Rub At Bed-Time

For Deep Chest Colds

All colds should be treated with vapors, for vapors alone can carry the medication DIRECTLY to the air passages and lungs.

Vicks is a "vapor" treatment in salve form. For deep chest colds you first apply hot wet towels over throat and chest to open the pores, then massage briskly with Vicks for 5 minutes, spread on thickly and cover with a flannel cloth.

Vicks not only penetrates like a poultice or plaster, but the ingredients, vaporized by the body heat, are inhaled all night long.

This double action usually checks the most stubborn cold overnight.

"BOW-WOWS"-GREAT VARIETY PRODUCED

FORT WILLIAM, March 15 .- Applague of "pups" has struck Fort William, hundreds of stray and homeless "bow-wows" are over-running the city and as there is no official dog-catcher and no pound the situation is becoming alarming.

Only 600 dogs are licensed here but rapidly that they number thousands,

Citizens believe that the dog-derby craze is responsible. In Fort William, the youthful "mushers" are not content with one dog. They drive teams of four five and six animals, and as they campering down the streets, the welking rings with unholy howls.

What the citizens really object though is that the youngsters when the evening sport is over, turn their pups loose and then the canines make for back lanes, upset garbage cans, raid butcher and grocer stores and make the night hideous with puppy warfare.

about the local dogs. They are of "mushers" and even respectable dogs. with good homes, are deserting their Massett cozy kennels to join the packs.

Garnet Watt, brother of Norman Watt, is sailing this afternoon on Catala for Vancouver.

VEAL STARTLING FACTS IN RELATION TO PEACE AND WAR TIME DEATHS

The United States Bureau of Census investigating the recent epidemic that swept, not only over all of this country, but over most of the civilized world, found that deaths in America, properly chargeable to Influenza, were far greater in number, than deaths from all causes -among American troops in the great conflict. Official figures available from forty-six large cities of the country, show that 78,000 persons died as the direct result of the epidemic of influenza. The bureau, on the basis of the report received, believes that from 40,000 to 45,000 American boys gave up their lives abroad—this number including those who died from disease or accident, as well as those killed or fatally wounded on the battlefields. The fortysix cities, whose figures were examined, have only a little more than one-fifth of the total population of the country.

The experiences of this terrible epidemic, which claimed so many lives. have shown one thing conclusively, that is-that the method for combatting the "flu," which met with the most marked success was Chiropractic Adjustments. It was the only method that was uniformerly successful during the epidemic. The percentage of recoveries from "flu" was higher under Chiropractic adjustments than under any form of

treatment. That is not all, important though it Most people dread influenza, not for itself alone, but because pneumonia only too often results from it. Here is another fact, which in view of this. is of the utmost importance and signi-

During the epidemic, pneumonia developed in but a very small percentage of cases under Chiropractic adjustments-other complications and after effects were also much less frequent.

There are three common forms " which influenza manifests itself: The Respiratory form, the Gastro-Intestinal form, and the Nervous form. "Spanish influenza" seems to exaggerate the resanother "mere cold" (a common inflam-Brigadier Pinchon of Montreal will mation of the nasal mucus membrane). the inflammation is apt to involve the

REMOVING THE CAUSE

Influenza is the result of a toxic John A. Hackett of Alberta, who has condition of the body, that is: an acfily disorder. He is scientifically trained to detect and remove the cause. He Mrs. Clay, mother of Miss Bernice drives straight to the condition responthis he removes the pressure from the nerve or nerves, which in turn re-estab-Mr. Justice Gregory, who has been lishes transmission of the nerve force to moves the necessity for the natural forces in the body to burn the toxins by fever, so the bodily temperature re-

turns to normal and the fever is broken. With time to recuperate from the nternal disturbance, the body, in keeping with natural law, returns to normal health is the result. By locating the cause and removing it, the effect (disease) always vanishes.

As a means for getting rid of the after effects of the "flu," a surprisingly few Chiropractic adjustments provide a sure way to return the body to normal. PROOF

Further proof of the correctness of this basic Chiropractic principle is evident when we see it in operation. In at least one locality, during the worst period of the great "flu" epidemic, statistics show that chiropractors lost but one patient by death, out of total of 886 cases handled. No other health method can show a record even pproximating this. Being based on the infallible operation of natural law tics only confirm what millions of people already know and what thousands of Chiropractors, all over the world, are proving in their offices every day.

If you feel out of sorts, phone D. A. McMillan, Chiropractor (Palmer Graduate) for appointment. Rooms 6 & 7. Exchange Block. Phone 691. GOVERNMENT LIQUOR ACT."
