NEW BUDGET SHOULD BE POPULAR ONE.

The budget presented to the legislature yesterday by Hon. J. D. McLean, minister of finance, may not provide for quite as sweep- connection with the development of ing relief as some of the more hopeful people might have anticipated but it does propose the most extensive measure of tax reduction that has been attempted in the province for at least two decades. A made impossible for want of them. splendid start is being made on the lightening of the taxation burden and, if the program thus initiated is carried out, British Columbia people will indeed have something to be thankful for.

The raising of the income tax exemption for married persons followed railway construction. from \$1,500 to \$1,800 will eliminate taxation for many people and will reduce the payments of all. The increase of the exemption for dependents from \$200 to \$300 will be of further benefit. It is gratifying to note that the first step in the connection is taken to by the topographical surveyor in makbenefit people with families before any general revision is under-

taken. It is family people who always suffer most from this impost. placing on the maps the maze of rivers In wiping out the personal property tax, a very generally condemned measure is eliminated. The new scheme of taxation to take try, and to travel in whatever direction its place has been adopted advisedly and should prove more accept- he pleases. Transportation, Mr. Cautable. There has also been much agitation against the old mode of ley said is not difficult in northern Oncollecting succession dues and the new plan should prove the fairer, tario and Quebec, but the lakes are

The suggested increase for the civil service will be a concrete irregular, and deeply indented, and the boon to a large number of workers who have been more or less discontented with inadequate wages for some time past.

All in all, the new budget should prove a popular one, reflecting credit on the government that has enacted it. The clamor for tax reduction has been widespread during the past few years and about there will be general gratification that the government has found it Aerial photographs used in conjuncpossible and seen fit to meet the wishes of the people in such a, com- tion with the ground work of the topoparatively speaking, substantial way.

NOT TIME, BUT ITS USE THAT COUNTS.

It is not time-seconds, minutes, hours, even years - but the use that men make of time that makes the difference in men's for-

Nature is absolutely impartial in the distribution of her hours. She gives to no man time that she does not give to another. The same morning gives every man an equal start with his fellow and the same night finds each another day further on the journey or lost by the wayside.

But all the time that nature gives to any man is the present. Man makes his own past and future. Grasp the opportunity of the solete. Through such modern surveys golden present that the past may not bring regrets, nor the future be without hope.

The great, promising but evanescent NOW must be grasped information gathered, from in its potent whole to secure the future and free the past of regret. Are six, eight, ten, twelve or eighteen hours a day man's allotted work? Not by all eternity. There are twenty-four hours on the clock and in man's working day. Man's work is twenty-four hours of sleep, recreation, eating and labor. There are no hours in the diurnal circuit for idleness, misguided recreation and intemperance in eating or sleeping. After the day's wage has been earned vides the basis for mapping, and that there is still life's wage, the dues of evolition which must be earned adequate mapping of this vast area in fruitful reading, healthful thought and deep-delving intrespec- conceived at an early date is shown

Too many work-a-day men end work with the eight hours and aztion. The Topographical Survey, wish for less, sleep ten hours and crave for more, eat to fullness and leave the table unsatisfied, hope in vain for the "luck in leisure," energy to this, one of its original obaccept no opportunities to improve mind and body and see not that those who are getting ahead in this life are those for whom every "waking hour" is a "working hour."

Working hours are found for the unwise, but the wise find Canada. These were scattered throughhours in which to work.

graphical surveyor is providing this information, and Mr. Cautley reported that last summer the Topographical Survey of Canada had four parties engaged on this work in northern Ontario, and that the Royal Canadian Force worked in conjunction with the Survey in taking photographs.

The north country while literally unknown, and unexploited is not the only country needing maps, and Mr. Cautley spoke of the situation in older parts of Canada where information depends on individualistic surveys of all kinds, as are being carried out the old information is being correlated and new people from Prince Rupert got on our national maps are prepared.

In western Canada, the Dominion Land System of Surveys-a system surveying land which covers a greater and also have a ticket office at Prince area than any other preconceived method of subdividing land for settlement in any part of the world-proin the naming of the survey organilately been able to devote more of its

Dominion Land Surveyors, Mr. Cauley pointed out, were last season engaged in mapping in twenty-one areas out all the provinces and two parties invaded the northwest territories. The work ranged from the highly detailed map of areas -of great economic importance to the exploration work of the north, where in addition to solving the mystery of the headwaters of a river. an investigation was made with a view to showing on a map the feeding resources of the new Weed Buffalo Park.

TOURIST TRAFFIC The growing tourist traffic in Canada was not being overlooked by the map makers, Mr. Coutley pointed out, and three parties were engaged in mapping areas decidedly attractive to tourists. In British Columbia, the photo-topographic system of survey, developed to a high degree of perfection in Canada, was being utilized to portray the relief of mountainous areas, the rivers, creeks and trails which would make the glories of the Selkirk mountains accessible to the tourist. The boundaries of the latest addition to Canada's chain of mountain parks-Kootenay Parkwere also delineated during the season.

ager of the westion region of the Canber, the number of people boarding our trains at Prince Rupert without first the correct procedure could be quoted. purchasing tickets totalled one hundred and nineteen. This is considered an average month so that if the number is multiplied by twelve, it can be assumed that during one year 1,428 which trains without having first paid fares.

That is a matter which is of more importance to Prince Rupert than may be generally supposed. We keep an agent Rupert and the promotion of those in charge to higher ranks in the service of the company will depend, to an extent, upon the showing they are able from the mouth and will be used for to make in the position they now hold. domestic and cannery purposes upon the Their record will also be judged upon ed land, for which purchase is applied how many tickets are sold, and, there- about 15 chains southwesterly from the fore, the residents of Prince Rupert who get on our trains without purchasing tickets from either the agent or the ticket office are, in all prob-

motions will be made. Again, those in charge are anxious to make a good showing for their own office, not only because they are desirous that the community in which they are situated shall make a better showing than rival communities: and that is only a method of exhibiting a worthy degree of civic pride,

In addition to these two facts there is a third. When tickets are not purchased before the departure of a train, the conductor has to sell the
