

Firestone Dealers

ARE PIONEERS IN BALLOON TIRE SERVICE

Another Reason Why They Serve Motorists Better and Save Them Money-

The advent of the Balloon Tire required an expansion in repair methods. To meet this situation Repair Schools were opened at the Firestone factories where the Firestone dealers and their repair men have been instructed in the care of tires and the use of the specially-designed Firestone Balloon Tire equipment.

In each territory throughout the country Dealer Educational Meetings have been held. These have been attended by most of the Firestone Service Dealers who have obtained the latest information regarding tire construction, care and repair methods.

Firestone Dealers are kept up-to-date on tire development and service—continually progressing and improving their ability to serve you better and save you money. See the nearest Firestone Dealer to-day and let him handle your tire requirements.

Crown Colony Days

Away back in the late sixties thousands of acres of British Columbia's timber were sold for one cent per acre, which looked like a fair price-then. Today similar timber is worth from \$150 to \$200 per acre, so tremendously has timber appreciated in value within the scope of an average lifetime.

What the young growth of today will be worth sixty years from now is beyond computation if it is protected from fire and allowed to reach maturity.

The moral is obvious.

Prince Rupert will have delegates at inspecting department of the Royal the convention of the Boards of Trade and Chamber of Commerce of Canada at Vancouver in September 12 to 14 if any Prince Rupert members are going south at that time and are willing to act. Members going are asked to notify the secretary of the Board.

Fourteen members of Third Prince Rupert boy scouts arrived home yesterthis evening for Vancouver en route to day from Port Simpson where they have been camped in charge of scoutmaster P. C. Miller. They came in on the Bushby tug P.R.T. 3, skippered by Captain Reg. Green. They all brought their coats of tan and report having had a wor to very enjoyable time.

PROTECT FROZEN EGGS RESTRICTING IMPORTS

OTTAWA, Ont., Aug. 6 .- Results of experiments regarding artificial incubation were given to the breeding section of the world poultry congress today by Dr. Luthar Weinmiller of Erding, Germany. He concluded that the moisture of air in the incubator had determinative influence on incubation results. That the degree of ventilation in most incubators is more than sufficlent; that a constant egg temperature of 38 degrees gave better results than at any other figure; that under-cooling of eggs is necessary; and that moving or turning the eggs is a factor of primary importance without which successful results cannot be obtained.
