Sciatic Rheumatism

The Sciatic Nerve is the main motor nerve of the lower obs. Branching off from the spine in the region of the hips, its work begins where it leaves the spinal column. When pressure occurs on this nerve, the victim is crippled.

the lower nerve under the magnifynched nerves cannot transmit healthful impulses, Chiropractic adjusting removes the pressure > . The upper nerve is free as nature intends.

For this reason cause and effect are more closely related in sciatica than in most other conditions. When a spinal bone presses upon the sciatic nerve. the resultant pain begins right at the point of pressure.

For the same reason, Chiropractic Spinal Adjustments secure results more quickly and surely in sciatica than in most other conditions-because they are applied directly to the seat of the trouble and remove the cause.

HIS CANE NOW DISCARDED

"For months I had been suffering STOMACH from Sciatica. I was in such shape I couldn't sleep, work or rest, and was hobbling about on a cane. A friend suggested that I try Chiropractic. I was backward about investigating Chiropractic, figuring it would be like all the other things I had tried without results, but the time came when I was willing to try anything. Adjustments were started, and I will frankly say that I was relieved from the first one. I laid my cane aside after the fourth adjustment and haven't picked it up since. It has now been a year past and I have not lost a day's workhave had no return of the trouble since."-Grant Taylor, Chiropractic Research Bureau, Statement No. 2088-K.
