Sanitation in The Laundry

Hygeia, March, 1927

A kitchen is properly a food shop and should be used for little else. It is distasteful to think of the possibilities attending laundry work in the kitchen in the winter when doors and windows are closed to keep out the cold and when steam from the boilers, and later from the drying clothes, mingles unchecked with the foods that are being prepared.

U.S. MINT BUYS MUCH STOLEN GOLD

WASHINGTON, D.C., Dec. 2.— The United States mint is inadvertently a "receiver of quantities of stolen gold," Robert Appleton, president of the Association of Grand Jurors of New York County, told the National Crime Commission conference in discussing means of combatting the "fences" who purchase the loot of criminals.

"The reason for this astounding situation is that there is no strict accountability which compels a systematic scrutiny of the source of precious metals when offered for sale," he declared. He urged amendment of the mint's regulations to provide for stricter identification in purchases of gold.
