Physicians urge satisfying breakfasts because in the forenoon most people are called upon to do two-thirds of their most important work.

To enable body and brain to reach their highest capacities in the shortest time, digestion must be easy and quick.

The delicious taste of Quaker Oats invites digestion. Gratefully warm, it is welcomed by the stomach. It assimilates quickly and its bulk and tender bran assist in the assimilation of other food. They aid in a function which doctors say is the first essential to good health.

And Quaker Oats sustains throughout the day's most vital working hours. No other cereal has such perfect balance of food elements. It contains 16% of the tissue builder, protein; 65% of the energy producer, carbohydrates; and the all-important vitamines and mineral salts.

If you are not using Quaker Oats at breakfast, start now. You will take up your morning work more eagerly and will feel more vigorous and alert throughout the day.
