.

DAVID CORDILLA, JACOB KOSKI.

WATER NOTICE

NOTICE IS HEREBY GIVEN that His Honour the Lieutenant-Governor of British Columbia, by and with the advice of His Executive Council, has been pleased to order: THAT the reservation of the unrecorded waters of Brown's River and McKnight Creek, tributaries of Egall River, established pursuant to Order in Council Number 808 approved the 18th day of June, 1921, be cancelled. The cancellation of the said reservation will be effective on April 19th, 1927. DATED this 11th day of March, 1927.

Recipes from St. Charles Recipe Book

(Sent Free on request to The Borden Co. Limited, Vancouver)

TOMATO CHOWDER

2 cupful Borden's St. Charles Milk
 1 pint hot water
 2 1/2 cupfuls canned tomatoes
 1 medium sized onion, sliced thin
 1 tablespoonful butter
 6 water crackers, split

Melt the butter in the top part of the double boiler, add the onion, and cook it gently till yellowed, about five to eight minutes. Pour in the milk and water, set over the lower part of the double boiler and scald. Mix the flour, salt and pepper with enough cold water to make a smooth cream; stir it into the milk and cook about fifteen minutes, stirring occasionally. Heat the tomato with the sugar; when boiling, add the soda and combine it with the thickened milk. For serving, put a split cracker which has been dipped in warm water, in each plate.

ONE EGG CAKE

3/4 cupful Borden's St. Charles Milk
 diluted with 1/4 cupful cold water
 1/4 cupful vegetable cooking oil, scant
 1 egg
 1/2 teaspoonful salt
 1/2 teaspoonful baking powder
 1/4 cupful sifted flour
 1/2 teaspoonful vanilla
 1/2 teaspoonful lemon extract

Beat the egg light and cream it with the sugar, salt, and flavoring. Combine the milk, diluted, with the cooking oil. Sift together the dry ingredients and add them alternately to the first mixture with the milk. Beat thoroughly, turn into a lined, medium-sized pan and sprinkle nut meats, chopped raisins or cocoanut over the top. Bake in a moderate oven, for thirty minutes.

BRAN MUFFINS

3/4 cupful Borden's St. Charles Milk
 diluted with 1/4 cupful water
 1/4 cupful water
 1/2 teaspoonful salt
 2 1/2 tablespoonfuls molasses
 2 tablespoonfuls melted butter
 1 egg
 2 cupfuls flour
 1 cupful bran
 4 teaspoonfuls baking powder

Beat the egg and add the other ingredients in the order given. Beat well and transfer to well oiled muffin pans and bake thirty-five minutes in a moderate oven.

Borden's ST. CHARLES MILK

Use it Wherever the Recipe Calls for Milk
