TEN MILLION BUSHELS GRAIN ARE EXPECTED

Output of Peace River Country Said to be Very Promising So Far

EDMONTON, Alberta, July 14.—Providing that crop conditions are suitable from now on, the Peace River country will probably have 10,000,000 bushels of grain for shipment this season, states W. E. Wood, prominent farmer in that district, who has arrived in Edmonton on a business trip. He points out that this yield comes up to what was suggested by Sir Henry Thornton as a condition of the building of a railway outlet to the coast.

Acres have been increased this year and with good ripening weather, the country will produce the biggest crop in its history, says Mr. Wood. There is an adequate supply of moisture for the present, some districts reporting even too much rain, while everything points to a record yield if no setbacks occur before the harvest.
