The importance of the work to British Columbia, it was pointed out, lay in the fact that in one day last year no fewer than 54,000 people visited the Field Museum.

Pittsburg Fails to Improve Its Frail Lead in National Over Chicago

NEW YORK, July 6.—Pittsburg Pirates, leaders of the National League, continued their winning streak yesterday by defeating St. Louis Cardinals 14-2 but have not improved their frail half-game margin for supremacy as the Chicago Cubs again defeated the Cincinnati Reds 8-5. Philadelphia beat Boston 5-4 in the only other game played in the league.

New York Yankees continued their victorious stride in the American League by defeating Washington Senators again by 7-6. The cellar dwelling Bostonians spoiled Philadelphia's chances for going into second place by beating them 6-5.

The Yankees, with a lead of twelve and a half games, are now off for their second western tour of conquest. Tony Lazzeri went the game for the American League leaders yesterday with a home run with two out. Hoyt is laid up with a lame arm and shoulder and injured ankle and Koenig is still out but the Yanks are still winning games. Gehrig got a homer with the bases full. Five homers, four doubles and two triplets featured the game.

Every man in the St. Louis line-up got at least one hit against Detroit. The day's scores were as follows:

Boston 4, Philadelphia 5.
Cincinnati 5, Chicago 8.

Crucial Stage in Conference at Geneva to Try to Reduce Naval Strength of Nations

GENEVA, July 6.—A crucial stage was reached at the tripartite naval conference, but whether events will push the pourparlers toward an actual rupture or an actual treaty undoubtedly depends chiefly on Great Britain. The United States, it is said, is actuated by a conciliatory desire to understand the British cruiser needs and to meet them as far as possible. Yesterday, in fact, the American representative really told the delegates that his country would go to the extreme limit of 400,000 tons which was 100,000 more than the maximum for cruisers contained in the original American proposal but strongly indicated that his country would exert continued effort to put the limitation well under 400,000 tons.

Both the United States government representative and W. C. Bridgman, First Lord of the British Admiralty and official representative of Great Britain at the conference, last night vigorously denied that Britain was animated by aggressive designs in asking for a large number of small cruisers.
